

Carlton Packaging LLP

# Carbon (GHG) Emissions Report

2022/23

Completed by Carbon Neutral Britain Ltd

November 2023

Project No: 03685

# Results

## Summary

### Carlton Packaging LLP Carbon (GHG) Emissions

Reporting Period - 01/07/22 - 30/06/23

**719.39**

Scope 1  
Direct Emissions

**69.23**

Scope 2  
Energy Indirect

**1938.30**

Scope 3  
Indirect Other

Total  
Carbon  
Footprint

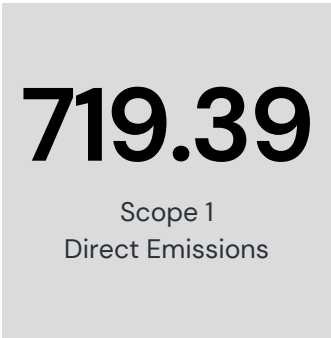

**2726.92 tCO<sub>2</sub>e**

GHG Emissions 2022/23 - 2726.92 tCO<sub>2</sub>e

GHG Emissions per FTE - 25.49 tCO<sub>2</sub>e

Completed November 2023

# Emissions by Scope

All Scope 1 emissions occurred from the company owned/leased vehicles, and the mileage completed within the reporting period, no other Scope 1 emissions occurred.

The main Scope 2 emissions occurred from the company energy usage within the reporting period. Other emissions occurred from electric vehicles.

The main Scope 3 emissions occurred from Inbound Deliveries. Other emissions occurred from the energy consumption from staff working at home (these emissions were attributed 'additional' energy consumption that would not have otherwise occurred at home), business travel, staff commuting, business hotel stays, water usage, waste, outbound deliveries, transmission and distribution losses and well to tank emissions.

# Carbon Neutral Certification

## Carbon Neutral Status

In November 2023, Carlton Packaging LLP offset their carbon footprint to become certified as a Carbon Neutral Business by Carbon Neutral Britain.

As certification awarded by an external organisation, it provides assurance that the carbon neutral claim is robust and credible, following calculation using the ISO 14064 and GHG Protocol Emissions Standard principles of relevance, completeness, consistency, transparency and accuracy.

Carbon Neutral Status has been awarded to the organisation for a period of 12 months.

It is recommended the organisation completes an annual calculation of its environmental impact and emissions in 2024, to further monitor and evaluate emissions changes after implementing reduction strategies, in addition to offsetting and maintaining carbon neutral status.
