This Interim Report has been prepared pursuant to Article 8 of the Capital Market Board's ("CMB") Communiqué on Principles of Financial Reporting in Capital Markets (II-14.1), promulgated in the Official Gazette edition 28676 on 13.6.2013, to provide an overview of the activities of Galata Wind Enerji A.Ş. ("Galata Wind," "Company" or "Group") in the interim accounting period of 01.01.2025 - 31.03.2025 and to inform investors.

A. Galata Wind at a Glance

Galata Wind, a subsidiary of Doğan Holding, is a company that generates electricity exclusively from renewable energy sources and embraces sustainability as a strategic priority. While minimizing its environmental impact, the Company aims to achieve long-term value creation by driving growth through innovative investments and supporting economic and social development through clean energy production.

Galata Wind generates 100% renewable electricity at its Gold Standard, VCS, and IREC certified wind and solar power plants across Turkey, contributing to the country's energy independence while advancing its goals of reducing carbon emissions and leading the transition to a sustainable future. The Company also designs solar power systems to be installed on the roofs of residences, schools, workplaces, gas stations and various other production facilities, enabling institutions, organizations, and individuals to meet their energy needs through renewable energy generation.

Galata Wind Energy reduces carbon emissions by approximately 430,000 tons every year by generating 100% clean electrical energy from renewable resources. With a total installed capacity of 297.2 MW, Galata Wind aims to reduce the country's dependence on imported energy by utilizing renewable energy sources and to become Turkey's clean electricity provider with an environmentally friendly, reliable and sustainable business model.

Galata Wind's wholly owned subsidiary, Sunflower Solar, focuses on developing commercial and industrial rooftop solar projects, aiming to empower every facility and household to generate its own clean energy. In addition, the Company is conducting research into alternative and more specialized technologies, including battery storage systems.

Furthermore, Galata Wind Energy Global B.V., the Company's 100%-owned subsidiary based in the Netherlands, continues its project development activities across Europe.

Backed by a highly competent and agile team, Galata Wind contributes to its sector and the Turkish economy while remaining committed to a sustainable future since its establishment. With its green, clean, and renewable energy generation assets, Galata Wind is investing in the future and remains fully committed to expanding its portfolio solely through renewable energy operations in the coming periods.

Vizyon, Misyon ve Değerlerimiz

Our vision

To create sustainable value for our country and stakeholders with our competent employees, by generating electrical energy exclusively from renewable sources in line with our environmentally friendly, respectful and transparent management principles.

Our mission

To become a preferred, exemplary, pioneering and respected organization with top-of-the-mind recognition in Turkey and in the region with an environmentally friendly, reliable and sustainable business model while reducing Turkey's dependence on imported energy by using national renewable energy sources.

Principles and our core values

At Galata Wind, we adopt Doğan Holding's core values as our own;

- Appreciating value
- Innovation
- Accountability and transparency
- Passionate about our work
- Succeeding together

Customer Satisfaction

Ensuring the satisfaction of our customers and communities is the focus of all of our activities. We complete and fully deliver our commitments on time.

Continuous Improvement

We monitor our processes with quality, environment, occupational health & safety, and energy performance indicators and strive to improve our system before irregularities occur.

Highly Qualified Employees

We work as a goal-driven team of qualified professionals, specialized in their respective areas, each working with a high level of knowhow, passion for their jobs, responsibility and pride, without engaging in personal conflicts.

Protecting Human and Environmental Health

For us, mitigating all the risks that may harm human and environmental health and keeping our people and the public informed is an integral part of our processes and activities.

* Capacity Utilization Rates are calculated based on the MWe power of the plants.

Galata Wind's Corporate Strategy

Galata Wind focuses its core business on renewable energy generation and has many years of experience in operating renewable energy power plants. With its low leverage and strong capital structure, the company is able to make investments that provide high profitability and predictable cash flows at lower costs and operate at high operational efficiency.

One of Galata Wind's strategic goals is to grow and become a global player in the renewable energy sector. The company is taking strategic steps to achieve this goal.

Focus on potential growth areas to become one of the leading renewable energy generator in Türkiye and the world

Galata Wind is closely monitoring industry developments to take advantage of growth opportunities. The company's potential growth areas have been identified as follows:

Capacity Increases

The Company boasts the potential to increase the installed capacity of the power plants it currently operates. Accordingly, application procedures are monitored and the applications for capacity increases are filed when needed.

New business acquisitions and/or project development in the renewable energy sector

The Company has established a business development team to review opportunities for acquisitions and project development. The domestic and international markets are constantly monitored for opportunities that meet the investment criteria.

Business models through new legislation

In parallel with the growth of the Turkish electricity sector, new business models are emerging and regulations are being updated to provide a basis for these business models. Galata Wind is evaluating the right investment opportunities that will create value for its stakeholders from these business models. As part of this strategy, the Company:

- Continues its efforts to establish hybrid solar power plants (SPPs) within its existing wind power plant (WPP) sites. The first phase of the hybrid SPP has already been commissioned within the Taşpınar WPP.
- Has obtained a pre-license to develop an energy storage-integrated power generation facility.
- Is actively monitoring the tender processes for wind and solar YEKA (Renewable Energy Resource Areas) announced by the Ministry of Energy, evaluating those that align with its investment strategy.

Increasing revenue from the sale of carbon credits

Carbon credits with Gold Standard and VCS certificates are issued via all of the Company's power plants. In view of the developments in the areas of the environment and sustainability, which are gaining importance worldwide (Paris Agreement and climate targets, European Union Green Deal, and Carbon Border Adjustment Mechanism), the Company expects carbon credit prices and thus revenues from carbon credits to increase.

Optimizing operational efficiency

Recognizing the optimization of its operational efficiency as a fundamental priority, Galata Wind sources high-quality turbines and panels for its power plants, uses most efficient systems by following technological developments, and monitors its power plants continuously from a single center. The company conducts continuous improvement studies for this purpose and considers possible options to improve production performance. The company strives to achieve the best possible availability for all its plants.

To be an exemplary company in the field of sustainability

Galata Wind, standing as Turkey's first green IPO with a collective portfolio consisting exclusively of wind and solar power plants, operates with the mission of becoming a leading and exemplary company in sustainability in the energy sector. More information about the company's sustainability strategy is provided in the "Galata Wind and Sustainability" section of the 2024 Annual Report as well as in all of the sustainability reports the company has been publishing since 2022. Galata Wind's sustainability reports are available on the corporate website.

Galata Wind, by placing differentiation from other sector players and leadership in sustainable development at the core of its corporate strategy, is committed to conducting its operations in alignment with international standards and stakeholder expectations. Having completed the first phase of the corporate strategy work initiated in 2025, the Company, based on the findings obtained during the IMAGE phase of the IPI methodology, supports its strategy with the following concrete and measurable commitments.

Galata Wind:

- Continues its commitment not to invest in fossil fuels, strictly adhering to its principle of investing exclusively in renewable energy sources.
- Implements carbon reduction plans with the goal of achieving net-zero operational carbon emissions (Scope 1) by the end of 2025.
- Ensures carbon reduction certificates (such as Gold Standard, VCS, etc.) are verified by independent organizations, prioritizing transparency throughout the process.

- Establishes a systematic waste management model based on the zero waste approach, embracing the principles of a circular economy.
- Creates social impact by implementing its Diversity, Equity, and Inclusion (DEI) policy across all stages of its value chain.
- Maintains a commitment to gender balance on its Board of Directors, recognizing the presence of at least one female board member as an essential element of sustainable governance.

Sustainability Rating

Galata Wind views sustainability ratings as a critical tool for assessing the impact of its business strategy and holistic management approach against international standards. These ratings objectively measure the Company's environmental, social, and governance (ESG) performance, providing transparent and reliable information to stakeholders. Integrating the outcomes of sustainability ratings into business processes not only supports Galata Wind's long-term growth objectives but also reinforces its commitment to adopting best practices in climate action, social responsibility, and corporate governance. Success in this area plays a pivotal role in realizing the Company's ambition to be a sector leader and contributing to global sustainability goals.

The sustainability ratings tracked by Galata Wind, along with detailed information and scores, are disclosed within the Sustainability section of the Annual Report, announced throughout the year via the Public Disclosure Platform (KAP), and shared on the Company's corporate website.

Keeping revenues and costs predictable

Galata Wind will allow its power plants to benefit from YEKDEM throughout their lifetime under this mechanism as long as YEKDEM prices are above spot prices. Otherwise, or at the end of the YEKDEM term, the company aims to fix its electricity sales from its power plants annually through bilateral agreements linked to the spot price.

On average, 75% of the company's operating expenses are directly related to contracts or tariffs. These expenses include maintenance costs, land lease, transmission, distribution and insurance costs.

Maintaining a strong capital structure and low leverage

Galata Wind's debt-to-equity ratio is the lowest compared to the other companies in the BIST Electricity Index. Thanks to its robust capital structure, the company is able to make new investments with its own funds. Aiming to increase its total installed capacity from 297.2 MW to over 1,000 MW by the end of 2025, the company plans to keep its net debt/EBITDA ratio below 3.5-4x to achieve this goal. Currently, this ratio is close to zero.

Galata Wind's Sustainability Strategy

Ozan Korkmaz	Board Memberships in non-group companies: APlus, SmartPulse, Sayax

* He was not re-elected as an Independent Board Member at the Doğan Holding general assembly meeting held on April 10, 2025, due to the expiration of his term.

ÇAĞLAR GÖĞÜŞ
Chairman

Çağlar Göğüş graduated from Bilkent University's Faculty of Business Administration and later completed his MBA at the University of Florida. He began his professional career in 1996 as a Senior Analyst at Coopers & Lybrand (now PwC) and later held positions as an analyst and consultant at Arthur Andersen and AT Kearney. In 2000, he joined Peppers & Rogers Group, where he served as General Manager responsible for EMEA and other regions following the company's acquisition.

Göğüş joined Doğan Group in 2015 as an Independent Board Member at Hürriyet Gazetecilik and later became the CEO. Since 2019, he has been serving as the CEO and Executive Board Member of Doğan Holding. He is the Chairman of the Board of Galata Wind Enerji and continues to hold board positions in various Doğan Group companies. Additionally, he is a Board Member of the Business Council for Sustainable Development Turkey (SKD Turkey) and Co-Chair of the Doğan Holding Sustainability Committee, where he leads sustainability initiatives.

BORA YALINAY
Vice Chairman

Bora Yalınay graduated from Bilkent University's Department of Economics in 1997. He has over 25 years of experience in auditing, financial restructuring, investor relations, financing, IPOs, cost optimization, and financial planning. He started his career at Deloitte's Istanbul office and later worked at Deloitte Canada. He held roles as CFO at Ülker Bisküvi and subsequently served as Vice President of Finance, overseeing operations in Turkey, Saudi Arabia, Egypt, Romania, Kazakhstan, Lebanon, and Pakistan.

Since 2019, he has been the CFO and Executive Committee Member responsible for Financial Affairs at Doğan Holding. He is also a Board Member at Galata Wind Enerji, Karel Elektronik, Ditaş, Doğan Dış Ticaret, Doruk Faktoring, Doğan Trend Otomotiv, Öncü Girişim Sermayesi, and D Gayrimenkul. Yalınay is a Board Member of the Turkish Investor Relations Society (TÜYİD) and holds a Certified Public Accountant (SMMM) license.

BURAK KUYAN
Executive Director and CEO

Burak Kuyan graduated from Istanbul University's Faculty of Business Administration in 1998 and completed his MBA at Virginia Polytechnic Institute and State University in 2002. He is currently pursuing a doctorate at Işık University.

Kuyan started his career at Finans Yatırım Menkul Değerler A.Ş. and joined Doğan Holding in 2005 as a Strategic Planning and Business Development Associate. He was appointed Energy Director at Doğan Holding in 2012, Chairman and Executive Board Member of Galata Wind in 2014, and CEO in 2017. He currently serves as the Executive Board Member and CEO of Galata Wind, overseeing all energy investments and operations within Doğan Group. Kuyan is also a Board Member of the Energy Trading Association (ETD), the Solar Energy Investors Association (GÜYAD), and the Electricity Producers Association (EÜD).

NESLİHAN SADIKOĞLU
Board Member

Neslihan Sadıkoğlu graduated from Galatasaray University's Faculty of Communication. She has over 20 years of experience in corporate communications, reputation and crisis management, brand management, marketing, social responsibility, and sustainability. She began her career in 1999 in CNN Türk's Public Relations department and became Corporate Communications Director in 2002. She later held managerial roles in corporate communications and marketing at Vakko Holding, Step Hali, Doğan Burda Magazine Group, and Douglas Perfume Turkey.

Sadıkoğlu joined Doğan Holding in 2016 as Senior Advisor to the Chairman of the Board and has been serving as Vice President of Corporate Communications and Sustainability since 2017. She has been a Board Member of Galata Wind since 2021. Additionally, she is a Board Member of UN Global Compact Turkey and the Business Council for Sustainable Development Turkey (SKD Turkey). In 2020, she completed the Sustainability Leadership Program at the University of Cambridge.

HÜSEYİN FAİK AÇIKALIN
Independent Board Member

Hüseyin Faik Açıkalın graduated from Middle East Technical University's Department of Business Administration in 1987. He has over 35 years of experience in the banking sector. He began his career at Interbank and held various executive positions at Marmarabank, Kentbank, Finansbank, and Demirbank. In 1998, he joined Dışbank as Deputy General Manager and was later appointed CEO and Executive Board Member. Following the bank's acquisition by Fortis Group in 2005, he served as CEO of Fortisbank.

Between 2007 and 2009, he was the CEO of Doğan Gazetecilik. From 2009 to 2017, he served as CEO of Yapı Kredi, Executive Board Member of Koç Financial Services, and Head of Banking and Insurance at Koç Holding. During this period, he also served as Chairman of the Board at Yapı Kredi and its domestic and international subsidiaries, as well as a Board Member of the Turkish Banks Association. Açıkalın has been an Independent Board Member at Doğan Holding between 2018 and 2025, as well as at Galata Wind since 2021.

OZAN KORKMAZ
Independent Board Member

Ozan Korkmaz graduated from Middle East Technical University's (ODTÜ) Department of Civil Engineering and earned his master's degree in hydroelectric energy from the same department. He is currently pursuing a Ph.D. in Energy Engineering at Istanbul Technical University (İTÜ).

With over 20 years of experience in the energy sector, Korkmaz is the Co-Founder and Executive Committee Member of APLUS Enerji, SmartPulse Teknoloji, and Sayax. These companies operate in the Turkish energy market and export energy services and software to Europe. His expertise includes energy demand and price forecasting, power generation investments, power plant optimization, transmission and distribution tariffs, and software development.

Board Committees

By resolution of the Board of Directors dated April 22, 2025, the Audit Committee and the Early Risk Detection Committee were appointed until the Annual General Meeting at which the activities and financial statements for 2025 are discussed, and the Corporate Governance Committee was appointed until the first meeting of the Board of Directors following the Annual General Meeting at which the activities and financial statements for 2025 are discussed the "Establishment of the Executive Committee" will be adopted. With the same resolution, it was decided that the Corporate Governance Committee will also assume the tasks of the "Nomination Committee" and the "Remuneration Committee" as set out in the Capital Markets Board ("CMB") II-17.1 "Corporate Governance Communiqué" ("Communiqué"). The working principles of the committees of the Board of Directors can be found on the company's website in the Corporate Governance/ Committees section at the following link: <https://www.galatawindenerji.com/en/corporate-governance/committees-and-working-principles>.

The committees were established as of 22.04.2025. During the 01.01.2025 - 31.03.2025 interim period the Early Risk Detection Committee meetings have not yet been held within the specified date range. The Audit Committee held 1 and the Corporate Governance Committee has held 3 meetings.

Employee movements and the rights and benefits offered to the employees

As of March 31, 2025, the number of employees of the Company is 65 (March 31, 2024: 56). As of March 31, 2025, the Company has 3 blue, 22 gray and 40 white collar employees (March 31, 2024: 4 blue, 20 gray and 32 white collar employees).

Galata Wind determines and updates its remuneration policy according to the current sector and market benchmarks, based on position, grade and title criteria. Galata Wind applies a remuneration system based on the philosophy of “equal pay for equal work”, not according to the individual, but according to the grade structure shaped according to position and job description. Annual wage increases are reflected in the wages of employees in January each year in line with inflation and market research, with the approval of the Company’s senior management. When deemed necessary, the employer may also apply increases to employees at different time periods during the year with the approval of senior management. All employees benefit from fringe benefit packages offered according to their title and grade level.

The Company’s Annual General Meeting decides each year on the remuneration, rights and benefits of the members of the Board of Directors. Executive members of the Board of Directors may receive a monthly salary and related benefits, in addition to the “attendance fee” they receive along with the other members of the

Board of Directors, depending on their duties in the Company. In addition, officers and other employees who have a say in the management of the Company may be entitled to an additional “bonus” or “reward” based on their performance. In the footnotes to the consolidated financial statements for the interim period ended March 31, 2025, this is disclosed in Note 18 under the heading Payments to key management personnel.

C.6. Information on the transactions executed by the members of the governing body with the company on their own behalf or on behalf of other parties, and their activities within the scope of the competition ban, according to general assembly’s approval, if any:

The approval of the general assembly is sought regarding the transactions, specified in Articles 395 and 396 of the TCC, except for the prohibited transactions, that the Board members are allowed to execute. To the extent of information available to Galata Wind, members of the Board of Directors have not engaged in commercial activities on their own behalf or on behalf of other parties in the Company’s fields of operation during the 01.01.2025 - 31.03.2025 interim accounting period.

C.7. Amendments to the articles of association during the reporting period and reasons thereof:

No amendments were made to the articles of association during the reporting period.

D. Remuneration Provided for Members of the Governing Body and Senior Executives

D.1. Remuneration provided for members of the governing body and senior executives:

Galata Wind has identified members of the Board of Directors, the General Manager, Deputy General Manager and Directors as key executives. Remuneration offered for key executives include financial benefits such as salaries and bonuses and other benefits like health insurance as well as communication and transportation expenses. These benefits are explained in more detail under Note 18 - Related Party Disclosures of the consolidated financial statements for the interim accounting period of 01.01.2025 - 31.03.2025.

D.2. Senior executives:

Information regarding the senior executives of Galata Wind is provided on the corporate web site (www.galatawindenerji.com).

E. Research & Development Activities of the Company

Galata Wind has not engaged in any research & development activities or incurred any related costs during the 01.01.2025 - 31.03.2025 interim accounting period.

F. Incentives Granted to the Company

The company currently holds a valid Incentive Certificate, issued on 28.12.2022 for TRY 432,713,966.

On 30.05.2023, the company received an Investment Incentive Certificate in the amount of TRY 689,000,000 for the Mersin WPP Additional Capacity Project.

G. Company Operations and Material Developments

G.1. The company's field of operation and the industries in which it operates:

According to Article 3 "Purpose and Subject" of the Articles of Association, "The Company operates in the field of building, commissioning, and renting electricity power generation plants, electricity power generation, and selling the electricity power generated." Within the scope of this purpose and subject, Galata Wind generates power using renewable energy sources and sells this electricity to the Turkish Interconnected Network.

Sunflower Solar Güneş Enerjisi Sistemleri Ticaret A.Ş., a wholly owned subsidiary of the Company, designs and installs roof solar energy systems. Galata Wind Energy Global BV, another 100% subsidiary of the Company, is based in the Netherlands and continues its project development activities in Europe.

G.2. Power Generation Industry:

As of the first quarter of 2025, Turkey's total installed electricity generation capacity increased by 2.2% compared to the end of 2024, reaching 117,885 MW (2024: 115,382 MW). Hydropower plants held the largest share at 27.3%, followed by wind power

plants with 11.1% and solar power plants with 18.3%.

Electricity generation in Turkey reached 88,417 GWh in Q1 2025, marking a 5.0% year-over-year increase (2024 Q1: 84,200 GWh). Of this total, 46.7% was sourced from natural gas and imported coal, 12% from domestic coal, 16.5% from hydropower, 10.7% from wind, 6% from geothermal and biomass, and 7.7% from solar power. Electricity consumption increased by 1.9% year-over-year to 87,267 GWh (2024 Q1: 85,672 GWh). In this period, 53% of demand was met through domestic sources (2024 Q1: 63.6%), and the share of renewable energy in demand was 49.0% (2024 Q1: 49.5%).

In 2025, 755 power plants are expected to participate in the Renewable Energy Resources Support Mechanism (YEKDEM). According to the final YEKDEM list published by the Energy Market Regulatory Authority (EMRA), the total installed capacity of accepted applicants stands at approximately 17,082 MWe, indicating a 0.3% decrease compared to 2024 (2024: 17,624 MWe).

Electricity prices in Q1 2025 showed an increase compared to the same period of the previous year. While there was a 17.1% decline in TRY-based prices year-over-year, the average price reached 2,390.3 TRY/MWh (2024 Q1: 2,040.5 TRY/MWh). Adjusted for the depreciation of the Turkish lira against the USD, the average price in dollar terms remained stable at 66.5 USD/MWh (2024 Q1: 66.1 USD/MWh). The increase

in prices is attributed to both seasonal and market dynamics. A period of low hydrology has reduced electricity output from hydro plants, and this shortfall has been compensated by increased reliance on imported coal and natural gas. Since these sources require cost recovery for marginal generation costs, the market's supply-demand balance has been impacted upward. As these are foreign commodities, their import prices continue to influence local electricity market dynamics. As reiterated frequently, the importance of domestic and renewable energy sources in ensuring supply security and cost stability remains undisputed in the face of local and global volatility.

Under the 2035 Renewable Energy Targets announced by the Minister of Energy and Natural Resources, Mr. Alparslan Bayraktar, progress continues. At the end of 2024 and into early 2025, YEKA tenders for 2,000 MW of capacity were completed. In solar (GES) YEKA, 800 MW across six projects in six provinces were awarded, representing approximately USD 500 million in investment and 1.5 billion kWh of annual electricity generation. Investors pledged to pay an average of USD 126,000 per MW in addition to the floor price of 3.25 USD cent/kWh. In wind (RES) YEKA, five projects totaling 1,200 MW across three provinces were awarded, representing around USD 1.2 billion in investment and 4.5 billion kWh in annual generation,

with investors committing to pay USD 100,000 per MW on top of the 3.50 USD cent/kWh floor price. New YEKA zones continue to be announced, and these tenders are critical to achieving Turkey's 2035 wind and solar targets and its 2053 net-zero goal.

Under the amendment to the "Regulation on Storage Activities in the Electricity Market," licenses have begun to be issued for a portion of the approximately 34 GW of pre-licensed storage-integrated projects (55% wind, 45% solar), with some licensed projects having already begun construction preparations.

Galata Wind Performance in Q1 2025

Galata Wind operates three Wind Power Plants (WPPs), two Solar Power Plants (SPPs), and one Hybrid Solar Power Plant (Hybrid SPP), with a total installed capacity of 297.2 MW. In Q1 2025, the company's wind power plants generated a total of 182,206 MWh. The share of Şah WPP, Mersin WPP, and Taşpınar WPP in Turkey's total installed wind capacity and wind-based generation was 2.0%.

The company's solar power plants generated 10,713 MWh of electricity in the same period. The share of Erzurum and Çorum SPPs in Turkey's total installed solar capacity and solar generation stood at 0.20%. Taşpınar WPP and Hybrid SPP, along with Çorum and Erzurum SPPs, were included in the 2025 YEKDEM list. Mersin WPP and Şah WPP sold their electricity through bilateral agreements at spot market prices.

G.3. Investments made by the company during the reporting period:

In the interim accounting period from 01.01.2025 to 31.03.2025, Galata Wind has acquired tangible and intangible assets amounting to TRY 283.27 million (2024/03: TRY 1,093.99 million).

G.4. Information on the Company's internal audit system and internal audit activities, and the governing body's opinions:

The Audit and Risk Management Group of Doğan Şirketler Grubu Holding A.Ş., the parent company of Galata Wind holding 70% of its shares, provides guidance and support to the Company in conducting the internal audits and performing the control function.

The findings of Doğan Şirketler Grubu Holding A.Ş. Audit and Risk Management Group are assessed by the Company and corrections and revisions are introduced in line with the recommendations while the internal control systems are continuously improved.

G.5. Information on the company's direct or indirect affiliates and their share ratios:

The Company currently has three direct affiliate. Information on the affiliate and its share ratio is provided in the notes of the consolidated financial statements for the interim accounting period of 01.01.2025 to 31.03.2025. This information is available on Galata Wind's corporate web site (www.galatawindenerji.com) and the Public Disclosure Platform ("KAP") (www.kap.org.tr).

galatawindenerji.com) and the Public Disclosure Platform ("KAP") (www.kap.org.tr).

G.6. Information on the acquisition of the Company's own shares:

The Company has not acquired any of its own shares within the 01.01.2025 - 31.03.2025 interim accounting period.

G.7. Disclosure regarding private and public audits conducted within the accounting period:

Galata Wind has not been subjected to any private or public audits within the 01.01.2025 - 31.03.2025 interim accounting period.

G.8. Lawsuits filed against the Group that may materially impact the financial standing and activities of the company and potential consequences:

The provisions reserved for the lawsuits filed against the Group and the lawsuit damages, depending on the specific aspects of the lawsuits are shown under Note 9 - Provisions, Contingent Assets and Liabilities / (a) Other short-term provisions of the consolidated financial statements for the interim accounting period ending on March 31, 2025.

The total amount related to the lawsuits filed against the Group is TRY 577 thousand as of March 31, 2025 (December 31, 2024: TRY 634 thousand).

G.9. Information on administrative or legal sanctions imposed on the company and the members of the governing body due to practices in violation of applicable legislation:

No administrative or legal sanctions were imposed within the reporting period on the Company and members of the governing body due to practices in violation of applicable legislation.

G.10. Information and remarks on whether the targets set in the previous periods have been achieved, whether the General Assembly resolutions have been fulfilled, reasons for failure, if any, to meet the targets or fulfill the resolutions:

The Company has fulfilled all General Assembly resolutions during the 01.01.2025 - 31.03.2025 interim accounting period.

G.11. If any Extraordinary General Assembly Meeting was held during the year, information on such extraordinary general assembly, including meeting date, resolutions passed at the meeting, and related transactions:

No extraordinary general assembly meetings were held during the 01.01.2025 - 31.03.2025 interim accounting period.

G.12. Information on the donations and aid extended by the company within the year and the expenditures incurred as part of social responsibility projects:

Donations and Aids	Amount (TRY)
Student scholarship	1.086.076
Ramadan Feast food boxes	138,960
Total	1,225,036

The donations and aids extended by the Company within the interim accounting period of 01.01.2025 - 31.03.2025 amounted to TRY 1.23 million (01.01.2024-31.03.2024: TRY 823 thousand).

G.If the Company is a subsidiary of a group, legal transactions made with the parent company, a subsidiary of the parent company, for the interests of the parent company or a subsidiary of the parent company under the direction of the parent company, and all other measures implemented or avoided from implementation for the interests of the parent company or one of its subsidiaries during the previous fiscal year:

Galata Wind has not engaged in any legal transactions with a subsidiary of its parent company, under the direction of the parent company, for the interests of the parent company or one of its subsidiaries, has not implemented any measures or avoided implementation or offset transactions for the interests of the parent company or one of its subsidiaries during the previous fiscal year.

G.14. If the Company is a subsidiary of a group, as per the circumstances and conditions known to them at the time of the above mentioned legal action taken or the measure implemented or avoided, whether a proper counter action is executed in the case of each legal action and whether the measure implemented or avoided has caused damage to the company, and if the company has indeed suffered a loss, whether it has been offset:

Since Galata Wind does not have any transactions of the nature specified in Article G.14 of this report, no loss needed to be offset.

G.15. Information on the Ordinary General Assembly Meeting:

The Ordinary General Assembly Meeting, during which the Company's 2024 operations and accounts were reviewed, was held at the Company's headquarters on April 3, 2025. At the Ordinary General Assembly Meeting convened on April 3, 2025, a total of 395,000,802.977 shares were represented—394,946,673.395 by proxy and 54,129.582 in person.

In summary, the following resolutions were adopted, and the full text of the resolutions is available on the Company's corporate website at www.galatawindenerji.com:

- The Board of Directors' Annual Activity Report and financial statements were approved.
- Each member of the Board of Directors was individually discharged of their fiduciary responsibilities.
- The Board of Directors' proposal regarding profit distribution was approved, and the Board was authorized to carry out the necessary actions.
- The following individuals were elected to the Board of Directors: Mr. Çağlar Göğüş, Mr. Burak Kuyan, Mr. Bora Yalınay, Ms. Neslihan Sadıkoğlu, Mr. Hüseyin Faik Açıkalın (Independent), and Mr. Ozan Korkmaz (Independent).
- DRT Bağımsız Denetim ve Serbest Muhasebeci Mali Müşavirlik A.Ş. (Deloitte) was appointed as the independent auditor for the 2025 fiscal year.
- DRT Bağımsız Denetim ve Serbest Muhasebeci Mali Müşavirlik A.Ş. (Deloitte) was also appointed

to conduct assurance audits of the sustainability reports for 2024 and 2025, including selected other sustainability-related disclosures.

- The upper limit for donations and contributions to be made within the fiscal year was set at TRY 40,000,000.

G.16. Material events in and after the interim accounting period (in chronological order):

13.01.2025 - Regarding the Alapınar WPP License

The installed capacity of the Alapınar Wind Power Plant (WPP) Project, held under the subsidiary of our Company, Gökova Elektrik Üretim ve Ticaret A.Ş., and which will be operational in Muğla province with generation license number EÜ/3519-37/2164, has been revised from 9 MWm / 6.8 MWe to 15.8 MWm / 13.6 MWe. This revision was approved by the EMRA Electricity Market Department Presidency Decision dated 25/12/2024, numbered 1022535, and includes the addition of one turbine, bringing the total number of turbines to three. The relevant decision was officially communicated to our Company on Friday, January 10, 2024.

Additionally, the project received a Positive Environmental Impact Assessment (EIA) Decision on December 18, 2024, and the remaining permit processes are ongoing as part of our 2025 investment plans.

05.02.2025 - With regard to the Şah WPP license

Our application for 1 additional capacity turbine with an installed capacity of 6.8 MWm / 6.8 MWe,

which we had previously submitted to the Energy Markets Regulatory Authority (EMRA) for the Şah WPP project, which has a generation license number EÜ/1565-7/1139, was approved with a department authorization no. 1046942, dated 02.02.2025. This increased the installed capacity of the Şah WPP to 111.8 MWm / 111.8 MWe. The corresponding decision was communicated to our company on Tuesday (04.02.2025). Moreover, on 20.01.2025, positive EIA decision had been issued and currently further approval procedures are underway. The new turbine is expected to deliver an additional annual generation contribution of around 20 million kWh.

10.03.2025 - Renewable Energy Investments Abroad

Pursuant to our Company's PDP disclosure of July 27, 2023, Galata Wind Energy Global B.V., a 100% subsidiary established to coordinate our renewable energy investments abroad and to realize investment strategies, has taken its first and important step within the scope of its project development activities in Europe. As a result of the work carried out for some time in Germany, which has been identified as one of the target countries, due diligence processes in a 22 MW Solar Power Plant project have been completed and the project rights have been taken over. SunSpark GmbH, which is a 100% subsidiary of Galata Wind Energy Global B.V. and established in Germany for this purpose, carried out the transfer transactions. The project rights were taken over from a company located in Germany. The power plant will be located in the south of Germany and will include the construction of

Agri-PV and Battery unit. The post-transfer permitting processes of the project are about to be completed and it is planned to be ready for construction in a short period of time. The project is expected to make a significant contribution to our international investment vision of 300 MW capacity between 2025-2027 and our goal of becoming a global player.

09.04.2025 - Renewable Energy Investments Abroad

In reference to our Company's public disclosure dated July 27, 2023, Galata Wind Energy Global B.V., a wholly owned subsidiary established to coordinate our international renewable energy investments and implement our investment strategies, has taken a new step as part of its ongoing project development activities in Europe.

As part of its targeted countries, the subsidiary has executed a Share Purchase Agreement ("Agreement") yesterday (April 8, 2025) with the sellers for the acquisition of shares in two Italy-based entities — Montescaglioso 1 S.r.l. (Palmori Project) and Ferrandina 14 S.r.l. (Troia Project).

Under the Agreement, the Company aims to acquire the shares of the sellers in exchange for a purchase price subject to certain adjustments as set forth in the Agreement. The completion of the transaction, including the transfer of shares and closing formalities, is contingent upon the fulfillment of the conditions precedent and other closing requirements stipulated in the Agreement.

This project is expected to contribute significantly to the activation of 300 MW capacity outlined in our 2025-2027 international investment vision and to support our strategic goal of becoming a global player in the renewable energy sector.

H. Financial Status

The summary consolidated financial statement and profit or loss statement of Galata Wind for the first nine months of 2024 are provided on the right.

Galata Wind's consolidated total assets in the first quarter of 2025 decreased by 2.4% compared to year-end and amounted to TRY 15,904.06 million. The Company's consolidated current liabilities amounted to TRY 322.05 million (31.12.2024: TRY 888.12 million), while non-current liabilities amounted to TRY 3,940.02 million (31.12.2024: TRY 3,902.75 million).

Deferred tax liabilities amounting to TRY 2.12 billion (December 31, 2024: TRY 1.98 billion) are included in non-current liabilities. TRY provisions for foreign currency denominated loans included in current liabilities decreased by 64% to TRY 322.05 million despite the increase in EUR/TRY and USD/TRY parity due to the settlement of principal balances. Foreign currency loans included in non-current liabilities decreased by 5% to TRY 1.71 Billion due to the reclassification of non-current liabilities to current liabilities despite the increase in EUR/TRY and USD/TRY parity.

* EBITDA is calculated as the sum of gross profit-operating expenses + depreciation and amortization. The depreciation of assets with the right of use shown in the financial statement within the scope of TFRS 16 is also included in the depreciation.

Condensed Financial Status (TRY million)	31 Mar 2025	31 Dec 2024	Change (%)
Total Assets	15,904.06	16,299.76	-2%
Current Assets	1,114.16	1,780.20	-37%
Cash & Cash Equivalents	686.65	1,451.07	-53%
Financial Investments	181.13	0.00	100%

Net Financial Debt	1,189.43	971.24	
Investment amount (Capex)	283.27	1,093.99	

Condensed Income Statement (TRY million)	31 Mar 2025	31 Mar 2024	Y-o-Y Change (%)
Revenue	556.06	669.85	-17%
Gross Profit	279.13	406.89	-31%
Operating Profit/Loss (-)	-54.16	-53.64	-1%
General Administrative Expenses (-)	-41.79	-43.17	3%
Marketing Expenses (-)	-12.37	-10.47	-18%
Other Operating Income/(Expense), net	131.03	27.20	382%
Operating Profit Before Finance Expense	356.01	380.45	-6%
EBITDA*	395.20	507.67	-22%
Finance Income/(Expense), net	-40.80	58.23	-170%
Net Profit	133.78	288.16	-54%
Earning/(Loss) Per Share	0.25	0.53	

Galata Wind's consolidated revenues decreased by 17% year-on-year to TRY 556.06 million in 1Q2025. Our total production was 4% lower compared to the same period last year due to the prevailing weather conditions. Although the average MCP in TRY terms was 17.7% higher than last year's average and the average USD/TRY parity was 17.2% higher than last year's average, the cumulative increase effect was below the inflation index of 38% for the March 2025 period, resulting in a decrease in net sales revenues.

Cost of sales increased by 5% year-on-year to TRY 276.92 million in 1Q2025, compared to the same period of the previous year. The main reason for the increase in cost of sales was the depreciation effect of newly commissioned power plants, which increased by 10% year-on-year to TRY 167.98 million (March 31, 2024: TRY 152.92 million). In parallel with the 17% decline in sales revenues, gross profit decreased by 31% year-on-year to TRY 279.13 million. Consolidated Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) decreased by 22% to TRY 395.20 million (2024/03: TRY 507.67 million).

The main reason for the TRY 99.04 million decrease in our finance income is the TRY 77.42 million decrease in our gain on monetary position compared to last year (March 31, 2025: TRY 56.67 million and March 31, 2024: TRY 134.09 million). In addition, our interest income recognized in other operating income increased by TRY 114.20 million to TRY 119.04 million.

Galata Wind's profit before tax in Q1 2025 was TRY 315.20 million (March 31, 2024: TRY 438.68 million). In 2025, net profit for the period decreased by 54% to TRY 133.78 million as the sum of current tax expense and deferred tax expense was TRY 30.91 million higher compared to the same period of the previous year.

H.1. Determining whether the Company's capital is secured or whether the company is in debt, and the assessment of the governing body:

The indexed equity as of 31.03.2025 amounted to TRY 11,641.99 million 255% above our indexed issued capital of TRY 4,567.20 million. This ratio is an indicator of our strong equity structure.

H.2. Measures, if any, considered to improve the financial structure of the company:

The Group's cash position and financial debts are continuously monitored in terms of financial risk management aspects such as maturity structure, interest risks and foreign exchange risks. Accordingly, no measures or actions are currently needed to improve the current financial structure.

H.3. Information on profit distribution policy, justification if profit would not be distributed, and proposal for how the retained profit would be utilized:

Galata Wind's profit distribution policy is available on the corporate website (www.galatawindenerji.com).

The Board of Directors has evaluated profit distribution by considering whether a distributable term profit had occurred in the independently audited financial statements for the accounting period of 01.01.2024 - 31.12.2024 and presented its recommendations to the General Assembly.

In accordance with the provisions of the Turkish Commercial Code ("TCC"), Capital Markets Law and the regulations of the Capital Markets Board ("CMB"), Corporate Tax Law, Income Tax Law and other applicable legislation, as well as the relevant provisions of our Company's Articles of Association and the publicly disclosed "Profit Distribution Policy"; it was resolved at the Ordinary General Assembly Meeting held on April 3, 2025, to distribute a total gross cash dividend of TRY 346 million, corresponding to 35.26% of the issued capital. The latest possible date for the commencement of the cash dividend distribution has been set as December 31, 2025.

H.4. Nature and amount of the capital market instruments issued, if any:

Galata Wind Enerji A.Ş. Company shares have started to be traded on Borsa Istanbul A.Ş. as of April 22, 2021.

I. Risks and Evaluation of the Governing Body

I.1. Information on the risk management policies, if any, that the company will implement against anticipated risks:

Galata Wind defines the measurement of operational, environmental, information technology, legal, compliance, and financial risks within the framework of its risk management policies and ensures that they are measured. The relevant executives monitor and manage these risks in light of available data and recommendations. The Company's risk management policy and comprehensive risk approach are detailed within its Sustainability Reports.

I.2. Information on the early risk detection committee, if formed, its management, activities and reports:

More information on the Early Risk Detection Committee, formed according to Article 378 of the Turkish Commercial Code, the CMB's Corporate Governance Communiqué (II-17.1), and Board of Directors resolution dated 22.04.2025, to serve until the Ordinary General Assembly Meeting where the accounting and operating results of 2025 would be reviewed is provided in Article B.5. The Early Risk Detection Committee has not convened yet in the 01.01.2025 - 31.03.2025 interim accounting period.

J. Corporate Governance and Sustainability

J.1. Corporate Governance Compliance Statement

Since April 22, 2021, when the stocks started to trade on Borsa Istanbul with the ticker "GWIND," the Company has been subject to the regulations of the Capital Markets Board. In accordance with Corporate Governance Communiqué

no. II-17.1 promulgated by the Capital Markets Board and published in the Official Gazette no. 28871 on 03.01.2014, the Company has strived to adopt the principles of equality, transparency, accountability and responsibility. Article no. 24 under the "Corporate Governance Principles" in the Articles of Association stipulates that the Company and its bodies will follow the principles mandated by the Capital Markets Board. The activities and Board resolutions that do not align with the mandatory principles will be deemed void and in violation of the Articles of Association. The

Capital Markets Board's corporate governance regulations will be followed during the implementation of the Corporate Governance Principles and in related party transactions of material significance for the Company's activities.

According to the CMB's Board of Directors resolution no. 6/121 dated 25.01.2024, Galata Wind is included among the BIST First Group Companies in the 2024 accounting period. The company was evaluated by Kobirate Uluslararası Kredi Derecelendirme ve Kurumsal Yönetim Hizmetleri A.Ş. using the methodology for "BIST First Group Companies" based on 456 criteria. The Communiqué "(II-17.1.a)" Amending the "Corporate Governance Communiqué (II-17.1)" and the Corporate Governance Communiqué No. II-17.1, both published by the Capital Markets Board, the regulations regarding the non-mandatory sustainability principles compliance framework, and the Board of Directors' resolution no.4/105 passed at the CMB's board meeting on 01.02.2013, were taken into consideration in the methodology and during the rating process.

Following the evaluations under the main headings of Shareholders, Public Disclosure and Transparency, Stakeholders and the Board of Directors, Corporate Governance Rating of Galata Wind Enerji A.Ş. was upgraded to 9.57. This score shows that the risks that the Company may be exposed to have been determined to a large extent, that the Company observes the rights of the shareholders and stakeholders, public disclosure and transparency activities are at a good level, and

Galata Wind'in ikinci sürdürülebilirlik raporu **TSRS, ESRS** ve **SASB** tarafından yenilenebilir enerji sektörü için önerilen sektör kılavuzu ilkeleri gözetilerek 2024 yılında yayımlanmıştır.

the structure and procedures of the Board of Directors are in compliance with the principles. Accordingly, Galata Wind has achieved significant compliance with the Corporate Governance Principles published by the Capital Markets Board.

J.2. Sustainability

At Galata Wind, we are committed to reducing Turkey's dependence on imported energy by generating 100% renewable, sustainable, and environmentally responsible electricity. In line with our sustainability strategy, Galata Wind embraces the principles of equality, transparency, accountability, and responsibility. In accordance with the amendments made to the

Capital Markets Board's Communiqué on Corporate Governance (II-17.1) published on October 2, 2020, we disclosed our 2024 data within the Sustainability Principles Compliance Framework through the Public Disclosure Platform (KAP), as well as in our Annual and Sustainability Reports.

Voluntary environmental, social, and corporate governance (ESG) disclosures—subject to the “comply or explain” principle—have been included in the relevant framework and provided as Annex-4 of our 2024 Annual Report. Following developments in 2022, our Company was included in the BIST Sustainability Index as of the first quarter of 2023 and published its first Sustainability Report in accordance with international standards.

In 2024, our second Sustainability Report was released in line with the Turkish Sustainability Reporting Standards (TSRS), the European Sustainability Reporting Standards (ESRS), and the sector-specific guidelines recommended by the Sustainability Accounting Standards Board (SASB) for the renewable energy sector. This second report covers our performance for the period from January 1, 2023, to December 31, 2023.

Sustainability Approach

At Galata Wind, we continue to contribute to sustainable development by generating electricity from environmentally friendly renewable energy sources. We view sustainability not only as environmental impact management but also as a responsibility to drive social and economic transformation. Guided by our commitment to leaving a cleaner and more livable planet for future generations, our Company aims to play an innovative and leading role in the energy sector.

The year 2024 marked the implementation of key regulatory initiatives supporting sustainable practices in Türkiye. The introduction of the Türkiye Sustainability Reporting Standards (TSRS) and the Türkiye Taxonomy aims to make companies' environmental, social, and governance (ESG) performance more transparent and comparable at the national level. In alignment with these developments, Galata Wind has enhanced its strategies and reporting frameworks to comply with the new regulations.

Since the outset, our approach to sustainability has focused on addressing the dual impacts of our operations. While striving to maximize the positive environmental and climate-related effects of our renewable energy investments, we also aim to continuously improve the social and economic outcomes of our operational processes. In this context, we have collaborated with civil society organizations, supported employee engagement, and invested in innovative technologies to boost energy efficiency.

Galata Wind's sustainability priorities have been determined using the methodology recommended by the AA1000SES (AccountAbility Stakeholder Engagement Standard). In addition to addressing the social, environmental, and economic expectations of key stakeholders, we have considered sectoral priorities, the United Nations Sustainable Development Goals (UN SDGs), and risk perspectives presented in sources such as the World Economic Forum Risk Report. Furthermore, in our initial Materiality Workshop, Galata Wind applied the double materiality principle, assessing both the direct impact of climate change on our operations and the impact of our operations on the climate. These findings have disclosed in our Sustainability Report.

To comprehensively update our materiality approach, we conducted a renewed Double Materiality Workshop

Galata Wind UN SDG Compliance Approach

<https://www.galatawindenerji.com/en/sustainability/sustainability-management/structure-strategy-policies>

in 2025. A thorough assessment was completed based on the outcomes of the Double Materiality Analysis, and for the upcoming reporting period, we plan to integrate a financial impact analysis alongside the materiality results.

The Company’s sustainability governance structure, strategies, policies, and key focus areas are available on our corporate website.

Sustainability Strategy

Galata Wind, the first company to be offered as a green IPO, with a total portfolio consisting exclusively of wind and solar energy, is pursuing a strategy of being a leader in sustainability and setting a benchmark for the energy sector.

Sustainability Policies and Procedures

Due to the nature of the sector in which the company operates, there is a high level of regulatory compliance. Therefore, Galata Wind prioritizes the integrated management system in all its operating processes. The company holds ISO 9001, 14001, 45001, 10002, 50001 and 27001 renewable energy certifications for its headquarters and power plants.

Galata Wind takes the United Nations Sustainable Development Goals as the basis for its sustainability approach. In line with the company’s material areas, the UN Sustainable Development Goals table is

Renewable Energy Production	Sustainable Processes	Sustainable Finance	Decarbonization	Social Approval
By producing environmentally friendly electricity from 100% renewable sources, we reduce approximately 430,000 tons of carbon emissions annually. Our goal is to increase to 550 MW our renewable installed capacity by 2025 and eliminate carbon emissions from our operations.	The foundation of all our processes are based on international sustainability principles and our targets are updated according to our material issues.	We fulfill our responsibilities by using sustainable financial resources, and plan our investments by ensuring that our processes are audited, our targets are monitored, and our resources are used properly and efficiently.	As Galata Wind, we care about the world we live in, invest in the right projects that add value to all our stakeholders, and focus on sustainability, the environment, and community engagement in our administrative affairs and operational processes.	We act with the approval and trust of all our stakeholders, starting with our employees, and recognize the importance of our goals for sustainability. By considering the ecological environment as a key stakeholder, we comprehensively address our environmental material issues.

published on the corporate website. Galata Wind is also a signatory of the United Nations Global Compact (UNGC).

Galata Wind published its second Sustainability Report in September 2024. In disclosing its sustainability or ESG performance, the Company prepared the content by aligning with the Türkiye Sustainability Reporting Standards principles. Additionally, to maintain comparability with its previously published 2022

Sustainability performance under the GRI Standards 2021 framework, Galata Wind continued to use the GRI Standards 2021 framework for its 2023 data disclosures. Furthermore, as part of its 2023 reporting, Galata Wind published its first CSRD (Corporate Sustainability Reporting Directive) index to meet European reporting expectations. Closely monitoring all draft developments by the European Commission, the Company also included a risk and opportunity assessment within the Sustainability Report.

In 2023, the Company's Scope 1+2 emissions amounted to 1,125.7 tons, while the total environmental investment reached TRY 1,316,011,560. The amount invested in community development projects was TRY 14,461,357, and the digitalization budget for 2023 stood at TRY 6,258,416. Galata Wind targets achieving a 10% energy efficiency improvement across all operations by 2025. In addition, to protect and enhance biodiversity and local ecosystems, the Company has committed to providing USD 200,000 in ecosystem support by 2025 and plans to implement two habitat restoration projects within this timeframe. Our efforts to reduce emissions, mitigate the impact on global warming, and contribute to national and international climate targets are ongoing. Accordingly, Galata Wind has set a target of a 15% reduction in its carbon footprint by 2030, as disclosed in the 2024 Sustainability Report.

In its 2023 Sustainability Report, Galata Wind also shared its decarbonization strategy with stakeholders. This strategy is not only focused on reducing direct and indirect emissions but also aims to lead the transition to a low-carbon economy through operational practices, stakeholder engagement, and a long-term vision.

At Galata Wind, sustainable supply chain management is an integral part of our mission to develop the renewable energy sector holistically while maintaining the highest environmental, social, and governance (ESG) standards. As a company firmly committed to sustainability, we recognize that our impact extends beyond our own operations to the practices of our suppliers and business partners. For this reason, we continue to build

a comprehensive sustainable supply chain management strategy, emphasizing ethical sourcing, risk management, continuous improvement, and collaboration with suppliers. By 2025, the core structure and procedures for sustainable supply chain management will be

finalized, and the first supplier risk categorization will be completed. Additionally, a comprehensive IFRS analysis related to Green Opex and Green Capex, covering high-risk suppliers, will also be conducted in 2025.

To elevate our employee development initiatives to international standards, Galata Wind has implemented a training management procedure. In 2023, a total of 2,777 training hours were provided. A survey was also conducted to assess employees' perspectives and expectations on equality, inclusivity, and anti-discrimination. Building on the 674 hours of volunteer work recorded by our Volunteer Platform in 2022, we achieved a 115.72% increase in 2023, reaching 1,454 volunteer hours. This program not only enhances employees' awareness of social issues but also strengthens their connection to the company's sustainability goals. Our target for volunteer hours in 2024 is set at 1,500, with plans to reach a wider audience through our Energy Ambassadors, fostering greater awareness.

In compliance with the Ministry of Energy's protocol, Galata Wind supported a wildlife sustainability initiative by sponsoring a documentary on the subject. As part of our commitment to improving the environmental conditions of the regions where we operate, Galata Wind conducts periodic bird monitoring and ornithology activities in accordance with IFC's Environmental and Social Performance Standards at our Mersin and Taşpınar WPPs, which are located near migratory bird routes. We report our findings to relevant institutions.

With a vision for equal opportunity in education, Galata Wind has restored physical learning environments

to support sustainable education for children from surrounding villages, including Tatar Village in Çorum, where our SPP is located. In collaboration with the Ministry of National Education, Çorum Tatar Elementary School reopened for the 2023-2024 academic year, marking the return of schooling after several years. A total of 40 elementary students from nearby villages have started attending school with transportation provided. Galata Wind's Volunteer Platform actively supported the school's renovation and repair process. Furthermore, through our partnership with Dost Association, Galata Wind continues to support the rehabilitation center where animals in need of care receive treatment. In 2023, the center has provided care for 65 dogs with cancer, rehabilitated six dogs rescued from earthquake rubble, treated seven dogs with fractures, and supported two dogs with neurological conditions.

In February 2024, with the participation of our Human Resources Manager, we conducted on-site sustainability training for 38 employees across our facilities in Balıkesir, Bursa, and Mersin. In addition to Galata Wind employees, subcontractor and supplier employees from the respective regions also attended the training. Delivered by our sustainability consultant, the training covered fundamental concepts of sustainability, business ethics, and awareness of environmental and climate change issues.

The company's policies are provided on the corporate website in the Policies tab of the Corporate Governance section as well as in the Sustainability tab:

Climate Change and Resilience Strategy

As one of Turkey's young and dynamic green energy companies, Galata Wind Enerji A.Ş. is committed to building corporate and operational resilience in the face of climate change. Our approach to climate adaptation is strategic, proactive and based on a deep understanding of the environmental risks and opportunities affecting

our operations by all managers and employees of the Company. Our commitment to climate resilience is not only about reducing the impacts of climate change on our business, but also about our role in the renewable energy sector to positively contribute to global climate goals.

Our climate adaptation strategy is evaluated under five main headings:

ESG Rating

In 2024, Galata Wind once again demonstrated its sustainability leadership both in Türkiye and globally by achieving strong ESG Risk Ratings from two leading global evaluation agencies, Sustainable Fitch and Sustainalytics.

Sustainable Fitch

Thanks to its commitment to sustainable energy, Galata Wind was awarded an ESG Entity Rating of “2” with an overall score of 76 by Sustainable Fitch, a leading provider of credit ratings, commentary, and research for global capital markets. This prestigious rating positioned Galata Wind as the second company in the EMEA region to be recognized as a “pure player” in the renewable energy sector.

Among the 13 Turkish companies assessed by Sustainable Fitch, Galata Wind ranked first and was positioned within the top 10% among 150 energy sector companies worldwide, strengthening its international

sustainability commitment. Moreover, within Sustainable Fitch’s broader universe of approximately 800 companies, Galata Wind was ranked within the top 5%, maintaining its strong position among the highest-performing renewable energy companies in ESG standards.

This achievement underlines Galata Wind’s significant contribution to combating climate change through its focus on renewable energy initiatives and its robust sustainability strategy aligned with the United Nations Sustainable Development Goals and its net-zero emission target for 2030.

Sustainalytics

According to the ESG Risk Rating analysis conducted by Sustainalytics in December 2024, Galata Wind received an ESG Risk Score of 15.2. This rating placed Galata Wind 17th among 89 companies globally evaluated in the utilities sector. Sustainalytics continued to classify Galata Wind’s risk of material financial impact from ESG factors as “Low.”

As one of the world’s leading independent ESG rating agencies, Sustainalytics’ Risk Rating analysis focuses on measuring companies’ exposure to material ESG risks specific to their industries and how effectively these risks are managed. Unlike the previous period where evaluations were conducted across seven categories, the new assessment was based on nine categories under the updated methodology. Galata Wind’s continued position in the low-risk category further validates the Company’s strong sustainability and governance performance.

CSRHUB

Galata Wind also significantly improved its ESG rating from 44 to 85 in 2024 according to CSRHub, an independent global ESG rating and information platform.

Founded in 2006 and publicly listed since 2021, Galata Wind is fully committed to expanding its portfolio exclusively with renewable energy activities and

In 2024, Galata Wind was awarded an **ESG Entity Rating of ‘2’** with an overall score of **76** by Sustainable Fitch.

Galata Wind’s **ESG Risk Rating Score** was updated to **15.2**. With this score, Galata Wind ranked **17th out of 89 companies** globally in the Electricity Services (Utilities) sector.

Galata Wind improved its **ESG score from 44 to 85** in an evaluation conducted by CSRHub.

investing solely in sustainable energy sources for a cleaner future. With a total installed capacity of 297.2 MW across three wind and two solar power plants in Türkiye, Galata Wind produces 100% renewable energy and eliminates approximately 430,000 tons of carbon emissions annually. The Company aims to expand its renewable energy capacity to 1,000 MW by 2030. Through its carbon reduction certificates and innovative projects, Galata Wind plays a critical role in Türkiye's transition toward a low-carbon economy, as certified by leading international sustainability evaluation agencies.

K. Miscellaneous

K.1. Information on the Group companies' shares in the capital of the parent company:

The Group companies do not have any shares in the capital of the parent company.

K.2. Explanations regarding the Group's internal audit and risk management systems in relation to the preparation of the consolidated financial statements:

The consolidated financial statements of the Group have been prepared in accordance with the Communiqué Series II, No. 14.1 "Communiqué on the Principles of Financial Reporting in Capital Markets" ("the Communiqué") of the Capital Markets Board ("CMB"), published in the Official Gazette on June 13, 2013 under number 28676, and in accordance with the resolution of the CMB dated June 28, 2013. The consolidated financial statements have been prepared in accordance with the provisions of Communiqué no. 14.1 "Communiqué on the Principles of Financial Reporting in Capital Markets" ("the Communiqué") and the CMB's resolution of December 28, 2023 on the application of inflation accounting. The consolidated financial statements have been prepared in accordance with the formats specified in the "Announcement on the TFRS Taxonomy" published by the POA on July 03, 2024 and in the examples of financial statements and user manual published by the CMB.

K.3. Information on the reports required as per Article 199 of the TCC:

The interim report and the compliance report of the Company are prepared in accordance with the provisions of the Turkish Commercial Code. Members of the Board of Directors did not have any requests as per Article 199/4 of the TCC.

K.4. Related party transactions:

Legal entities, including the direct or indirect affiliates of Galata Wind, "partnerships subject to joint management," natural person and legal entity shareholders with sole or joint management control, their close family members (up to the second degree), and legal entities directly or indirectly controlled by them, either individually or jointly and/or legal entities wherein they have significant influence and/or are employed in key executive positions, the Company's subsidiaries and their Board members, key executives, and their close family members (up to the second degree) and legal entities who are directly or indirectly controlled by them, individually or jointly, are considered related parties. Transactions with related parties are provided under Note 18 - Related Party Disclosures of the consolidated financial statements for the interim accounting period ending on March 31, 2025.

K.5. Information on shareholders with management control, Board members, senior executives, and their spouses and blood relatives up to the second degree being involved in materially significant transactions that may cause a conflict of interest with the Company or its subsidiaries and/or performing a business transaction in the same type of commercial activities as the Company or its subsidiaries either on their own behalf or on behalf of someone else or joining another company engaged in the same type of commercial activities as a partner with unlimited responsibility:

Shareholders with management control, Board members, senior executives and their spouses and blood relatives up to the second degree have not been involved in any materially significant transactions that may cause a conflict of interest with the Company or its subsidiaries. They have not performed a business transaction in the same type of commercial activities as the Company or its subsidiaries on their own behalf or on behalf of someone else nor joined another company engaged in same type of commercial activities as a partner with unlimited responsibilities.

K.6. If the ratio of the Company's shares in the capital of a direct or indirect subsidiary, in which we hold five, ten, twenty, twenty-five, thirty-three, fifty, sixty-seven or one hundred percent of the shares, fell below or exceeded the specified ratios, the nature of and reasons for such an occurrence:

None.

K.7. Miscellaneous:

The Company is included in the following indices:

BIST BALIKESIR / BIST SERVICES / BIST ALL SHARES-100 / BIST ELECTRICITY BIST SUSTAINABILITY PARTICIPATION / BIST STARS / BIST DIVIDEND / BIST PARTICIPATION 50 / BIST SUSTAINABILITY / BIST PARTICIPATION DIVIDEND / BIST PARTICIPATION 100 / BIST ALL SHARES / BIST 500 / BIST PARTICIPATION ALL SHARES / BIST CORPORATE GOVERNANCE

Galata Wind has been traded on BIST STAR since April 22, 2021.

L. Declaration of Responsibility
