To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments excluding sovereign bonds*

Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not Applicable

What was the share of socially sustainable investments?

Not Applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.5% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to the appointed sub-investment manager.

Company engagements are aligned with ESG topics that are integrated into the investment process as signals - climate action, corporate culture and corporate behaviour. These signals are implemented for the purpose of enhancing risk-adjusted returns:

Climate Action — Engagements cover company disclosures on climate change risks, including TCFD disclosures, and board-level oversight of climate risk and overall climate strategy. Adoption of company-wide emissions reduction goals, via the Science Based Targets initiative (SBTi), is assessed. These steps cover metrics included in the carbon adjustment of intrinsic value factor.

Corporate Culture — Engagements cover company compliance with the U.N.'s Guiding Principles on Business and Human Rights. Adherence to International Labour Standards for procurement, implementation of controls to prevent modern slavery throughout supply chains, and monitoring of subcontractors with respect to labour rights and health and safety are assessed.

Corporate Behaviour — Engagements focus on shareholder rights, which is an essential component of companies' long-term success. These efforts cover the promotion of management transparency, board independence, and management responsiveness to financially material stakeholder concerns.

Investment Strategy: As part of the selection and continued monitoring of the appointed sub-investment manager, the Investment Manager completed initial and ongoing diligence of underlying fund exposures. Carbon emissions and intensity metrics were taken into account by the sub-investment managers when making asset allocation changes with the aim of ensuring that investment decisions were made in line with the binding commitment of carbon reduction.

The Investment Manager implemented the strategy through delegating investment management activities to an appointed third party sub-investment manager. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment manager throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment managers.

**How did this financial product perform compared to the reference benchmark?**

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Acadian Global Managed Volatility Equity II

Legal entity identifier:
54930057KQ8DRC8JVB46

Environmental and/or social characteristics**Did this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

☒ ☐ ☒ **No**

☐ It made **sustainable investments with an environmental objective**: __%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: __%

☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to avoid investing in companies that own fossil fuel reserves. This is being monitored by screening out companies flagged as having evidence of owning fossil fuel reserves in MSCI's Carbon Metrics data feed as well as through the Sub-Investment Manager's own research on companies that are not covered by MSCI. Additionally, issuers with large carbon emissions, measured by the Carbon Underground 200 index, will be excluded. The Carbon Underground 200 index identifies the top 100 public coal companies globally and the top 100 public oil and gas companies globally, ranked by the potential carbon emissions content of their proven reserves.

The Sub-Fund portfolio will also be managed with the aim that:

- a) The weighted average Carbon Emissions of the Fund will be at least 25% lower than the weighted average Carbon Emissions of the MSCI World Index ("the Index").
- b) The Carbon Intensity of the Sub-Fund will be no more than 80% of the Carbon Intensity of the Index at the 31 December 2020 (the "Base Date"). This calculation is based on the latest available data i.e. the scope 1 and scope 2 emissions numbers that are uploaded into the Sub-Investment Manager's systematic analytical model and are monitored on a daily basis.

"Carbon Emissions" means (a) scope 1 emissions being direct carbon emissions of a company from owned and controlled sources and (b) scope 2 emissions being indirect carbon emissions of a company from the generation of purchased energy.

"Carbon Intensity" means the weighted average carbon intensity calculated as metric tons of Carbon Emissions divided by the company's revenue (USD).

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Certain companies in the energy sector are excluded as follows:

- a) for electricity generators, companies that generate: (i) more than 10% of electricity from thermal coal; or (ii) more than 30% of electricity from other fossil fuels; or (iii) more than 30% of electricity from nuclear sources; and are companies with the "worst in class" Carbon Emissions scores in the energy sector.
- b) in the conventional oil and gas industry, companies that have: (i) more than 10% of their revenue from conventional oil and gas extraction; and (ii) are companies with the "worst in class" Carbon Emission scores in the energy sector.
- c) in the thermal coal and unconventional oil and gas sector, companies that generate either: (i) more than 5% of their revenue from thermal coal extraction; or (ii) more than 5% of their revenue from unconventional oil and gas extraction.

When considering if a company is "worst in class" Carbon Emission scores based on the Sub Investment Manager's rating of each company are used. The rating is provided by the Sub Investment Manager based on analysis of its own data and that of third parties. The analysis will consider a company's carbon emissions performance as well as forward looking measures such as emission reduction targets and actions taken to meet these targets. Companies identified in (a)-(c) that are considered to be making efforts towards a climate transition using ratings from providers such as the Transition Pathway Initiative are allowed into the investment universe.

Additionally, the Sub-Fund will be decarbonising using a systematic approach towards net zero. This involves an annual decarbonisation pathway towards net zero by 2050.

The Sub-Fund's social characteristics are to avoid investing in companies involved in the manufacture and/or production of tobacco products or inhumane weapons (which includes cluster munitions, anti-personnel landmines, biochemical and nuclear weapon systems).

The Investment Manager measured the attainment of the environmental and social characteristics by measuring that:

- The Sub-Fund maintains its weighted average Carbon Emissions target relative to the Index.
- The Sub-Fund maintains its Carbon Intensity target relative to the Index as at the Base Date.
- The Sub-Fund maintains its progress towards its net zero Carbon Intensity target.
- The Sub-Fund has no exposure to companies excluded based on the environmental and social screens described above.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

The Sub-Funds Weighted Average Carbon Emissions as at June 2025 and the Weighted Average Carbon Emissions of the Index as is set out below.

The Sub-Funds Weighted Average Carbon Intensity ("WACI") as at June 2025 and the WACI of the Index as at the Base Date is set out below. Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

	Acadian Global Managed Volatility Equity II	MSCI World Index
WACI (scope 1 AND 2 emissions tCO ₂ per M Revenue)	60	139
Weighted Average Carbon Emissions in metric tonnes of Co ₂	2,256,521	4,730,720

...and compared to previous periods?

	Acadian Global Managed Volatility Equity II	MSCI World Index
WACI (scope 1 AND 2 emissions tCO ₂ per M Revenue)	64	139
Weighted Average Carbon Emissions in metric tonnes of Co ₂	1,800,126	5,365,989

The Sub-Funds Weighted Average Carbon Emissions as at June 2024 and the Weighted Average Carbon Emissions of the Index as at the Base Date is set out above.

The Sub-Funds Weighted Average Carbon Intensity ("WACI") as at June 2024 and the WACI of the Index as at the Base Date is set out above.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

Not Applicable

- *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

Not Applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not Applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not Applicable

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.

Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	725	tCO2	91
Scope 2 GHG emissions	387	tCO2	91
Scope 3 GHG emissions	8654	tCO2	91
Total GHG emissions	9766	tCO2	91
Carbon footprint	229.8	tCO2 per M invested	91
GHG intensity of investee companies	443.5	tCO2	93
Exposure to companies active in the fossil fuel sector	5.8	Percentage	94
Share of non-renewable energy consumption and production	64.7	Percentage	90
Energy consumption intensity per high impact climate sector	20	GwH per million EUR invested	22
Activities negatively affecting biodiversity-sensitive areas	14.3	Percentage	89
Emissions to water	0	Tonnes per million EUR invested	90
Hazardous waste and radioactive waste ratio	0.2	Tonnes per million EUR invested	89
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0	Percentage	93
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	1.1	Percentage	91
Unadjusted gender pay gap	14.8	Percentage	86
Board gender diversity	36.5	Percentage	91
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0	Percentage	0
GHG intensity of investee countries		tCO2	0
Investee countries subject to social violations (absolute)		Percentage	0
Investee countries subject to social violations (relative)		Percentage	0
Investments in companies without carbon emission reduction initiatives	30.3	Percentage	91
Lack of a human rights policy	5.4	Percentage	91
Average income inequality score	0	Ratio	0

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What were the top investments of this financial product?

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

Please see the information below in this respect.

What was the asset allocation?

99.6% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The remaining 0.4% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● *In which economic sectors were the investments made?*

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets

Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not Applicable

What was the share of socially sustainable investments?

Not Applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.4% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to the appointed sub-investment manager.

Company engagements are aligned with ESG topics that are integrated into the investment process as signals - climate action, corporate culture and corporate behaviour. These signals are implemented for the purpose of enhancing risk-adjusted returns:

Climate Action — Engagements cover company disclosures on climate change risks, including TCFD disclosures, and board-level oversight of climate risk and overall climate strategy. Adoption of company-wide emissions reduction goals, via the Science Based Targets initiative (SBTi), is assessed. These steps cover metrics included in the carbon adjustment of intrinsic value factor.

Corporate Culture — Engagements cover company compliance with the U.N.'s Guiding Principles on Business and Human Rights. Adherence to International Labour Standards for procurement, implementation of controls to prevent modern slavery throughout supply chains, and monitoring of subcontractors with respect to labour rights and health and safety are assessed.

Corporate Behaviour — Engagements focus on shareholder rights, which is an essential component of companies' long-term success. These efforts cover the promotion of management transparency, board independence, and management responsiveness to financially material stakeholder concerns.

Investment Strategy: As part of the selection and continued monitoring of the appointed sub-investment manager, the Investment Manager completed initial and ongoing diligence of underlying fund exposures. Carbon emissions and intensity metrics were taken into account by the sub-investment managers when making asset allocation changes with the aim of ensuring that investment decisions were made in line with the binding commitment of carbon reduction.

The Investment Manager implemented the strategy through delegating investment management activities to an appointed third party sub-investment manager. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment manager throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment managers.

**How did this financial product perform compared to the reference benchmark?**

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics**Did this financial product have a sustainable investment objective?**☒ ☒ ☐ Yes☒ ☐ ☒ No☐ It made **sustainable investments with an environmental objective**: __%☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy☐ It made **sustainable investments with a social objective**: __%☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 72.3% of sustainable investments☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy☒ with a social objective☐ It promoted E/S characteristics, but **did not make any sustainable investments****Sustainability**

indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to avoid investing in companies with more than 1% of revenue generated from thermal coal extraction, arctic drilling or oil tar sand mining. The Sub-Fund's social characteristics are to avoid investing in companies involved in the manufacture, distribution or sales of controversial weapons and companies manufacturing tobacco products or generating more than 50% of their revenue from tobacco distribution or sales.

The Sub-Fund seeks to achieve its environmental and social characteristics by investing at least 85% of its Net Asset Value in units of the Mercer Passive Fundamental Index Global Equity UCITS CCF, a passively managed sub-fund of Mercer UCITS Common Contractual Fund (the "Underlying Fund").

The Underlying Fund invests in the component securities of the Benchmark Index which applies a negative environmental and social screen in line with the environmental and social characteristics of the Sub-Fund.

The Underlying Fund makes a minimum commitment to sustainable investments of 20%.

The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the extent to which the Underlying Fund tracked the benchmark
- assessing if the Underlying Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

 How did the sustainability indicators perform?

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

The Underlying Fund was invested in line with the MSCI World Diversified Multiple 3-Factor Select Index (the "Benchmark Index"), which it used as its reference benchmark. In this regard, the tracking error of the Underlying Fund versus the Benchmark Index over the reference period was 0.37%.

The exposure of the Underlying Fund, and by comparison the Benchmark Index, at each rebalancing date over the reference period to companies excluded by the environmental and social screens is set out under "How did this financial product perform compared with the reference benchmark?"

The Underlying Fund had no exposure to companies which the Investment Manager determined were UNGC violators with no/low remediation potential.

The Investment Manager assessed the Benchmark Index of the Underlying Fund versus the MSCI World Index (the "Parent Index") to ensure the Benchmark Index remains aligned with the environmental and social characteristics promoted by the Underlying Fund. In this regard the impact of the screens listed above on the Benchmark Index relative to the Parent Index is set out under "How did this financial product perform compared with the reference benchmark?"

The Sub-Fund met its minimum commitment to sustainable investments throughout the applicable reference period. The level of sustainable investments in the portfolio as a quarterly average over the reporting period can be found below.

Level of Sustainable Investment
72.3%

● ***...and compared to previous periods?***

Level of Sustainable Investment
67.8%

The level of sustainable investments in the portfolio as at June 2024 can be found in the table above. The tracking error of the Fund over the previous reference period was 0.20%.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the "do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance. Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**How did this financial product consider principal adverse impacts on sustainability factors?**

Where a Principal Adverse Impact (PAI) is integrated into investment considerations at the Underlying Fund level, engagement, exclusion from the index constituents, or management of the portfolio (via tracking the Benchmark Index) is completed with due consideration to reducing the negative impact of that indicator. Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	856.2	tCO2	88
Scope 2 GHG emissions	150.1	tCO2	88
Scope 3 GHG emissions	5949.7	tCO2	88
Total GHG emissions	6956	tCO2	88
Carbon footprint	389.2	tCO2 per M invested	88
GHG intensity of investee companies	749.7	tCO2	88
Exposure to companies active in the fossil fuel sector	5.9	Percentage	88
Share of non-renewable energy consumption and production	56.9	Percentage	88
Energy consumption intensity per high impact climate sector	19.9	GwH per million EUR invested	18
Activities negatively affecting biodiversity-sensitive areas	4.8	Percentage	88
Emissions to water	0	Tonnes per million EUR invested	88
Hazardous waste and radioactive waste ratio	0.3	Tonnes per million EUR invested	86
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.1	Percentage	88
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	0.1	Percentage	88
Unadjusted gender pay gap	15.4	Percentage	76
Board gender diversity	35.4	Percentage	88
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0	Percentage	0
GHG intensity of investee countries		tCO2	0
Investee countries subject to social violations (absolute)		Percentage	0
Investee countries subject to social violations (relative)		Percentage	0
Investments in companies without carbon emission reduction initiatives	32.2	Percentage	88
Lack of a human rights policy	5.5	Percentage	88
Average income inequality score	0	Ratio	0

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**Asset**

allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

Please see the information below in this respect.

● **What was the asset allocation?**

99.7% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 72.3% in sustainable investments.

The remaining 0.2% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● ***In which economic sectors were the investments made?***

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Communication Services	Media & Entertainment	11.70%
Information Technology	Technology Hardware & Equipmen	11.41%
Financials	Insurance	9.72%
Information Technology	Software & Services	7.99%
Financials	Financial Services	6.63%
Information Technology	Semiconductors & Semiconductor	6.28%
Financials	Banks	5.52%
Industrials	Capital Goods	5.18%
Health Care	Health Care Equipment & Servic	5.10%
Health Care	Pharmaceuticals Biotechnology	3.77%

Consumer Discretionary	Consumer Durables & Apparel	1.24%
Real Estate	Real Estate Management & Devel	0.97%
Energy	Energy	0.93%
Real Estate	Equity Real Estate Investment	0.48%
Consumer Discretionary	Consumer Services	0.38%
Consumer Staples	Food Beverage & Tobacco	0.14%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

■ Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

■ Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

■ Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

■ Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments excluding sovereign bonds*

■ Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

■ Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

■ Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

■ Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Sub-Fund had 72.3% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

**What was the share of socially sustainable investments?**

The Sub-Fund had 72.3% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The 0.2% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of some, or all of, the following mechanisms and guiding principles in order to ensure that the environmental and social characteristics promoted by the Underlying were met:

Investment Strategy: The Underlying Fund tracked the Benchmark Index and thus, met the environment and social characteristics incorporated in benchmark index methodology as outlined in the above section 'To what extent were the environmental and/or social characteristics of the Fund met?'

Engagement: The Investment Manager's engagement framework has identified priority areas for engagement which are communicated to the appointed sub-investment manager of the Underlying Fund. The Investment Manager also screens and monitors listed portfolios for high-severity ESG-related risks as flagged according to the UNGC principles that relate to human rights, labour, environment and corruption issues. The securities identified through the screen are deemed an engagement priority for Sub-Investment Managers. Stewardship activities were also monitored via an annual Manager Engagement Survey.

The Investment Manager applied oversight to the activities of the Underlying Fund throughout the reporting period to ensure that the investment processes were implemented on a continuous basis and also effectively monitored the Sub-Fund on an ongoing basis using the sustainability indicators. Oversight of the investment strategy was applied on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment manager.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**Reference**

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?● **How does the reference benchmark differ from a broad market index?**

The Benchmark Index of the Underlying Fund, based on the methodology and assessment of the index provider, applies a negative screen to the overall constituents of the MSCI World Index or "Parent Index", to exclude at each rebalancing date those companies which:

- (i) are involved in the manufacture, distribution or sales of controversial weapons such as landmines, cluster munitions, chemical and biological weapons, nuclear weapons and (semi) automatic civilian firearms; or
- (ii) manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales; or
- (iii) generate more than 1% of their revenue from thermal coal extraction, arctic drilling or oil tar sand mining.

Further details regarding the methodology of the Benchmark Index (including its constituents) are available on the index provider's website at <https://www.msci.com/index-methodology>.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

The Sub-Fund seeks to achieve its environmental and social characteristics by investing at least 85% of its Net Asset Value in units of the Underlying Fund. The Underlying Fund achieved the environmental and social characteristics it promotes through using an index-tracking strategy, where it invested in the constituent securities represented within the Benchmark Index.

● **How did this financial product perform compared with the reference benchmark?**

Please see below. The table represents the Underlying Fund and Reference Benchmark as at the reporting date.

	Sub-Fund	Reference Benchmark
% market value exposure excluded based on screens	0%	0%

● **How did this financial product perform compared with the broad market index?**

Please see below. The table represents the Underlying Fund and Broad Market Index (MSCI World Index) as at the reporting date.

	Sub-Fund	Broad Market Index
% market value exposure excluded based on screens	0%	5.66%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Acadian European Small Cap Equity

Legal entity identifier:
254900GRFH07YIHNG930

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective**: __%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: __%

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 31.3% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to manage the portfolio such that

- (a) the weighted average Carbon Emissions of the Sub-Fund will be no greater than the weighted average Carbon Emissions of the MSCI Europe Small Cap Equity Index ("the Index"); and
- (b) the Carbon Intensity of the Sub-Fund will be at least 20% lower than the Carbon Intensity of the Index.

This calculation is based on the scope 1 and scope 2 emissions numbers that are uploaded into the Sub-Investment Manager's systematic analytical model.

"Carbon Emissions" means (a) scope 1 emissions being direct carbon emissions of a company from owned and controlled sources and (b) scope 2 emissions being indirect carbon emissions of a company from the generation of purchased energy.

"Carbon Intensity" means the weighted average carbon intensity calculated as metric tons of Carbon Emissions divided by the company's revenue (USD).

Environmental Product-Based Exclusions: The following environmental product-based exclusions are applied:

Thermal Coal Exclusion Companies that derive >5% revenue from thermal coal extraction as identified via third party data Fossil Fuel Laggards.

Additionally fossil fuel companies deemed to be climate transition laggards are excluded as follows: The

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Sub-Investment Manager employs a two-step process to classify a company as a climate transition laggard. Any companies that derive: (a) >10% revenue from the extraction and production of oil and gas (as identified via third party data); or (b) >10% revenue from power generation associated with fossil fuels (thermal coal, liquid fuel and natural gas) as identified via third party data; are identified in the first step.

In a second step, those companies (identified in the first step) that appear unable or unwilling to transition to the low carbon economy are excluded. To identify companies that appear unable or unwilling to transition to the low carbon economy the Sub-Investment Manager employs a proprietary classification model. This model categorizes companies as climate leaders and climate transition laggards.

Companies showing strong evidence of transitioning towards the low carbon economy are classified climate transition leaders. A company is allowed back into the investment universe for the Sub-Fund if it is classified as a climate transition leader. These climate transition leaders typically exhibit at least one of the following characteristics: a committed/approved science-based target, a strong ability to manage carbon risks, an announced decarbonization target together with carbon intensity below its sector peer group, and/or revenue derived from alternative energy. Conversely companies not displaying any of the above characteristics are categorized as climate transition laggards, and excluded during this second step. The Sub-Investment Manager's classification model uses proprietary techniques and third-party data.

The Sub-Fund's social characteristics are to avoid investing in companies involved in the manufacture and/or production: (a) of tobacco products as defined by MSCI; or (b) controversial weapons (which includes cluster munitions, anti-personnel landmines, biochemical and nuclear weapon systems) as defined by MSCI. The Sub-Fund will also avoid investing in companies perceived to violate the UNGC principles, as assessed by MSCI and Sustainalytics.

The Sub-Fund will also not invest more than the Index (in aggregate) in companies that are considered laggards according to their exposure to ESG risks and how they manage these risks relative to their peers or those involved one or more severe controversies as assessed by MSCI. Lastly, the Sub-Fund will not invest in companies listed on the Norges Bank exclusion list. This exclusion list excludes companies either by product-based exclusions or conduct based exclusions. For example, in the product-based exclusions, companies that produce cannabis for recreational use are excluded. In relation to the conduct-based exclusions, any companies where this is an unacceptable risk of them contributing to or being responsible for fundamental ethical norms. Further details of which companies are excluded as well as the most recent list of excluded companies can be found at: Ethical exclusions overview | Norges Bank Investment Management (nbim.no).

The Sub-Fund invests above Index weights in sustainable issuers (based upon their net positive revenue as measured via a UN SDG based framework) in aggregate by investing in securities such that:

- (a) the weight of sustainable investments in the Sub-Fund will be at least 1.1 times the weight of sustainable investments in the Index; and
- (b) the weight of sustainable investments in the Sub-Fund on an absolute basis will be at least 20%.

The Investment Manager measured the attainment of the environmental and social characteristics by measuring that:

- The Sub-Fund maintains its weighted average Carbon Emissions and its Carbon Intensity targets relative to the Index.
- The Sub-Fund maintains its sustainable investment commitments relative to index
- The Sub-Fund has no exposure to companies excluded based on the environmental and social screens described above.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

The Sub-Funds Weighted Average Carbon Emissions as at June 2025 and the Weighted Average Carbon Emissions of the Index is set out below.

The Sub-Funds Weighted Average Carbon Intensity ("WACI") as at June 2025 and the WACI of the Index is set out below.

The Sub-Funds sustainable investment levels and that of the index are shown below.

Throughout the reporting period, any securities within the portfolio that did not meet the exclusion criteria were identified and divested from. Divestment, where required, was undertaken in line with the Investment Manager's exclusions framework and within a reasonable time to allow for an orderly exit. As such, the Sub-Fund held excluded exposures pending completion of divestment. As of the reporting date, the Sub-Fund does not have exposure to any such securities.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

	Acadian European Small Cap Equity	MSCI Europe Small Cap Equity Index
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	46	116
Weighted Average Carbon Emissions in metric tonnes of Co2	455,592	490,930
Level of Sustainable Investment	31.3%	26.5%

...and compared to previous periods?

	Acadian European Small Cap Equity	MSCI Europe Small Cap Equity Index
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	81	116
Weighted Average Carbon Emissions in metric tonnes of Co2	414,042	461,579

Please see above the carbon intensity and carbon emissions of the Sub-fund and the Index as at 30 June 2024 . The Sub-Fund did not make a sustainable investments commitment as at June 2024.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (such as water use, clean energy, climate action) and social objectives (such as alleviation of poverty and hunger, good health and wellbeing, promotion of education, gender equality). Contribution to these objectives is measured via an issuer's revenue alignment to UN SDGs (United Nations Sustainable Development Goals) (where revenue-based measurement of UN SDGs is possible).

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the "do no significant harm" principle.

The Sub-Investment Manager uses the Norges Bank exclusion list criteria to set thresholds for PAI Indicators, where applicable (for example PAI 1-3, 4, 10, 14). Any investment which is determined as breaching the thresholds will not be considered a sustainable investment. The use of the Norges Bank exclusions criteria is considered a useful proxy for taking account of the PAI Indicators as it includes product-based exclusion criteria (i.e. unacceptable greenhouse gas emissions, weapons, tobacco, cannabis, coal) and conduct-based exclusion criteria (i.e. violations of fundamental ethical norms) which align with applicable PAI Indicators.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The norms-based exclusions applied by the Sub-Fund, including the exclusion on companies deemed to be in violation of UNGC principles and the Norges list exclusions, resulted in any potential sustainable investments being aligned with these principles and guidelines.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**How did this financial product consider principal adverse impacts on sustainability factors?**

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.

Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	3217.6	tCO2	92
Scope 2 GHG emissions	521.2	tCO2	92
Scope 3 GHG emissions	33046.4	tCO2	92
Total GHG emissions	36782	tCO2	92
Carbon footprint	688.1	tCO2 per M invested	92
GHG intensity of investee companies	627.9	tCO2	94
Exposure to companies active in the fossil fuel sector	4.8	Percentage	94
Share of non-renewable energy consumption and production	71.5	Percentage	91

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

Please see the information below in this respect.

What was the asset allocation?

99.42% of the Sub-Fund’s assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 31.3% in sustainable investments. The remaining 0.58% of the Sub-Fund’s assets are in other investments (“#2 Other”), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund. The negative allocation is due to unsettled transactions.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● *In which economic sectors were the investments made?*

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Industrials	Capital Goods	18.65%
Financials	Financial Services	12.09%
Information Technology	Software & Services	7.83%
Communication Services	Media & Entertainment	7.43%

Consumer Staples	Consumer Staples Distribution	0.06%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

■ Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

■ Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

■ Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

■ Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments excluding sovereign bonds*

■ Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

■ Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

■ Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

■ Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

 What was the share of investments made in transitional and enabling activities?

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

 How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund had 31.3% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What was the share of socially sustainable investments?

The Sub-Fund had 31.3% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 0.58% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to the appointed sub-investment manager.

Company engagements are aligned with ESG topics that are integrated into the investment process as signals - climate action, corporate culture and corporate behaviour. These signals are implemented for the purpose of enhancing risk-adjusted returns:

Climate Action — Engagements cover company disclosures on climate change risks, including TCFD disclosures, and board-level oversight of climate risk and overall climate strategy. Adoption of company-wide emissions reduction goals, via the Science Based Targets initiative (SBTi), is assessed. These steps cover metrics included in the carbon adjustment of intrinsic value factor.

Corporate Culture — Engagements cover company compliance with the U.N.'s Guiding Principles on Business and Human Rights. Adherence to International Labour Standards for procurement, implementation of controls to prevent modern slavery throughout supply chains, and monitoring of subcontractors with respect to labour rights and health and safety are assessed.

Corporate Behaviour — Engagements focus on shareholder rights, which is an essential component of companies' long-term success. These efforts cover the promotion of management transparency, board independence, and management responsiveness to financially material stakeholder concerns.

Investment Strategy: As part of the selection and continued monitoring of the appointed sub-investment manager, the Investment Manager completed initial and ongoing diligence of underlying fund exposures. Carbon emissions and intensity metrics were taken into account by the sub-investment managers when making asset allocation changes with the aim of ensuring that investment decisions were made in line with the binding commitment of carbon reduction.

The Investment Manager implemented the strategy through delegating investment management activities to an appointed third party sub-investment manager. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment manager throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment managers.

**How did this financial product perform compared to the reference benchmark?**

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name:
Acadian Global High Yield Bond Fund

Legal entity identifier:
254900TSCSPKT01BS261

Environmental and/or social characteristics**Did this financial product have a sustainable investment objective?**

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective**: __%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: __%

☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to manage the portfolio such that

- (a) the weighted average Carbon Emissions of the Sub-Fund will be no greater than the weighted average Carbon Emissions of the ICE BofA Developed Markets High Yield Index Hedged (USD) ("the Index"); and
- (b) the Carbon Intensity of the Sub-Fund will be at least 20% lower than the Carbon Intensity of the Index.

This calculation is based on the scope 1 and scope 2 emissions numbers that are uploaded into the Sub-Investment Manager's systematic analytical model and are monitored on a daily basis.

"Carbon Emissions" means (a) scope 1 emissions being direct carbon emissions of a company from owned and controlled sources and (b) scope 2 emissions being indirect carbon emissions of a company from the generation of purchased energy.

"Carbon Intensity" means the weighted average carbon intensity calculated as metric tons of Carbon Emissions divided by the company's revenue (USD).

Environmental Product-Based Exclusions: The following environmental product-based exclusions are applied:

Thermal Coal Exclusion Companies that derive >5% revenue from thermal coal extraction as identified via third party data Fossil Fuel Laggards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Additionally fossil fuel companies deemed to be climate transition laggards are excluded as follows: The Sub-Investment Manager employs a two-step process to classify a company as a climate transition laggard. Any companies that derive: (a) >10% revenue from the extraction and production of oil and gas (as identified via third party data); or (b) >10% revenue from power generation associated with fossil fuels (thermal coal, liquid fuel and natural gas) as identified via third party data; are identified in the first step.

In a second step, those companies (identified in the first step) that appear unable or unwilling to transition to the low carbon economy are excluded. To identify companies that appear unable or unwilling to transition to the low carbon economy the Sub-Investment Manager employs a proprietary classification model. This model categorizes companies as climate leaders and climate transition laggards.

Companies showing strong evidence of transitioning towards the low carbon economy are classified climate transition leaders. A company is allowed back into the investment universe for the Sub-Fund if it is classified as a climate transition leader. These climate transition leaders typically exhibit at least one of the following characteristics: a committed/approved science-based target, a strong ability to manage carbon risks, an announced decarbonization target together with carbon intensity below its sector peer group, and/or revenue derived from alternative energy. Conversely companies not displaying any of the above characteristics are categorized as climate transition laggards, and excluded during this second step. The Sub-Investment Manager's classification model uses proprietary techniques and third-party data.

The Sub-Fund's social characteristics are to avoid investing in companies involved in the manufacture and/or production: (a) of tobacco products as defined by MSCI; or (b) controversial weapons (which includes cluster munitions, anti-personnel landmines, biochemical and nuclear weapon systems) as defined by MSCI. The Sub-Fund will also avoid investing in companies perceived to violate the UNGC principles, as assessed by MSCI and Sustainalytics.

The Sub-Fund will also not invest more than the Index (in aggregate) in companies that are considered laggards according to their exposure to ESG risks and how they manage these risks relative to their peers or those involved one or more severe controversies as assessed by MSCI. Lastly, the Sub-Fund will not invest in companies listed on the Norges Bank exclusion list. This exclusion list excludes companies either by product-based exclusions or conduct based exclusions. For example, in the product-based exclusions, companies that produce cannabis for recreational use are excluded. In relation to the conduct-based exclusions, any companies where this an unacceptable risk of them contributing to or being responsible for fundamental ethical norms. Further details of which companies are excluded as well as the most recent list of excluded companies can be found at: Ethical exclusions overview | Norges Bank Investment Management (nbim.no).

The Investment Manager measured the attainment of the environmental and social characteristics by measuring that:

- The Sub-Fund maintains its weighted average Carbon Emissions and its Carbon Intensity targets relative to the Index.
- The Sub-Fund has no exposure to companies excluded based on the environmental and social screens described above.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

● How did the sustainability indicators perform?

The Sub-Funds Weighted Average Carbon Emissions as at June 2025 and the Weighted Average Carbon Emissions of the Index is set out below.

The Sub-Funds Weighted Average Carbon Intensity ("WACI") as at June 2025 and the WACI of the Index is set out below.

Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

	Acadian Global High Yield Bond Fund	ICE BofA Developed Markets High Yield Index Hedged
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	150	227
Weighted Average Carbon Emissions in metric tonnes of Co2	1,259,608	2,335,208

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● ...and compared to previous periods?

	Acadian Global High Yield Bond Fund	ICE BofA Developed Markets High Yield Index Hedged
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	162	227
Weighted Average Carbon Emissions in metric tonnes of Co2	1,055,305	2,698,278

The Sub-Funds Weighted Average Carbon Emissions as at June 2024 and the Weighted Average Carbon Emissions of the Index as at the Base Date is set out above.

The Sub-Funds Weighted Average Carbon Intensity ("WACI") as at June 2024 and the WACI of the Index as at the Base Date is set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not Applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not Applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not Applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not Applicable

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**How did this financial product consider principal adverse impacts on sustainability factors?**

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.

Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	1640.6	tCO2	62
Scope 2 GHG emissions	377.9	tCO2	62
Scope 3 GHG emissions	14240.5	tCO2	62
Total GHG emissions	16252.7	tCO2	62
Carbon footprint	805.8	tCO2 per M invested	62
GHG intensity of investee companies	970.7	tCO2	63
Exposure to companies active in the fossil fuel sector	8.7	Percentage	65
Share of non-renewable energy consumption and production	83.6	Percentage	62
Energy consumption intensity per high impact climate sector	7.2	GwH per million EUR invested	14
Activities negatively affecting biodiversity-sensitive areas	8.4	Percentage	61
Emissions to water	0	Tonnes per million EUR invested	62
Hazardous waste and radioactive waste ratio	24	Tonnes per million EUR invested	62
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.7	Percentage	67
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	2.5	Percentage	64

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments excluding sovereign bonds*

Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not Applicable

What was the share of socially sustainable investments?

Not Applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The -0.2% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards. The negative balance is due to unsettled transactions at the time of reporting.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental and social characteristics during the reference period:

Exclusions: The Investment Manager monitored the portfolio on an ongoing basis and ensured its exclusions framework was effectively applied (which covers activity-based exclusions and revenue-based exclusions of companies with material exposure to certain activities) in line with the exclusions promoted by this Sub-Fund and in line with the mitigating actions in the form of exclusions considered and applied as part of the PAI framework for the Sub-Fund. The application of the exclusions were monitored on a daily basis to ensure adherence based on available data and in line with the Investment Manager's exclusions framework.

Engagement: The Investment Managers' engagement framework identified priority areas for engagement which were communicated to the appointed sub-investment manager.

Company engagements are aligned with ESG topics that are integrated into the investment process as signals - climate action, corporate culture and corporate behaviour. These signals are implemented for the purpose of enhancing risk-adjusted returns:

Climate Action — Engagements cover company disclosures on climate change risks, including TCFD disclosures, and board-level oversight of climate risk and overall climate strategy. Adoption of company-wide emissions reduction goals, via the Science Based Targets initiative (SBTi), is assessed. These steps cover metrics included in the carbon adjustment of intrinsic value factor.

Corporate Culture — Engagements cover company compliance with the U.N.'s Guiding Principles on Business and Human Rights. Adherence to International Labour Standards for procurement, implementation of controls to prevent modern slavery throughout supply chains, and monitoring of subcontractors with respect to labour rights and health and safety are assessed.

Corporate Behaviour — Engagements focus on shareholder rights, which is an essential component of companies' long-term success. These efforts cover the promotion of management transparency, board independence, and management responsiveness to financially material stakeholder concerns.

Investment Strategy: As part of the selection and continued monitoring of the appointed sub-investment manager, the Investment Manager completed initial and ongoing diligence of underlying fund exposures. Carbon emissions and intensity metrics were taken into account by the sub-investment managers when making asset allocation changes with the aim of ensuring that investment decisions were made in line with the binding commitment of carbon reduction.

The Investment Manager implemented the strategy through delegating investment management activities to an appointed third party sub-investment manager. The Investment Manager applied its oversight to the Sub-Fund and activities of the sub-investment manager throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators. Oversight of the investment strategy was formally reviewed on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment managers.

**How did this financial product perform compared to the reference benchmark?**

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Mercer Long Term Growth Fund

Legal entity identifier:
254900D6V7E0U3SRUW82

Environmental and/or social characteristics**Did this financial product have a sustainable investment objective?**

☒ ☒ ☐ **Yes**

☒ ☐ ☒ **No**

☐ It made **sustainable investments with an environmental objective: ___%**

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective: ___%**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 59.7% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to seek to mitigate the impact of climate change through progressive decarbonisation within the Sub-Fund's portfolio. The Sub-Fund will seek to reduce carbon emissions with a view to achieving net zero carbon emissions by 2050, and with an expectation of a 6% annualised reduction with a view to achieving at least a 45% reduction from December 2019 levels by 2030, calculated relative to the size of the Sub-Fund. The Sub-Fund commits to making a minimum allocation to sustainable investments of 20%.

The Investment Manager measured the attainment of the environmental and social characteristics by

- assessing the Weighted Average Carbon Intensity ('WACI', defined as Scope 1 and 2 emissions tCo2/) of the fund and absolute carbon emissions relative to the size of the Sub-Fund ("Carbon Footprint", defined as Scope 1 and 2 emissions tCo2/\$ AUM) over the year to 30 June and since the baseline of end December 2019.
- assessing if the Sub-Fund met the minimum commitment to sustainable investments.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

How did the sustainability indicators perform?

The Sub-Funds WACI and Carbon Footprint is set out below, as at December 2019 (the baseline) and end of June 2025. Carbon footprint data is not available for December 2019.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

The Sub-fund met its minimum commitment to sustainable investments throughout the applicable reporting period. The quarterly average level of sustainable investments over the reporting period is set out below.

Date	Carbon Footprint
31/12/2019	N/A
30/06/2024	49

Date	WACI
31/12/2019	N/A
30/06/2024	112

Level of Sustainable Investment
60.4%

The Underlying Funds WACI as at June 2024, and the WACI of the Benchmark Index is shown above. The level of sustainable investments in the portfolio as at June 2024 can be found in the table above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (namely, climate change adaptation and/or climate change mitigation) or social objectives (namely, the protection and/or advancement of economic, social and civil rights). Positive contribution to these objectives was measured under the Investment Manager's sustainable investments framework which requires positive alignment with reference to one or more of the UN Sustainable Development Goals (SDGs). The Investment Manager's set and applied an internal threshold for each of the environmental and social SDGs at a target level considered appropriate and representative of a sufficiently positive contribution.

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the "do no significant harm" principle.

The Investment Manager has set an absolute threshold on PAIs 4,7,10 and 14, and relative thresholds on PAIs 2, 3, 6 and 13.

Any investment determined as breaching these thresholds was no longer considered a sustainable investment.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance. Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**How did this financial product consider principal adverse impacts on sustainability factors?**

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.

Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	92904.5	tCO2	37
Scope 2 GHG emissions	21867.9	tCO2	37
Scope 3 GHG emissions	672625	tCO2	37
Total GHG emissions	783910.5	tCO2	37
Carbon footprint	314.5	tCO2 per M invested	37
GHG intensity of investee companies	723.9	tCO2	36
Exposure to companies active in the fossil fuel sector	5.7	Percentage	37
Share of non-renewable energy consumption and production	61.7	Percentage	37
Energy consumption intensity per high impact climate sector	15.7	GwH per million EUR invested	9
Activities negatively affecting biodiversity-sensitive areas	6.8	Percentage	37
Emissions to water	0	Tonnes per million EUR invested	37
Hazardous waste and radioactive waste ratio	0.7	Tonnes per million EUR invested	35
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.1	Percentage	37
Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	0.6	Percentage	37
Unadjusted gender pay gap	14.6	Percentage	32
Board gender diversity	33.8	Percentage	37
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0	Percentage	0
GHG intensity of investee countries	672.9	tCO2	4
Investee countries subject to social violations (absolute)	4.5	Percentage	9
Investee countries subject to social violations (relative)	7.4	Percentage	9
Investments in companies without carbon emission reduction initiatives	41.9	Percentage	34
Lack of a human rights policy	6.4	Percentage	37
Average income inequality score	40.7	Ratio	3

**Asset**

allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

Please see the information below in this respect.

● **What was the asset allocation?**

98.1% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 59.7% in sustainable investments.

The remaining 1.9% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

■ Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

■ Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Sub-Fund had 59.7% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

● **What was the share of socially sustainable investments?**

The Sub-Fund had 59.7% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

● **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The 1.9% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to identification and analysis of PAIs, the Investment Manager utilised the following mechanisms and guiding principles in order to meet the Sub-Fund's environmental characteristics during the reference period:

Investment Strategy: As part of the selection and continued monitoring of investments in underlying funds, the Investment Manager completed initial and ongoing diligence of underlying fund exposures by appointed sub-investment managers to the underlying funds. Carbon emissions and intensity metrics were taken into account by the portfolio management team when making asset allocation changes with the aim of ensuring that investment decisions were made in line with the binding commitment of progressive decarbonisation.

The Investment Manager implemented the strategy through investing in underlying funds which delegate investment management activities to appointed third party sub-investment managers (directly or at underlying fund level). The Investment Manager applied its oversight to the underlying fund portfolios and activities of the sub-investment managers throughout the reference period to ensure that the investment processes were implemented effectively on a continuous basis in line with the Sub-Fund's binding commitments and monitored the Sub-Fund's portfolio exposures using the ongoing monitoring of the sustainability indicators.

**How did this financial product perform compared to the reference benchmark?**

There is no index designated as a referenced benchmark for the purpose of attaining the environmental or social characteristics promoted by this Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Acadian Emerging Market Enhanced Equity

Legal entity identifier:
25490083MNH80LIAUO30

Environmental and/or social characteristics**Did this financial product have a sustainable investment objective?**

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective**: __%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: __%

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 55.7% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund's environmental characteristics are to manage the portfolio such that

- (a) the weighted average Carbon Emissions of the Sub-Fund will be no greater than the weighted average Carbon Emissions of the MSCI Emerging Markets Index ("the Index"); and
- (b) the Carbon Intensity of the Sub-Fund will be at least 20% lower than the Carbon Intensity of the Index.

This calculation is based on the scope 1 and scope 2 emissions numbers that are uploaded into the Sub-Investment Manager's systematic analytical model.

"Carbon Emissions" means (a) scope 1 emissions being direct carbon emissions of a company from owned and controlled sources and (b) scope 2 emissions being indirect carbon emissions of a company from the generation of purchased energy.

"Carbon Intensity" means the weighted average carbon intensity calculated as metric tons of Carbon Emissions divided by the company's revenue (USD).

Environmental Product-Based Exclusions: The following environmental product-based exclusions are applied:

Thermal Coal Exclusion Companies that derive >5% revenue from thermal coal extraction as identified via third party data Fossil Fuel Laggards.

Additionally fossil fuel companies deemed to be climate transition laggards are excluded as follows: The

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Sub-Investment Manager employs a two-step process to classify a company as a climate transition laggard. Any companies that derive: (a) >10% revenue from the extraction and production of oil and gas (as identified via third party data); or (b) >10% revenue from power generation associated with fossil fuels (thermal coal, liquid fuel and natural gas) as identified via third party data; are identified in the first step.

In a second step, those companies (identified in the first step) that appear unable or unwilling to transition to the low carbon economy are excluded. To identify companies that appear unable or unwilling to transition to the low carbon economy the Sub-Investment Manager employs a proprietary classification model. This model categorizes companies as climate leaders and climate transition laggards.

Companies showing strong evidence of transitioning towards the low carbon economy are classified climate transition leaders. A company is allowed back into the investment universe for the Sub-Fund if it is classified as a climate transition leader. These climate transition leaders typically exhibit at least one of the following characteristics: a committed/approved science-based target, a strong ability to manage carbon risks, an announced decarbonization target together with carbon intensity below its sector peer group, and/or revenue derived from alternative energy. Conversely companies not displaying any of the above characteristics are categorized as climate transition laggards, and excluded during this second step. The Sub-Investment Manager's classification model uses proprietary techniques and third-party data.

The Sub-Fund's social characteristics are to avoid investing in companies involved in the manufacture and/or production: (a) of tobacco products as defined by MSCI; or (b) controversial weapons (which includes cluster munitions, anti-personnel landmines, biochemical and nuclear weapon systems) as defined by MSCI. The Sub-Fund will also avoid investing in companies perceived to violate the UNGC principles, as assessed by MSCI and Sustainability.

The Sub-Fund will also not invest more than the Index (in aggregate) in companies that are considered laggards according to their exposure to ESG risks and how they manage these risks relative to their peers or those involved one or more severe controversies as assessed by MSCI. Lastly, the Sub-Fund will not invest in companies listed on the Norges Bank exclusion list. This exclusion list excludes companies either by product-based exclusions or conduct based exclusions. For example, in the product-based exclusions, companies that produce cannabis for recreational use are excluded. In relation to the conduct-based exclusions, any companies where this an unacceptable risk of them contributing to or being responsible for fundamental ethical norms. Further details of which companies are excluded as well as the most recent list of excluded companies can be found at: Ethical exclusions overview | Norges Bank Investment Management (nbim.no).

The Investment Manager measured the attainment of the environmental and social characteristics by measuring that:

- The Sub-Fund maintains its weighted average Carbon Emissions and its Carbon Intensity targets relative to the Index.
- The Sub-Fund has no exposure to companies excluded based on the environmental and social screens described above.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

● **How did the sustainability indicators perform?**

The Sub-Funds Weighted Average Carbon Emissions as at June 2025 and the Weighted Average Carbon Emissions of the Index is set out below.

The Sub-Funds Weighted Average Carbon Intensity ("WACI") as at June 2025 and the WACI of the Index is set out below. Throughout the reporting period, the Sub-Fund had no exposure to companies not meeting the exclusionary criteria described above.

	Acadian Emerging Markets Enhanced Equity	MSCI Emerging Markets Index
WACI (scope 1 AND 2 emissions tCO2 per M Revenue)	133	285
Weighted Average Carbon Emissions in metric tonnes of Co2	4,083,078	8,129,339

Level of Sustainable Investment
55.7%

● **...and compared to previous periods?**

Not applicable. This is the first reporting period for this Sub-Fund.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Sub-Fund's sustainable investments aimed to make a positive contribution to environmental objectives (such as water use, clean energy, climate action) and social objectives (such as alleviation of poverty and hunger, good health and wellbeing, promotion of education, gender equality). Contribution to these objectives is measured via an issuer's revenue alignment to UN SDGs (United Nations Sustainable Development Goals) (where revenue-based measurement of UN SDGs is possible).

During the period, the Investment Manager assessed (with ongoing monitoring) that those investments deemed to be sustainable investments, had a positive alignment exceeding the internal threshold set to one or more of the SDGs.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager assessed the sustainable investments to ensure that each investment did no significant harm to any environmental or socially sustainable investment objective through a consideration and appropriate use of relevant principal adverse sustainability indicators ("PAI Indicators").

How were the indicators for adverse impacts on sustainability factors taken into account?

Each PAI Indicator has been individually assessed, and where relevant, an absolute threshold or a relative threshold was set to ensure that the investee company did not breach the "do no significant harm" principle.

The Sub-Investment Manager uses the Norges Bank exclusion list criteria to set thresholds for PAI Indicators, where applicable (for example PAI 1-3, 4, 10, 14). Any investment which is determined as breaching the thresholds will not be considered a sustainable investment. The use of the Norges Bank exclusions criteria is considered a useful proxy for taking account of the PAI Indicators as it includes product-based exclusion criteria (i.e. unacceptable greenhouse gas emissions, weapons, tobacco, cannabis, coal) and conduct-based exclusion criteria (i.e. violations of fundamental ethical norms) which align with applicable PAI Indicators.

For certain PAI Indicators, the Investment Manager has determined that setting a threshold is not appropriate to determine that the investment does not cause significant harm. For example, certain PAI Indicators have inferior levels of data coverage and availability which can undermine the value or integrity of the given PAI Indicator. This can arise where data for a PAI Indicator is based on voluntary and non-standardised reporting by investee companies, or where the methodologies employed by investee companies are not comparable or available.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The norms-based exclusions applied by the Sub-Fund, including the exclusion on companies deemed to be in violation of UNGC principles and the Norges list exclusions, resulted in any potential sustainable investments being aligned with these principles and guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**How did this financial product consider principal adverse impacts on sustainability factors?**

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.

Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	3861.3	tCO2	85
Scope 2 GHG emissions	2498.8	tCO2	85
Scope 3 GHG emissions	27150.3	tCO2	85
Total GHG emissions	33510.4	tCO2	85
Carbon footprint	461.8	tCO2 per M invested	85
GHG intensity of investee companies	736.7	tCO2	85

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

Please see the information below in this respect.

What was the asset allocation?

99.8% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund. The Sub-Fund invested 55.7% in sustainable investments. The remaining 0.2% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation and minimum sustainable investment commitment at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● *In which economic sectors were the investments made?*

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets

Consumer Staples	Household & Personal Products	0.22%
Other	Private	0.04%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

■ Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

■ Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

■ Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

■ Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments excluding sovereign bonds*

■ Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

■ Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

■ Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

■ Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Sub-Fund had 55.7% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

● **What was the share of socially sustainable investments?**

The Sub-Fund had 55.7% in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy and/or sustainable investments with a social objective. The Investment Manager's sustainable investments framework measures contribution to an environmental and/or social objectives of the sustainable investments through their positive contribution to one or more of the environmental and social SDGs. Consequently, the Sub-Fund does not distinguish between sustainable investments with an environmental or social objective. Accordingly, the Sub-Fund's proportion of sustainable investments is a mix of sustainable investments with an environmental objective that is not aligned with the EU Taxonomy or a social objective or a combination of both, and the exact composition may fluctuate.

● **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The 0.2% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Mercer Passive Universal Global Equity Fund

Legal entity identifier:
2549004Y1261YHQTH367

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☐ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective**: __%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: __%

☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund seeks to achieve its environmental and social characteristics by investing in the component securities of the MSCI World Universal ex Selected Securities Net Total Return Index (EUR) "Benchmark" using an index tracking approach. In this regard, the Sub-Fund will rebalance its portfolio holdings and associated weights to match, as far as practicable, to the constituents and weights reflected in the Benchmark at each rebalancing date.

The Benchmark is constructed by firstly excluding companies with the weakest ESG profile from the universe of securities within the MSCI World Index, "Parent Index". Secondly, an ESG re-weighting factor is defined for each security reflecting an assessment by the index provider of both the current ESG rating, as well as the trend in this rating, which is defined as the change in the security's ESG rating over time (together the "Combined ESG Score"). Finally, the free-float market cap weight of the available universe of securities are re-weighted using this Combined ESG Score. In addition, based on the methodology and assessment of the index provider, the Benchmark applies a negative environmental and social screen to the investable universe represented by the Parent Index to exclude companies that:

- generate more than 1% of their revenue from thermal coal extraction, arctic drilling or oil tar sand mining;
- are involved in the manufacture, distribution or sales of controversial weapons;
- manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales;
- have not been assessed or rated by the index provider on the basis of ESG metrics; or
- have faced very severe controversies pertaining to ESG issues (including UN Global Compact violations).

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

In tracking the Benchmark, and where the Sub-Investment Manager seeks to make an investment not included in the Benchmark (via optimisation), that investment is not permitted where it is inconsistent with the environmental and social screens referenced above.

The Investment Manager measured the attainment of the environmental and social characteristics by assessing the extent to which the Sub-Fund tracked the benchmark.

Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

● **How did the sustainability indicators perform?**

The Sub-Fund was invested in line with the Benchmark Index, which it used as its reference benchmark. In this regard, the tracking error of the Sub-Fund versus the Benchmark Index over the reference period was 0.14%.

The exposure of the Sub-Fund, and by comparison the Benchmark Index, at each rebalancing date over the reference period to companies excluded by the environmental and social screens is set out under "How did this financial product perform compared with the reference benchmark?"

The Sub-Fund had no exposure to companies which the Investment Manager determined were UNGC violators with no/low remediation potential.

The Investment Manager assessed the Benchmark Index versus the MSCI World Index (the "Parent Index") to ensure the Benchmark Index remains aligned with the environmental and social characteristics promoted by the Sub-Fund. In this regard the impact of the screens listed above on the Benchmark Index relative to the Parent Index is set out under "How did this financial product perform compared with the reference benchmark?":

The Sub-Fund met its minimum commitment to sustainable investments throughout the applicable reference period. The level of sustainable investments in the portfolio as a quarterly average over the reporting period can be found in the table below.

● **...and compared to previous periods?**

Not applicable. This is the first reporting period for this Sub-Fund.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not Applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not Applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not Applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For any potential sustainable investments, the Investment Manager considered the mandatory social PAIs (including PAI10 Violations of UNGC principles and OECD Guidelines for Multinational Enterprises) in reaching its determination that how sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Investment Manager used a third-party data provider for information to assess and monitor companies for UNGC compliance.

Under the Investment Manager's framework any companies identified as UNGC violators are not considered sustainable investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

**How did this financial product consider principal adverse impacts on sustainability factors?**

Where a Principal Adverse Impact (PAI) is integrated into investment considerations, engagement, exclusion, or management of the portfolio is completed with due consideration to reducing the negative impact of that indicator.

Identified PAIs and the impact of mitigating actions taken and any planned in respect of those PAIs are formally monitored at the quarterly investment risk management committee meetings and more regularly by the Portfolio Management team.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	41951.9	tCO2	68
Scope 2 GHG emissions	9565.1	tCO2	68

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

Please see the information below in this respect.

● **What was the asset allocation?**

100.2% of the Sub-Fund's assets were delegated to the appointed Sub-Investment Manager(s) to manage the Sub-Fund in line with the environmental and/or social characteristics promoted by the Sub-Fund. The Sub-Fund did not use derivatives to attain the environmental or social characteristics promoted by the Sub-Fund.

The remaining -0.19% of the Sub-Fund's assets are in other investments ("#2 Other"), which are not aligned with environmental and/or social characteristics promoted by the Sub-Fund. The negative figure is due to unsettled transactions at the time of reporting.

These figures and the below table are a quarterly average over the reporting period. The Sub-Fund met its expected asset allocation at all times during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S characteristics** covers:

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● ***In which economic sectors were the investments made?***

The sectors and sub-sectors where investments of the Sub-Fund were made are set out below. These figures are as at the reporting date.

Sector	Sub-Sector	% Assets
Information Technology	Semiconductors & Semiconductor	10.83%
Information Technology	Software & Services	9.77%
Financials	Financial Services	8.30%
Financials	Banks	7.86%
Industrials	Capital Goods	7.17%

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective are considered as aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

■ Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

■ Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

■ Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

■ Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

2. Taxonomy-alignment of investments excluding sovereign bonds*

■ Taxonomy-aligned: Fossil gas
Turnover: / CapEx: / OpEx:

■ Taxonomy-aligned: Nuclear
Turnover: / CapEx: / OpEx:

■ Taxonomy-aligned (no gas and nuclear)
Turnover: / CapEx: / OpEx:

■ Non Taxonomy-aligned
Turnover: / CapEx: / OpEx:

This graph represents of the total Investments.

* For the purpose of these graphs, 'sovereigns bonds' consist of all sovereign exposures.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

● **What was the share of investments made in transitional and enabling activities?**

For the purposes of this report, 0% of the Sub-Fund's investments were identified as being in transitional and enabling activities within the meaning of the EU Taxonomy Regulation.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

In the previous reporting period, the Sub-Fund did not commit to making environmentally sustainable investments within the meaning of the EU Taxonomy Regulation, and, accordingly, 0% of its sustainable investments with an environmental objective were considered as aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not Applicable

● **What was the share of socially sustainable investments?**

Not Applicable

● **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The -0.19% of assets which fell into the sub-category "#2 Other" represents the indirect exposures which were used for efficient portfolio management purposes only. Such assets were cash, FX and financial derivative instruments which are used for liquidity management, and such assets are not subject to any minimum environmental or social safeguards. The negative balance is due to unsettled transactions at the time of reporting.

● **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

In addition to identification and analysis of PAIs, the Investment Manager utilised a combination of some, or all of, the following mechanisms and guiding principles in order to ensure that the environmental and social characteristics promoted by the Sub-Fund were met:

Investment Strategy: The Sub-Fund tracked the Benchmark Index and thus, met the environment and social characteristics incorporated in benchmark index methodology as outlined in the above section 'To what extent were the environmental and/or social characteristics of the Fund met?'

Engagement: The Investment Manager's engagement framework has identified priority areas for engagement which are communicated to the appointed sub-investment manager. The Investment Manager also screens and monitors listed portfolios for high-severity ESG-related risks as flagged according to the UNGC principles that relate to human rights, labour, environment and corruption issues. The securities identified through the screen are deemed an engagement priority for Sub-Investment Managers. Stewardship activities were also monitored via an annual Manager Engagement Survey.

The Investment Manager applied oversight to the activities of the Sub-Investment Manager throughout the reporting period to ensure that the investment processes were implemented on a continuous basis and also effectively monitored the Sub-Fund on an ongoing basis using the sustainability indicators.

Oversight of the investment strategy was applied on a quarterly basis via investment management risk committee meetings and regular meetings with the sub-investment manager.

Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation Disclosures (continued)

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

For the reference period, the Underlying Fund has designated the Benchmark Index as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund. The Underlying Fund achieved the environmental and social characteristics it promotes through successfully tracking the Benchmark Index. See "How did the sustainability indicators perform?" for the relevant performance information.

● **How does the reference benchmark differ from a broad market index?**

The Benchmark Index of the Underlying Fund, based on the methodology and assessment of the index provider,

- tilts away from free-float market cap weights used in the Parent Index, to enhance exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile; and;
- based on the methodology and assessment of the index provider, applies a negative environmental and social screen to exclude companies included as constituents of the Parent Index.

Further details regarding the methodology of the Benchmark Index (including its constituents) are available on the index provider's website www.msci.com/index-methodology.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

The Sub-Fund achieved the environmental and social characteristics it promotes through using an index-tracking strategy, where it invested in the constituent securities represented within the Benchmark Index.

● **How did this financial product perform compared with the reference benchmark?**

Please see below. The table represents the Sub-Fund and Reference Benchmark as at the reporting date.

	Sub-Fund	Reference Benchmark
% market value exposure excluded based on screens	0%	0%

● **How did this financial product perform compared with the broad market index?**

Please see below. The table represents the Sub-Fund and Broad Market Index (MSCI World Index) as at the reporting date.

	Sub-Fund	Broad Market Index
% market value exposure excluded based on screens	0%	5.66%

PAIs for this Sub-Fund are reviewed at quarterly Investment Risk Management Committee meetings, taking into account data coverage and relevance. The Investment Manager has not, based on its monitoring in the period, set any specific targets on these metrics having regard to the nature and profile of the portfolios. As such, the Investment Manager over the period has no additional actions to report in relation to mitigating these PAIs at present for this Sub-Fund. PAI trends continue to be monitored, as applicable to the portfolio, for adverse developments. Should a PAI present or begin trending adversely such that it is then considered outside of its expected range, the Investment Manager will investigate and may action a mitigation plan if appropriate. This may also involve liaising with the relevant Sub-Investment Manager(s) where it is determined that there are practical actions to be taken in the investment process, including informing engagement priorities and strategies where this is considered an effective mitigating action.

The PAIs for this financial product are set out below. These metrics are an average of each quarter end over the reporting period. If there are no corporate assets in the Sub-Fund or there is no data available for a particular metric of any of the corporate assets in the Sub-Fund, the metric may show as a blank.

Indicator	Metric	Measure	Data Coverage %
Scope 1 GHG emissions	6,187.4	tCO2	28
Scope 2 GHG emissions	1,266.8	tCO2	28
Scope 3 GHG emissions	46,677.1	tCO2	28

*These are zero coupon bonds and money market instruments.

**Citigroup also incorporates positions held with Citibank.

†Futures contracts treated as settled to market were recorded as a due from/to broker in the Statement of Financial Position in the prior year.

*Interest rate swaps treated as settled to market were recorded as a due from/to broker in the Statement of Financial Position in the prior year.

**Credit default swaps treated as settled to market were recorded as a due from/to broker in the Statement of Financial Position in the prior year.

The following table outlines the investment types and geographic concentrations of financial assets at fair value through profit or loss at 30 June 2024 where the Sub-Fund is no longer invested in at 30 June 2025.

Financial assets at fair value through profit or loss

Transferable securities

Corporate bonds

Cayman Islands	0.09%
Greece	0.12%

Government bonds

France	0.34%
Israel	0.11%
Poland	0.05%

Financial derivative instruments

Options purchased	0.01%

Financial liabilities at fair value through profit or loss

Financial derivative instruments

Total return swaps	(0.00%)
Options written	(0.03%)

Total assets comprised as follows.

	% of Total assets
Transferable securities admitted to an official stock exchange listing;	78.02
Transferable securities dealt in on another regulated market;	9.30
Other transferable securities of the type referred to in Regulation 68 (1)(a), (b) and (c);	1.50
Money market instruments;	0.50
UCITS and AIFs;	1.32
Financial derivative instruments dealt in on a regulated market;	0.69
Over the Counter financial derivative instruments;	1.58
Other current assets	7.09
	100.00

Country classifications are based upon country of incorporation and/or country of domicile.

The following securities have been pledged by the Sub-Fund and are held by the counterparty as collateral in respect of financial derivative instruments.

Security	Counterparty	Par value	Market value US\$
U.S. Treasury Bonds 4.75% due 15/05/2055	Morgan Stanley	21,500	21,414
U.S. Treasury Notes 3.50% due 30/09/2026	JP Morgan Chase Bank	665,000	661,675

Security	Counterparty	Par value	Market value US\$
U.S. Treasury Notes 4.13% due 31/10/2026	JP Morgan Chase Bank	158,000	158,457
U.S. Treasury Notes 3.75% due 30/04/2027	JP Morgan Chase Bank	330,000	329,974
UnitedHealth Group, Inc. 5.88% due 15/02/2053	JP Morgan Chase Bank	522,000	382,526

The following securities have been received by the Sub-Fund as collateral in respect of financial derivative instruments.

Security	Counterparty	Par value	Market value US\$
U.S. Treasury Bills zero coupon due 28/11/2025	State Street Bank and Trust	1,076,100	771,789
U.S. Treasury Notes 0.25% due 31/10/2025	State Street Bank and Trust	12,905,300	12,734,186
U.S. Treasury Notes 0.38% due 30/11/2025	State Street Bank and Trust	7,141,000	5,127,941

*Security in default.

**These are zero coupon money market instruments.

***Citigroup also incorporates positions held with Citibank.

†Futures contracts treated as settled to market were recorded as a due from/to broker in the Statement of Financial Position in the prior year.

‡Interest rate swaps treated as settled to market were recorded as a due from/to broker in the Statement of Financial Position in the prior year.

‡Credit default swaps treated as settled to market were recorded as a due from/to broker in the Statement of Financial Position in the prior year.

All options purchased and written are covered.

The following table outlines the investment types and geographic concentrations of financial assets at fair value through profit or loss at 30 June 2024 where the Sub-Fund is no longer invested in at 30 June 2025.

Financial assets at fair value through profit or loss

Transferable securities

Asset backed securities

Spain	0.01%

Corporate bonds

Jersey	0.09%

Peru	0.02%

Supranational	0.33%

Government bonds

Germany	0.15%

Mortgage backed securities

Luxembourg	0.09%

Financial derivative instruments

Cross currency interest rate swaps	1.05%

Financial liabilities at fair value through profit or loss

Financial derivative instruments

Cross currency interest rate swaps	(0.00%)

Total assets comprised as follows.

	% of Total assets
Transferable securities admitted to an official stock exchange listing;	33.05
Transferable securities dealt in on another regulated market;	8.27
Other transferable securities of the type referred to in Regulation 68 (1)(a), (b) and (c);	23.66
Money market instruments;	0.37
UCITS and AIFs;	0.03
Financial derivative instruments dealt in on a regulated market;	1.26
Over the Counter financial derivative instruments;	1.63
Other current assets	31.73
	<u>100.00</u>

Country classifications are based upon country of incorporation and/or country of domicile.

The following security has been received by the Sub-Fund as collateral in respect of reverse repurchase agreements.

Security	Counterparty	Par value	Market value €
European Union 2.00% due 04/10/2027	BNP Paribas	27,771,909	<u>27,753,705</u>

The nominal for the bonds are factored and the nominal for the reverse repurchase agreements and collateral are not factored.

*These are zero coupon bonds.

**Security is valued at fair value in accordance with the fair value measurement policy.

***Citigroup also incorporates positions held with Citibank.

†Futures contracts treated as settled to market were recorded as a due from/to broker in the Statement of Financial Position in the prior year.

‡Interest rate swaps treated as settled to market were recorded as a due from/to broker in the Statement of Financial Position in the prior year.

‡‡Credit default swaps treated as settled to market were recorded as a due from/to broker in the Statement of Financial Position in the prior year.

All options purchased and written are covered.

The following table outlines the investment types and geographic concentrations of financial assets at fair value through profit or loss at 30 June 2024 where the Sub-Fund is no longer invested in at 30 June 2025.

Financial assets at fair value through profit or loss

Transferable securities

Corporate bonds

Slovenia 0.18%

Government bonds

Albania 0.40%

Bahamas 0.09%

Ghana 0.24%

North Macedonia 0.09%

Russia 0.02%

South Korea 0.09%

Money market instruments

United States of America 0.50%

Total assets comprised as follows.

	% of Total assets
Transferable securities admitted to an official stock exchange listing;	86.82
Transferable securities dealt in on another regulated market;	0.76
Other transferable securities of the type referred to in Regulation 68 (1)(a), (b) and (c);	0.00
Financial derivative instruments dealt in on a regulated market;	0.19
Over the Counter financial derivative instruments;	1.57
Other current assets	10.66
	<u>100.00</u>

Country classifications are based upon country of incorporation and/or country of domicile.

The following securities have been pledged by the Sub-Fund and are held by the counterparty as collateral in respect of financial derivative instruments.

Security	Counterparty	Par value	Market value US\$
U.S. Treasury Notes 3.75% due 31/08/2026	Citigroup	270,000	269,388
