

SUSTAINABILITY REPORT – PREH GROUP 2023

(GRI – Referenced Report)

Dear Ladies and Gentlemen,

2023 was a challenging year for the entire industry. The ongoing uncertainty and impact of geopolitical risks and the resulting increase in energy and material prices impacted our direct operations and strained our supply chain. New challenges emerged in the markets that required efficiency in resource consumption, digitization of workflows and automation of reporting structures.

The Preh Group and its approximately 7,400 employees generated sales of 1.69 billion euros, with a slight increase towards 2023.

We continued to focus on opportunities for a sustainable product portfolio in the three main pillars of circular economy materials, use of renewable energy and traceability of environmental impact. In 2023, we generated 2.5% of our global electricity needs internally. In addition, we set the framework for further increasing the capacity of photovoltaic systems in European plants. The use of closed-loop materials for thermoplastics and metals.

Finally, the upcoming application of the German Supply Chain Due Diligence Act (LkSG) requires robust processes and methods for the engagement and risk transparency of our supply chain.

Sustainable acting is part of our daily business for the achievement of ambitious operational goals to take care about our employees and the environment.

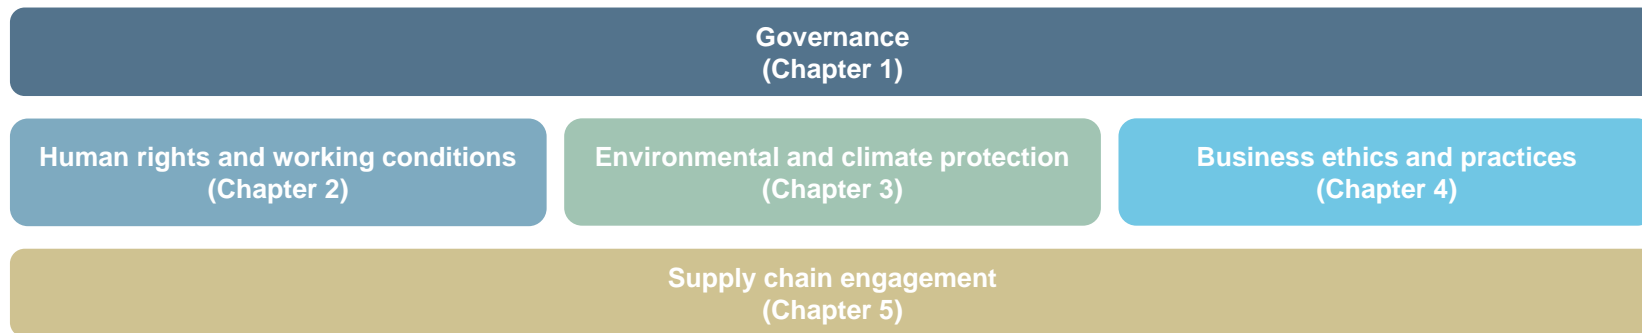

The following Sustainability Report will give you an overview about our corporate principles, activities and efforts for an overall sustainable acting.

Yours sincerely,

Sustainability at Preh

We orient on the following fields of responsibility to achieve our goals and to meet the expectations of our stakeholder for a sustainable acting:

Note:

The report serves as summary of our corporate principles, our activities and efforts and the performance evaluation summarized on the Preh Group for the reporting year 2023 (January 1st – December 31st, 2023). An overview for all reporting disclosures and indicators can be found in the annex. The comma rules for figures follow the English pattern.

We promote a sustainable acting for all our corporate activities.

100%

of production sites are ISO 14001 (environment) & ISO 45001 (health and safety) certified

ecovadis

PREH GMBH (GROUP)
has been awarded a
Silver medal
as a recognition of their EcoVadis Rating

FEBRUARY 2024

80%

of production sites are TISAX certified (Information Security Management)

5.3 MWp

installed capacity of PV systems

81%

of globally used electricity comes from renewable sources

69,000

hours of global staff training in 2023

100%

of production sites are IATF 16949 certified (Quality)

INTRODUCTION AND GOVERNANCE

preh

WHAT IS SPECIAL ABOUT PREH

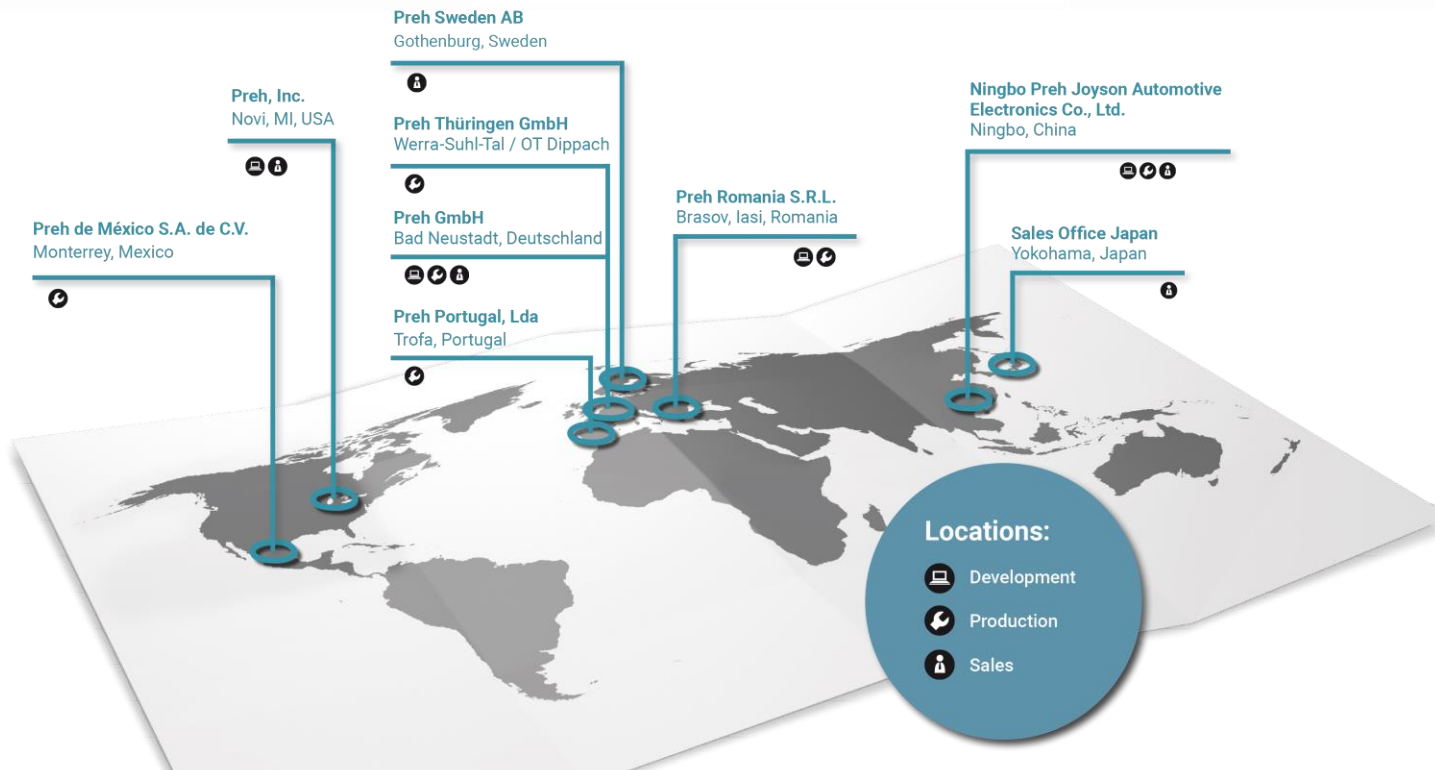

The perfect combination of access to growth markets, high-tech know-how and cost efficiency

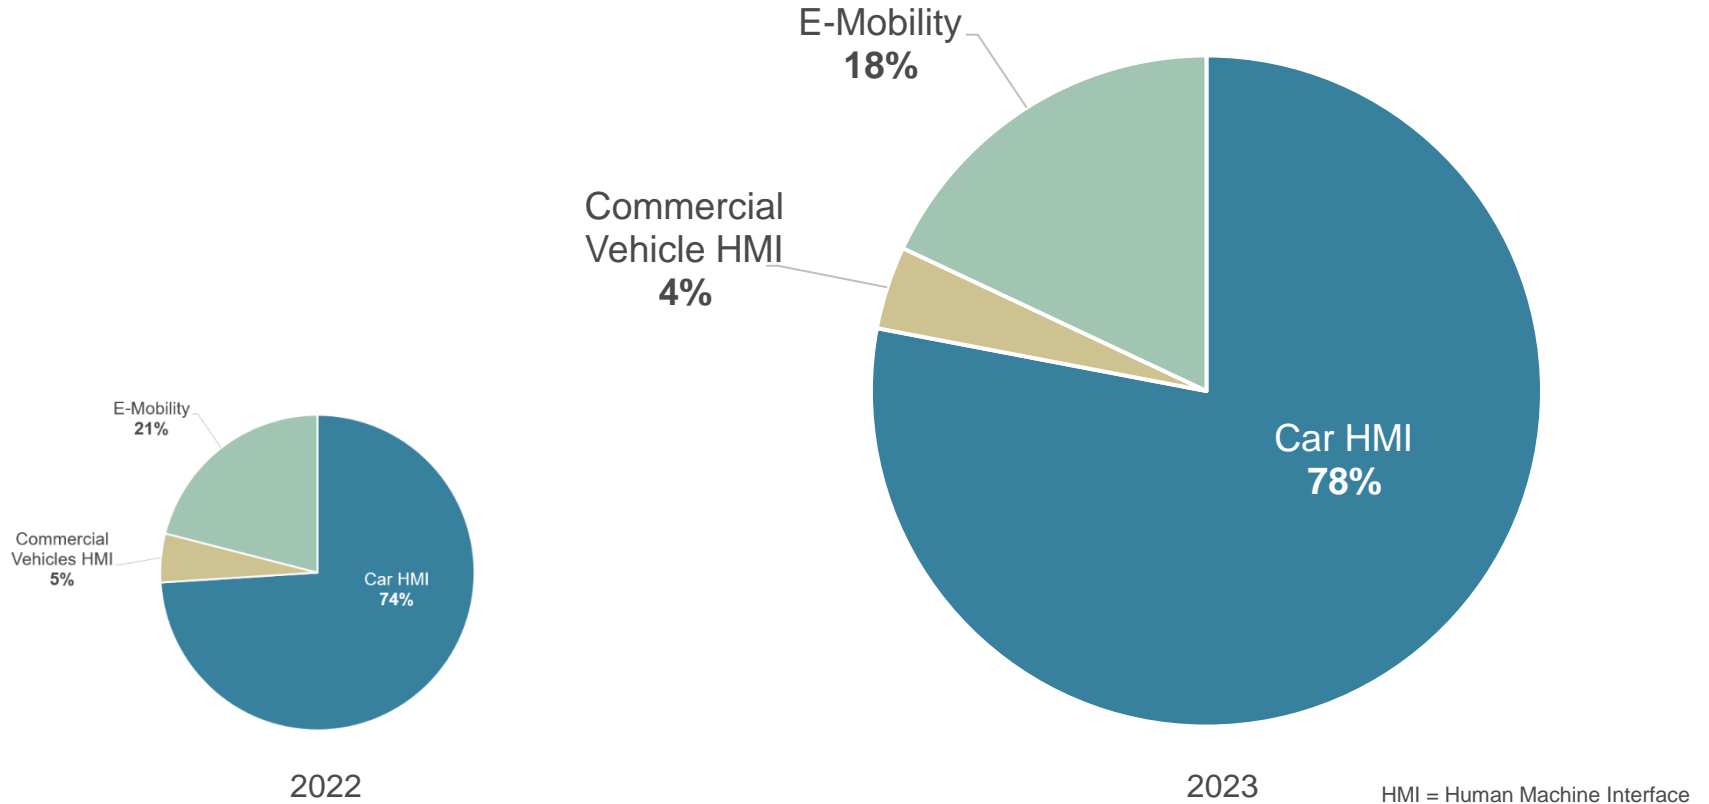

Joyson Electronics Group is one of the largest automotive suppliers globally: more than 40,000 employees in 30 countries; turnover about 7 bn € (2023)

5 Sales Locations / 6 Production Plants / 5 R&D Centers

SALES BREAKDOWN BY PRODUCT DIVISION

Control Systems with active haptic feedback, magnet haptics and high-quality surfaces

Preh Group is ...

... a leading supplier of multifunctional steering wheel switches (about 10 mill. units p.a.)

... a leading climate controls manufacturer (no. 1 in North America)

... a global HMI technology leader (e.g., with haptic feedback technology)

Central Controls

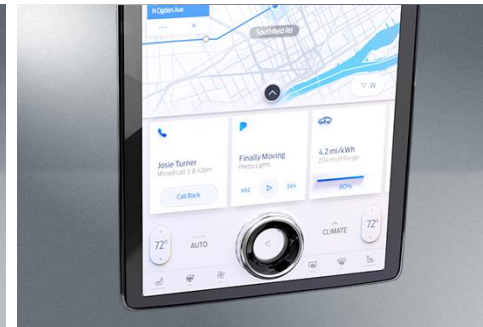

Multifunctional Steering Wheel Switches

Climate Controls

Center Stacks

Systems/Consoles

- **Consoles:**
Drive lever, multi-use knob, shifter, rotary knob, fingertip rocker, rocker, switch arrays with displays, structural parts, trim wiring, CAN-network, customized platforms
- **Steering wheel systems:**
Instrument cluster, reverser, steering column switch, light switch, trim parts

John Deere, several models

Fendt, FendtONE platform

Preh future concept console

Strong Market Position

- 800V Technology (Boosters, DC/DC Converters)
- On-Board Chargers (11kw up to 44kw)
- 12V and 48V Battery Management Control Units

800V Booster and DC/DC Converter Technology

On-Board Chargers for cars and commercial vehicles

Battery Management Control Units

GM Supplier Quality Excellence Award

SAIC-VW Excellent Cooperation
Performance Award

2018

GM Supplier of the Year Award
BMW Supplier Innovation Award
Ford Q1 Award
Pace Award Finalist

PASSION FOR EXCELLENCE

OUR CLAIM

Excellence is defined as striving for the best possible result in everything we do.

Excellence really can never be reached but is rather a guiding principle that motivates us to always give our very best!

Only with a passion for excellence, we will do everything to prevent mistakes, especially to avoid making the same mistake twice. Also, passion for excellence motivates us to learn every day something new and to work according to the principle “everything is possible”.

OUR VISION

WE passionately strive for excellence creating smarter and sustainable solutions, in everything we do.

The vision defines what we want to achieve in the future. It contains the element „WE“, which comprises all Preh locations. It gets to the heart of our claim to passionately strive for excellence. It clarifies Preh’s quest to always be one step ahead of the competition („smarter“). Preh strives to satisfy future customer expectations as well as to promote safety and environmental aspects („sustainable solutions“).

OUR MISSION

With highest quality and competitiveness we create cutting-edge technology for HMI and e-mobility.

The mission describes today’s focus of action, needed to achieve the vision. It also contains the element „WE“, which comprises all Preh locations. It details „excellence“ as prioritizing highest quality and competitiveness. It describes our aspiration for innovation („cutting-edge technology“) in our current fields of business („HMI and e-mobility“).

OUR VALUES

Excellence – Accountability – Continuous learning & improvement – Goals / result orientation – Global thinking, throughout the whole company

Our values are the basis of the common thinking and acting of all colleagues at Preh Group.

HMI = Human Machine Interface

OUR VISION

WE passionately strive for excellence, creating smarter and sustainable solutions, in everything we do.

The **vision** is aligned towards the future. It contains the element „**WE**“, which comprises all Preh Group locations. It gets to the heart of our claim to **passionately strive for excellence in everything we do**. It makes clear that at Preh we want to be **smarter** in the sense of creating solutions that allow us to be one step ahead of the competition.

Here, creation of solutions does not only refer to the development of innovative products. It rather refers to the whole company, i.e., Preh wants to be smarter in every respect (“in everything we do”)! Some examples of being smarter: Right market opportunity foresight when making investments, achieving higher organizational efficiency within all of Preh Group than our competitors do in their organizations, etc.

Striving for excellence also means to address **sustainability**. A **sustainable solution** comprises environmental aspects and also much more, as it means to be excellent in everything we do. This means, a sustainable solution is not a short-term fix of a problem, but a sound solution - well thought out and implemented with diligence. A sustainable solution applies not merely to things, but also to processes and relations.

The 4-eyes-principle is an example how a simple process can be made more sustainable. Simplicity, not complexity is the key for sustainable processes, products and solutions. Looking at suppliers and customers we intuitively understand the significance of sustainability as it stands for mutually beneficial long-term relationships.

OUR MISSION

With highest quality and competitiveness we create cutting-edge technology for HMI and e-mobility.

The **mission** describes today's focus of action, needed to achieve the vision of the future. It details „excellence“ as prioritizing **highest quality and competitiveness**. In this sense, quality excellence means, for example, to strive for zero ppm, for zero incidents and not to stop day to day to reduce further scrap until we've achieved as well zero scrap. Quality excellence means as well to eliminate rework, to deliver reliable services and to close always the loop according to the PDCA (Plan Do Check Act).

An element of competitiveness is market excellence. It means that we should systematically monitor our competitors in order to know them really well and to understand where we have to improve to be always a step ahead. We have to understand our customers! Our customer is not only the engineering or the purchasing department.

It's much more - there are the plants, there is quality and the logistics and finally their marketing. They all have different interests and it's essential to know them to develop and to deliver the right product and services. Only by understanding all of our customers, consolidating the views we'll be able to derive a reliable product strategy and finally also be able to innovate!

All of this can only work out if we are commercially competitive! We have to go for the most attractive elements in the total cost comparison, in tooling, with lean development process to benchmark development cost and finally in an attractive piece price. The mission also contains the element „**WE**“, which comprises all Preh locations. It describes our aspiration for innovation („**cutting-edge technology**“) in our current fields of business („**HMI and e-mobility**“). So, what is our focus of action here?

OUR MISSION

With highest quality and competitiveness we create cutting-edge technology for HMI and e-mobility.

In the end, everything we do serves the creation of advanced technical solutions for our customers. Today, as well as during the near future, we focus on the markets for HMI- and e-mobility products. However, the HMI market undergoes a deep transition. Established competitors cease to be and new competitors appear while the HMI-technologies are changing rapidly. This has a tremendous impact on Preh, as the majority of our sales are derived from Car HMI products. Most of these HMI solutions might disappear due to the advancement of touchscreens. The control systems that are still in demand – such as multifunctional steering wheel switches – do face an intense competition.

So, one of Preh's tasks will be to find out, which products and technologies will be in demand in the future and to create with smart ideas the demand for the future. In the e-mobility field we have successfully done this already. Preh is first-to-market with its 800V technology for Porsche and we have invested heavily in a laboratory for power electronics testing. Now, a similar step is required for Car HMI and as well to sharpen our product portfolio for Commercial Vehicles. Of course, this is only one example. Many other tasks will also be necessary.

OUR VALUES

Excellence

Excellence is defined as striving for the best possible result in everything we do. Excellence really can never be reached but is rather a guiding principle that motivates us to always give our very best!

Accountability

In order to improve we not only need lessons learned but also accountability. It means for every success and for every failure there are colleagues to be held accountable for. It is the opposite of the mindset “a mistake happened, but nobody knows who is responsible for it”. Accountability is a prerequisite for any lessons learned and improvement action, as it clarifies responsibilities. With a clear responsibility, actions for improvement can be planned, done and checked.

Continuous learning and improvement

Excellence is closely related to continuous learning and improvement. If a lessons learned feedback is given, taken serious and triggers changes – then we can improve. Continuous learning and improvement

prevents a repetition of mistakes or of non-sufficient performance. It is mandatory for our pursuit of excellence.

Goals / result orientation

Working at Preh does not mean we keep ourselves just busy. Tasks should either create value for the company or they should not be done at all! Therefore, at Preh we work with a clear goals and result orientation. We are performance driven and will be held accountable for the results of our work.

Global thinking, throughout the whole company

When improvements are planned, our focus should always comprise the whole company. We need to think global, as Preh Group can only be successful when all locations are successful together. In this sense, we should share our best practice experience with our colleagues throughout the whole company. Perceiving our work as a contribution to the value created within all of Preh Group may be a new perspective. However, if some locations are successful with the approach to excellence, but others not, Preh Group as a whole can not perform excellent. Finally we are one team!

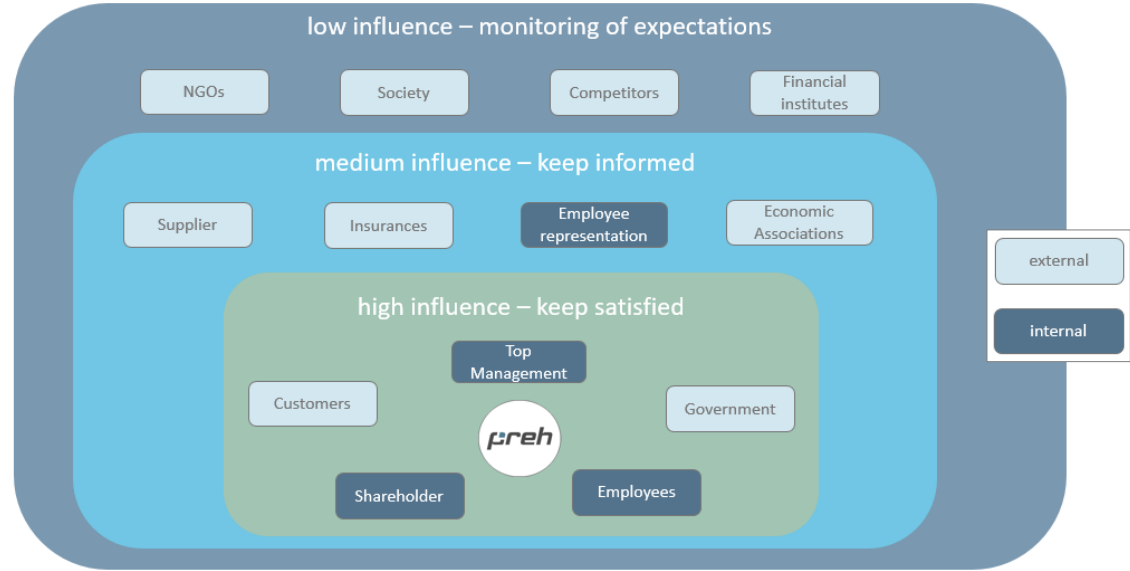

Corporate Principles

We commit to assess the needs and expectations of all stakeholder by cooperation and open dialogues

Activities and efforts of Preh (extract):

As part of our integrated management system, we identify internal and external stakeholders as part of our business context assessment. The influence of the stakeholders is assessed according to various criteria in relation of their impact to Preh. An evaluation scheme **is used to classify** the influence of each identified stakeholder group.

There were no significant changes identified regarding stakeholder groups or their expectations in 2023.

Number of identified external stakeholder groups: **9**

Number of identified Internal stakeholder groups: **4**

General Processing

The wide range of related topics leads to the prioritization of that, what is material. Therefore, a materiality analysis is a significant step for the identification of our target setting and focusing. Due to our business activities, our industry sector and our influence potential, specific topics may receive an increased importance for our daily business.

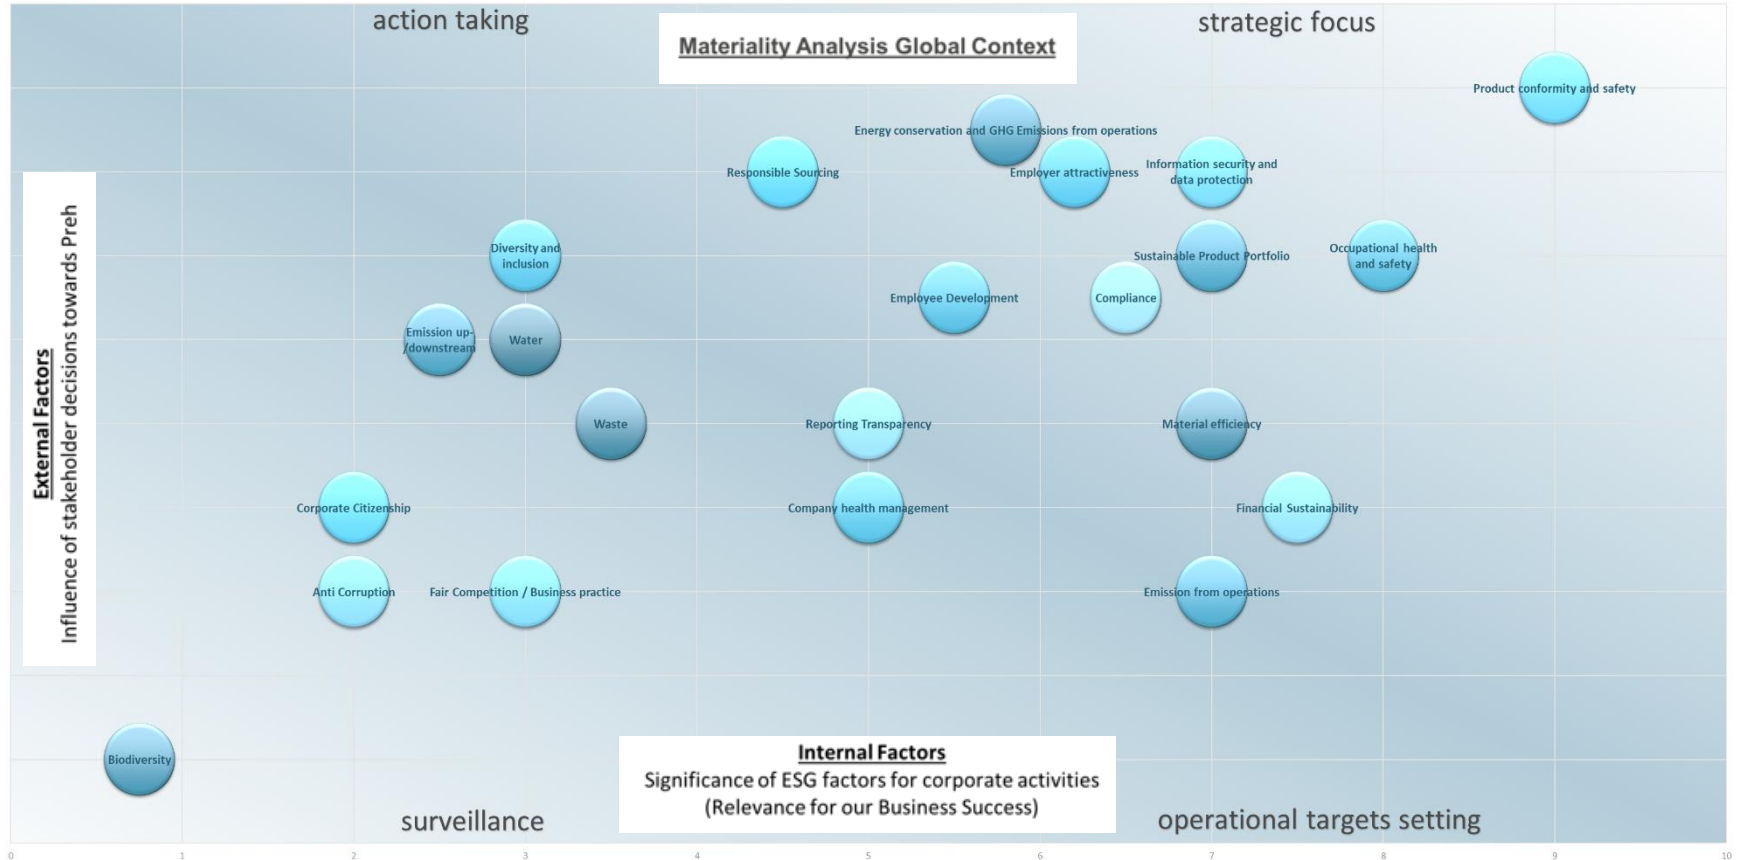

The analysis result shows an overview about the materiality of relevant topics in relation to the expectations of external stakeholders (identified in page 20). The second parameter represents the impact for our business success.

The evaluation of the materiality underlies various criteria:

- External compliance obligations as base for business relationship
- Economical and operational impact of the topic to our activities

The materiality is regularly reviewed by the Management Board of the Preh Group. In 2023 no significant changes regarding ESG topics were identified.

| | |

Contribution to the Sustainable Development Goals – SDG – Agenda 2030

"Passion for Excellence" guides our daily acting. With our strategic goals and ambitions, we contribute to the Sustainable Development Goals of the United Nations. The overview shows the alignment of our goals and ambitions with the SDG. Supporting actions can be exemplarily found in the subsequent sections.

- 1. FASTEST GROWTH
Preh plans to grow significantly faster than the worldwide automotive market.
- 2. SUSTAINABLE PROFITABILITY
- 3. ZERO DEFECTS
- 4. RELIABILITY
Preh wants to be a reliable partner for its customers.
- 5. SUSTAINABILITY
Preh defines ambitious operational goals to take care about our environment.
- 6. ATTRACTIVE EMPLOYER
Preh offers challenging job opportunities as well as continuous learning and provides attractive working conditions.

| General governance | Resource conservation and environmental protection | Energy conservation and climate protection | Occupational health and safety |
|--|--|---|--|
| <p>Promotion of stakeholder engagement and reporting transparency → Ambition: Open dialogue with stakeholder (by reliable reporting)</p> <p>Assurance of responsible sourcing of materials → Ambition: Compliance with social and environmental standards in supply chain (by supply chain monitoring, onboarding)</p> | <p>Promotion of a responsible material and waste management → Ambition: Conservation of natural resources (by scrap rates optimization, waste management)</p> <p>Promotion of a sustainable product portfolio → Ambition: Increase sustainability of products (by promotion of E-Mobility, renewable materials, reparability)</p> <p>Promotion of a responsible water management → Ambition: No water wasting (by metering, maintaining water supply infrastructure)</p> <p>Promotion of a responsible air quality management → Ambition: No air pollution (by material substitution, eco-friendly technology)</p> | <p>Elimination of GHG emissions out of operations → Ambition: Zero emissions for Scope 1 and Scope 2 (by usage of renewable energy)</p> <p>Elimination of GHG emissions out of upstream / downstream activities → Ambition: Reduction of Scope 3 Emissions (by substitution of emission intensive activities)</p> <p>Decrease of energy consumption → Ambition: Decrease of energy demand (by energy efficient equipment and awareness promotion)</p> | <p>Provision of a safe work environment → Ambition: Zero work accidents (by accident management, equipment safety, fire protection)</p> <p>Promotion of corporate health management → Ambition: Avoidance of occupational diseases (by health campaigns, ergonomics)</p> |

2

HUMAN RIGHTS AND WORKING CONDITIONS

Corporate Principles

Equal opportunities must be guaranteed in the workplace and the company must refrain from any form of discrimination except where the applicable law expressly provides a framework for selection by certain criteria. Employees must not be treated differently based on gender, race, ethnic origin, disability, religion or beliefs, age or sexual orientation. Employees and members of the Management Board must interact with mutual respect, understanding, and trust in the interest of our shared corporate objectives.

Preh Group recognizes the rights of employees to form, join, and be active in trade unions and employee representative bodies in accordance with applicable laws, collective bargaining agreements and local customs. Preh Group does neither allow preferential treatment nor any discrimination of employee representatives.

Activities and efforts of Preh (extract):

The following activities are established at Preh to ensure equal opportunities for all employees:

- Implementation of the Preh Integrity Line in December 2021 (see page 56)
- Implementation of a global work accidents analysis dashboard for identification of work accidents patterns in the Preh Group
- Established representation body for severely disabled employees (e.g. Bad Neustadt / Dippach)
- Employee representation body (e.g. Germany, Romania, Mexico) for collective bargaining negotiations
- Establishing of intercultural trainings for each specific region (e.g. China, Japan, India, Latin America, Arabic World)
- Age verification during recruitment process
- Establishing of age pyramids as basis for analysis and focus for further actions:
 - Communication channels (suitable for all ages)
 - Planning of successor positions and recruiting
 - Future training and qualification needs
 - Prevention of potential fluctuation

| Disclosure (Status 31.12.) | 2021 | 2022 | 2023 |
|--|-----------------------------|--------------|--------------|
| Number of full-time employees - Preh Group | 7,054 | 7,354 | 7,415 |
| Percentage of female employees - Preh Group | 52 | 49 | 50 |
| Percentage of male employees - Preh Group | 48 | 51 | 50 |
| Percentage of employees covered by collective bargaining agreements by IG METAL (Bad Neustadt) | 90 | 90 | 90 |
| Percentage of women in executive positions in the Preh Group | 25 | 19 | 20 |
| Percentage of women in the Supervisory Board | 17 | 17 | 17 |
| Percentage of employees over 55 | not reported on group scope | 9 | 16 |
| Percentage of employees under 25 | not reported on group scope | 11 | 11 |

Activities and efforts of Preh (extract):

The personal and professional development of our employees is an essential aspect of our business success. It furthermore contributes to our strategic goal "Attractive Employer". The following activities show an extract of our efforts.

- Provision of a common training platform (trainings@preh) for the Preh Group
- Provision of apprenticeships and student programs in various professions like mechatronics or tool maker
- Roll out of a training software for the Preh locations to improve the transparency of performed instructions and trainings regarding:
 - Environmental protection, Health and Safety
 - Information security and data protection
 - Anti-Fraud
 - Data-Protection
- Promotion of employee development by regular training planning as well as the regular performance evaluation of each employee at all Preh locations
- Annual employee surveys at all Preh locations about satisfaction of among others:
 - Cooperation
 - Work environment
 - Leadership and communication

| Disclosure | 2021 | 2022 | 2023 |
|--|--------------|--------|--------|
| Number of young apprentices and trainees - Preh Group | 54 | 60 | 67 |
| Number of performed trainings and instructions via Instruction Tool (Preh Group) | 27,038 | 45,651 | 30,818 |
| Total hours of staff training (Preh Group) | not reported | 67,516 | 68,842 |
| Average hours of training per employee (Preh Group) | not reported | 9 | 9 |
| Participation ratio for Employee Survey [%] | 70 | 72 | 72 |

Corporate Principles

Preh offers challenging job opportunities as well as continuous learning and provides attractive working conditions. This includes furthermore the provision of a safe and secure work environment.

Management Approach

In order to provide a safe work environment, one of our responsibilities is to monitor and analyze potential incidents and take appropriate action.

We measure our self against local specific indicators of workers associations as well as the limits of international accepted indicators.

We orient on the mentioned indicators over all Preh locations to compare our specific performance. Further location-based analysis will be done on local level.

No systematic pattern in peaks had been identified in relation to specific seasons.

100 - Employee Rate [100-ER] by internal and external (temporary) employees

100-ER by Year and Quarter

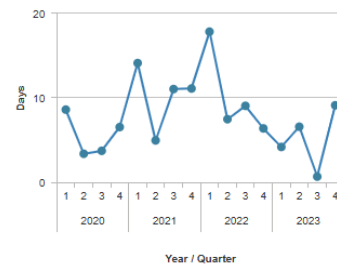

100-ER by Year

Injury Severity Rate [ISR] by internal employees

ISR by Year and Quarter

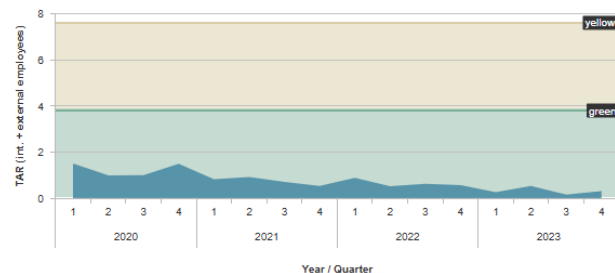

ISR by Year

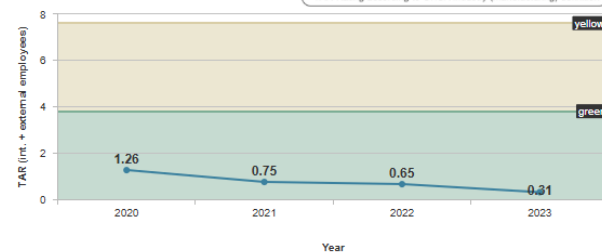

Total Accident Rate [TAR] by internal and external (temporary) employees

TAR by Year and Quarter

TAR by Year

Legend:
 green: ≤ 3.8 // yellow: 3.81 - 7.8 // red: > 7.8
 *TAR-Rating according to OSHA industry (manufacturing) definition

100-Employee-Rate:
 (internal + external temporary employees)

$$= \frac{\text{Number of work accidents} \cdot 100 \text{ Employees}}{\text{Number of Employees}}$$

Total Accident Rate:
 (internal + external temporary employees)

$$= \frac{\text{Number of work accidents} \cdot 200.000 \text{ h}}{\text{Total working hours}}$$

Injury Severity Rate:
 (only internal employees)

$$= \frac{\text{Number of absence days} \cdot 200.000 \text{ h}}{\text{Total working hours}}$$

Activities and efforts of Preh (extract)

The strategic approach is, that all Preh production locations are certified according to the international Management System standard ISO 45001. Our work safety organizations in the Preh locations develop, realize and optimize work safety and health protection concepts continuously under consideration of country-specific regulations and conditions. We orient on the following control hierarchy (scheme on next page) to ensure the health of our employees by maintaining of a safe work environment.

| | |
|---|-------|
| Number of performed instructions for Health and Safety in 2023 (headquarter Bad Neustadt) | 5,311 |
| Percentage of production locations with implemented work safety committee | 100 % |
| Percentage of production locations with an implemented ISO 45001 certification: | 100 % |

Note: Work safety committee

The structure of the work safety committee differs between the various countries. They consist mainly of members of the local management, safety experts and employee representatives or representatives from the medical service.

Preh established various mechanisms to ensure the provision of a safe work environment for employees, for example:

- Performance of hazard assessments to eliminate and mitigate risks
- Regular inspections related to Environmental Protection, Health and Safety and compliance assessments
- Performance of internal system audits as well as external certification audits
- Consultation of employees by the internal suggestion system “Ideas by Preh”
- Communication platform „Preh Intranet“ for general EHS awareness
- Implementation of work safety committees in Preh production location to further strengthen employee consultation and participation
- Provision of medical services and occupational medical checkup
- Performance of safety trainings and fire protection trainings
- Performance of on-the-job-trainings for employees handling with equipment and chemicals
- Implementation of visitor management software for service provider (Bad Neustadt)
- Roll out of a training software for the Preh locations to improve the transparency of performed Environmental protection, Health and Safety instructions and trainings

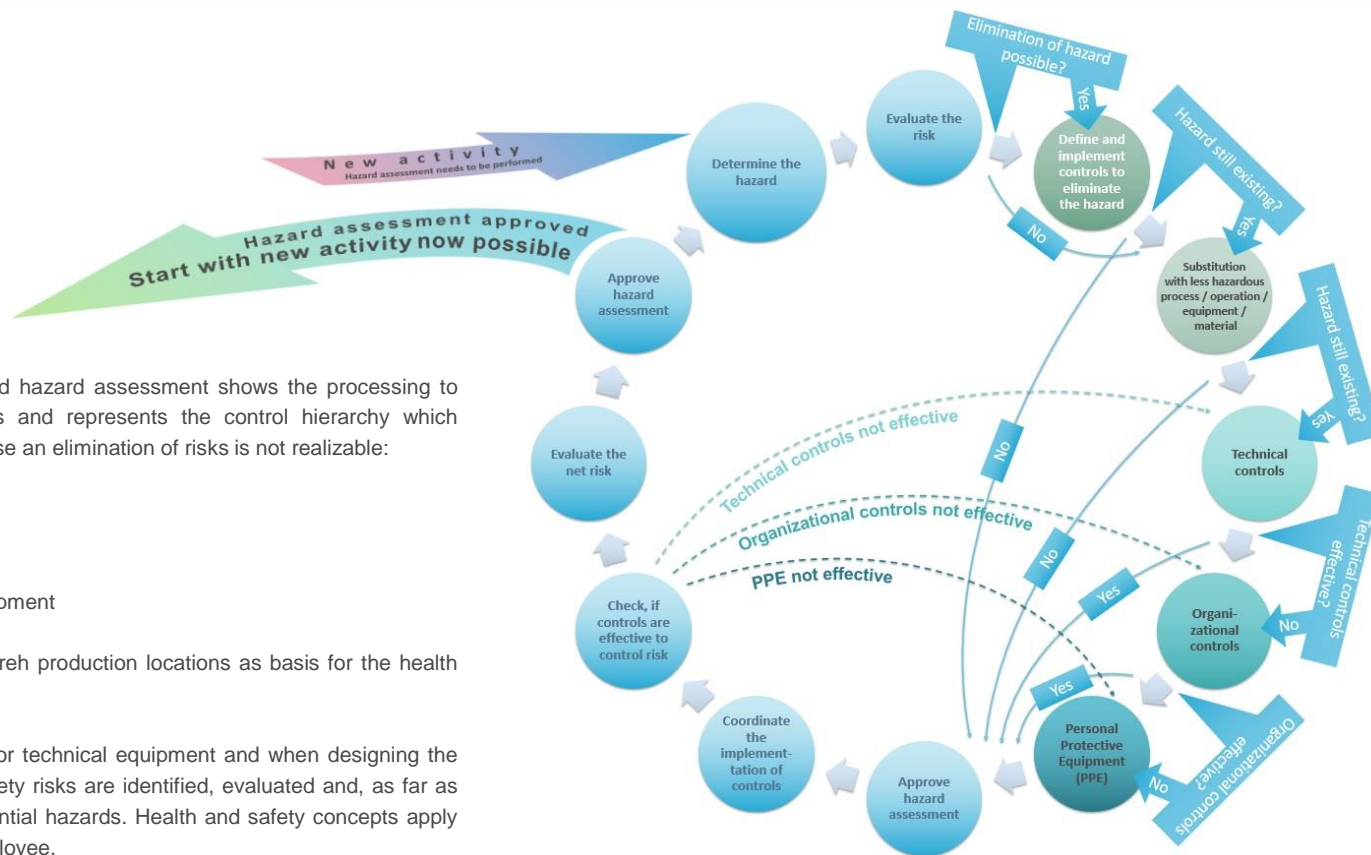

Control hierarchy

The scheme of our activity-related hazard assessment shows the processing to eliminate hazards for employees and represents the control hierarchy which includes the STOP-Principle in case an elimination of risks is not realizable:

- Substitution of the risk
- Technical controls
- Organizational controls
- Personal Protection Equipment

The methodology is used at all Preh production locations as basis for the health and safety management system.

Before the use of new materials or technical equipment and when designing the work environment, health and safety risks are identified, evaluated and, as far as possible, eliminated to avoid potential hazards. Health and safety concepts apply to every internal and external employee.

Preh Bad Neustadt / Preh Romania – Ergonomics

Increasing product dimension, weight and repetitive activities lead to increased physical stress in assembly and pre-production areas. Technical measures (e.g. automation of work steps) serve for the reduction of physical stress.

The target was the integration of further AMR / Cobots on the workstations and production areas to optimize ergonomic situation and reduce physical strain for employees in assembly and electronic production

Preh China – Warehouse – Accident avoidance

Warehouse activities are part of our daily business, where interactions between pedestrians and forklift trucks are unavoidable. For the prevention of potential incidents due to transport activities, the storage racks in our plant Ningbo got equipped with a specific sensors to guide employees like traffic lights.

3

**ENVIRONMENTAL AND
CLIMATE PROTECTION**

Corporate Principles

The Management Board understands the health and safety of all employees as well as the protection of environment and climate as important corporate guiding principles. We aim to a continuous improvement of our EHS performance by setting our own EHS targets and implementing appropriate measures.

In order to avoid environmental pollution and conserve natural resources, our current and future activities are regularly evaluated from an ecological point of view. Legal regulations for environmental protection and safety are our minimum standard. The energy flows are regularly analyzed and evaluated by the energy teams at the respective location and new potentials for improvement are defined.

Activities and efforts (extract):

Environmental protection is an essential part of the integrated management system. The operational environment protection is based on identified environmental aspects as well as related compliance obligations. The environmental protection considers among others the following core topics:

- Waste management
- Chemical management
- Immission control
- Soil protection
- Water security
- Protection of local ecosystems and biodiversity by compliance with phytosanitary measures

Environmental management systems according to ISO 14001:2015 are established for the continuous improvement of our environmental performance at all Preh production locations as well as central functions at our headquarter. The [EHS Policy of the Preh Group](#) is valid for all Preh employees.

Percentage of production locations with an implemented ISO 14001 certification:

100 %

Corporate Principles

In order to avoid environmental pollution and conserve natural resources, our current and future activities are regularly evaluated from an ecological point of view. Legal environmental protection and safety regulations are our minimum standard.

Activities and efforts (extract):

Our identified significant environmental aspects are assessed according to a group-wide assessment standard. Risks and opportunities are identified to control our environmental aspects.

The applicability of legal requirements is regularly reviewed on local level regarding changes in requirements or changing conditions due to changes in processes, technologies or other conditions.

The number of environmental incidents and fines serve as indicator for the effectiveness of our environmental management system. Environmental incidents are analyzed on local level and will be summarized on central level.

Thereby significant fines are defined on a basis of 10,000 RMB per single case.

| | |
|---|-----|
| Total monetary value of significant fines [€] | n/a |
| Total number of non-monetary sanctions: | 0 |
| Cases brought through dispute resolution mechanisms | 0 |

Corporate Principles

We respect our environment and implement actions to avoid negative impacts. We therefore set out the following principles defined in our waste hierarchy for all manufacturing sites to help reduce resource consumption and waste.

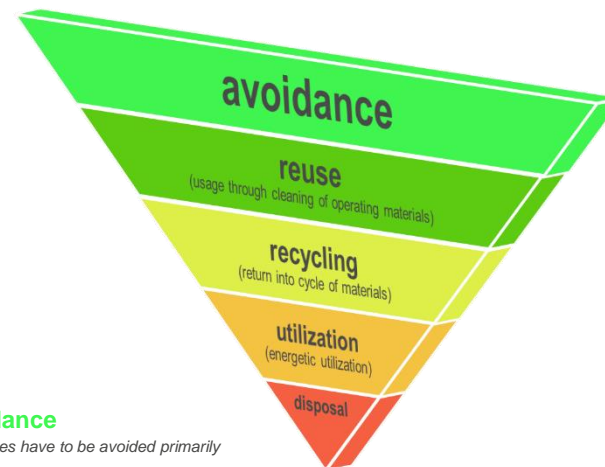

Processing and efforts of Preh

The promotion of a proper waste management is an essential part of the operational environment protection in each production location. Waste separation concepts are defined on local level based on the applicable legal regulations. Thereby the waste hierarchy (see chart) is essential for the prioritization of our waste concepts.

The following internal mechanisms are implemented to promote a proper waste management:

- Central waste parks in production locations
- Waste Supplier Audits
- Regular EHS trainings for employees
- Location instructions for visitors and business partner, incl. waste handling
- Continuous increase on waste type separation
- Awareness promotion for employees
- Reduction of packaging volume to reduce transport efforts
 - Cardboard compactor
 - Barrel compactor
 - Styrofoam compactor

waste hierarchy

1) avoidance

wastes have to be avoided primarily

2) reuse

if possible, operating materials can be reused by e.g. cleaning

3) recycling

wastes can be returned into cycle of materials through treatment processes

4) utilization

waste can be used for electricity generation within waste incineration plants

5) disposal

only when wastes can not be returned into cycle of materials or can set free pollutants during utilization due to their properties or can cause other risks, they have to be disposed

Waste Performance 2023

The overview shows the development of generated wastes of all Preh production locations, based on the waste reporting between Preh locations and the respective disposal and recycling companies. The hazardous wastes are classified based on country-specific regulations. Waste treatment methods are depending on the respective market and availability of local supplier.

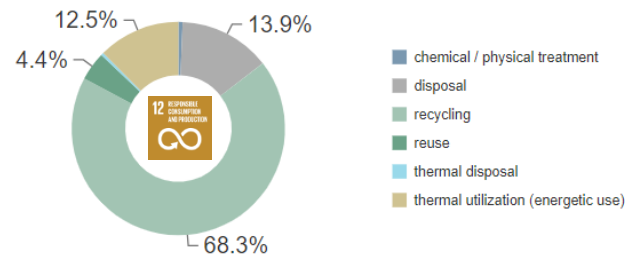

The increasing complexity of products, high demands for surface quality and assurance of functional safety are material parameters that influence our waste performance.

Main waste types out of production wastes from our corporate activities are:

- Plastic wastes (mainly thermoplastics) from injection molding and spray painting
- Packaging wastes (e.g. foil, cartons, wood packaging)
- Paint sludge and solvent rests (hazardous wastes)
- Electronic wastes (scrap from electronic production and assembly)

Environmental performance

Treatment method [t] - 2023

| Disclosures | 2021 | 2022 | 2023 |
|---------------------------|-------|-------|--------------|
| Generated waste [t] | 4,740 | 5,518 | 5,324 |
| Hazardous waste [t] | 752 | 932 | 906 |
| Hazardous Waste Ratio [%] | 16 | 17 | 17 |
| Total recycled waste [t] | 2,823 | 3,474 | 3,866 |
| Total recovered waste [t] | 4,138 | 4,848 | 4,564 |

Lean Six Sigma @ Preh

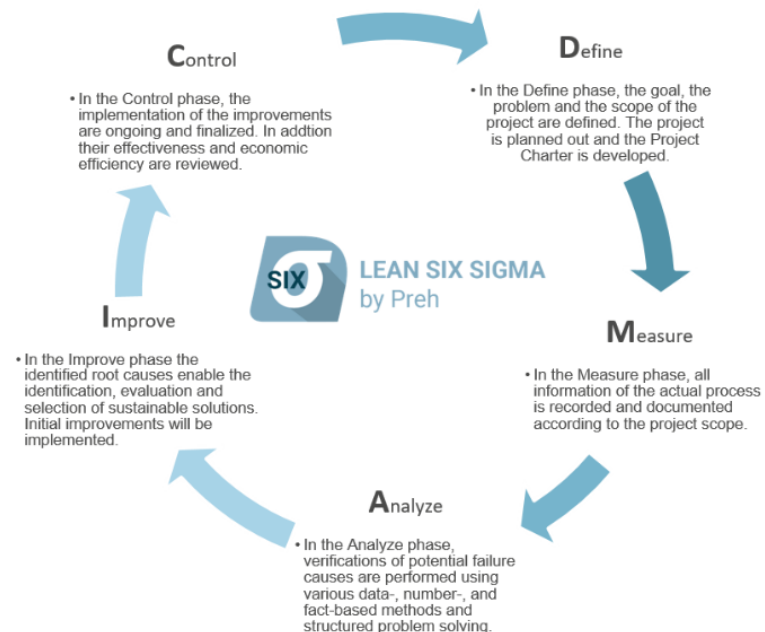

In 2022 the Management Board declared Preh to become a Six Sigma company, as Six Sigma is an essential mechanisms for optimization and continual improvement of corporate process efficiency. These optimizations in a respective pattern will give the opportunity to improve among others the environmental performance of specific projects as well processes.

Processing and efforts of Preh

The following steps had been realized in 2023 to promote Six Sigma in the Preh Group and to set a framework for our further processing:

- Implementation of Six Sigma Organization
- Global training of manager and employees in the Preh plants
- Planning and implementation of Six Sigma methodology for lighthouse projects focusing on scrap reduction during the series production

| Savings out of lighthouse project (climate control unit) | |
|--|-------|
| Electronic scrap (final products) | 3.8 t |
| Painted plastic components (scrap) | 1.3 t |

Waste Management – Injection Molding – Preh Group

Preh plants continuously process the transition of oil-based cooling of for thermal units of injection molding machines into water-based cooling. This stepwise transition leads a significant reduction of usage of fossil resources as well as the reduction hazardous wastes on a global level.

Circular Economy Material – Preh Group

In 2023 we developed our first HMI Control Unit as pilot project with the use of circular economy material. Thereby the usage of post-industrial thermoplastics (PC/ABS) will represent around 32% of the total plastic for the product. The usage of post-industry material is among others suitable for back covers and guiding frames. Thereby the carbon footprint of the used thermoplastics can be reduced by around 90%.

The start of production for this pilot project is planned for the calendar year 2025.

Corporate Principles

We respect our environment and implement actions to avoid negative impacts.

We established therefore the following principles for all production locations:

- prevention of air, water, soil and other pollutions
- reduction of resource consumption

Activities and efforts (extract)

We see water as a precious resource. The Preh production locations are monitoring and evaluating the water withdrawals for the responsible use of freshwater resource. With the help of monitoring by continuous implementation of meters for main consumers, we have the opportunity to identify the potential reductions and occurrences of unwanted wasting timely (e.g. potential leakages in pipes).

Fresh water is used at the Preh locations for:

- sanitary purpose
- humidification of production areas
- cooling of machines and equipment (e.g. air-compressors)
- production process (painting cabins in the paint shops)
- Irrigation of green areas

Water Risk Level evaluations are based on the *WRI Aqueduct Water Atlas* to identify areas with high water stress. All Preh production locations discharge water into municipal sewage system that require specific concentration limits of particles and there is no direct discharge into surface water bodies.

The main activities focus on the increase of transparency for the water withdrawal to identify and to react on potential irregularities:

- Water consumption got significantly decreased due to occurred pipe leakage in 2022 and decreased demand in Bad Neustadt
- Optimization of water recycling mechanisms (e.g. at Preh Mexico)

| Disclosures | 2021 | 2022 | 2023 |
|---|------|-----------|-----------|
| Total withdrawal of freshwater in Megaliters [MI] | 93 | 95 | 82 |
| Withdrawal in relation to turnover [m3 / 1 M€ TO] | 69 | 57 | 78 |
| Identified freshwater consumption in Megaliters [MI] | 16 | 22 | 3 |
| Identified withdrawal out of areas with high water risk in [%] | 49 | 43 | 41 |

Activities and efforts (extract)

In the frame of our corporate activities Preh locations do not discharge water directly into any surface waters. All types of wastewater are discharged into canalization for third party treatment, usually to municipal companies. Contaminated water that is generated due to processes (e.g. during spray painting) is collected and treated as waste for special treatment and are not declared as wastewater for discharge.

Nevertheless, it is essential to ensure that the discharged water is not contaminated with organic or inorganic pollutants, that have a negative environmental impact. Regular monitoring and measurement mechanisms are implemented to ensure that we comply with legal concentration limits of our wastewater as the following case study shows.

Case study – Preh Bad Neustadt:

At the Bad Neustadt location, regular water analyses are carried out on a voluntary quarterly basis by an independent accredited institute to ensure that the limits of the indirect discharger ordinance are not exceeded. Thereby the following technical standards apply:

Regular analysis of wastewater quality regarding metal and heavy metal contamination in the water take place based on the Standards DIN EN ISO 11885 / DIN EN ISO 12846 and DIN EN ISO 9562.

The concentration is below the determination value for an adequate measurement, therefore exact quantities are not reportable. The determination limits of the measurement devices demonstrate, that concentration limits are significantly below the allowed concentration limits.

| Disclosures (2023) * - 11/2023 | Cr Chromium | Ni Nickel | Hg Mercury | Cu Copper | AOX * |
|---|-------------|-----------|-------------|-----------|-------|
| Measured concentration [mg/l] | <0.005 | <0.005 | <0.001 | 0.05 | 0.02 |
| Maximum allowed limit – according to ordinance – [mg/l] | 0.5 | 0.5 | not defined | 0.5 | 1.0 |

* Adsorbable Organically bound halogens

Corporate Principles

At the Preh locations we strive for the improvement of our energy related performance by limiting our consumption and reduction of greenhouse gas emission by:

- analysis and evaluation of energy consumption
- implementation of realizable energy efficiency projects and usage of renewable energies
- participation in climate reporting initiatives
- procurement of electricity from certified renewable sources

Activities and efforts (extract)

The support of the “SDG – 13 Climate Action” by reduction of the energy demand and correlating Scope 1 and 2 emissions at our production locations will be realized by the following activities:

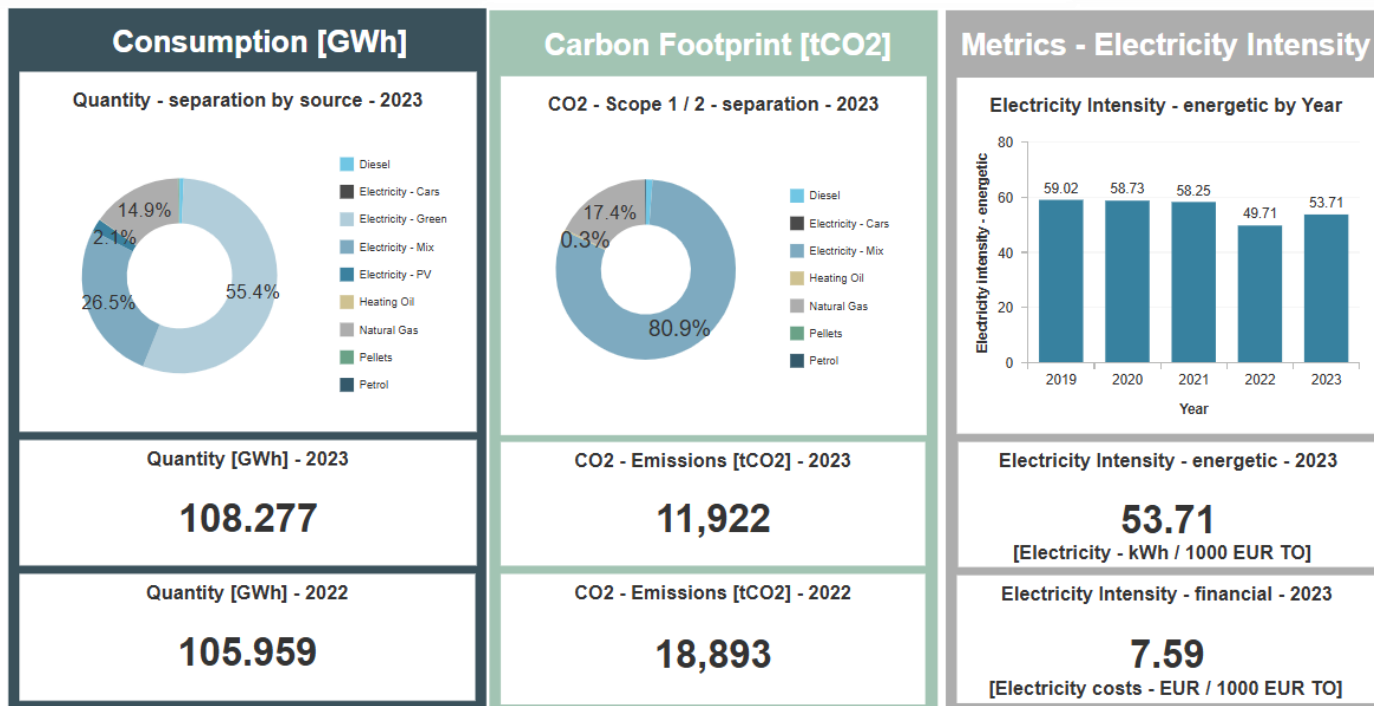

- Stepwise replacement of illumination to LED (all locations)
- Installation of rpm-controlled equipment (e.g. pumps and air compressors)
- Heat recovery from air compressors
- Replacement by energy efficient heat systems
- Replacement of refrigerants with decreased global warming potential (e.g. for climate chambers)
- Performance of energy efficiency audits (according to EN 16427-1) as well as implementation of Energy Management Systems according to (ISO 50001)
- Decarbonization studies for the reduction of Scope 1 and 2 emissions
- Installation of photovoltaic systems on facility grounds

Locations with 100 % renewable electricity until 2021

Target Location with 100 % renewable electricity in 2025

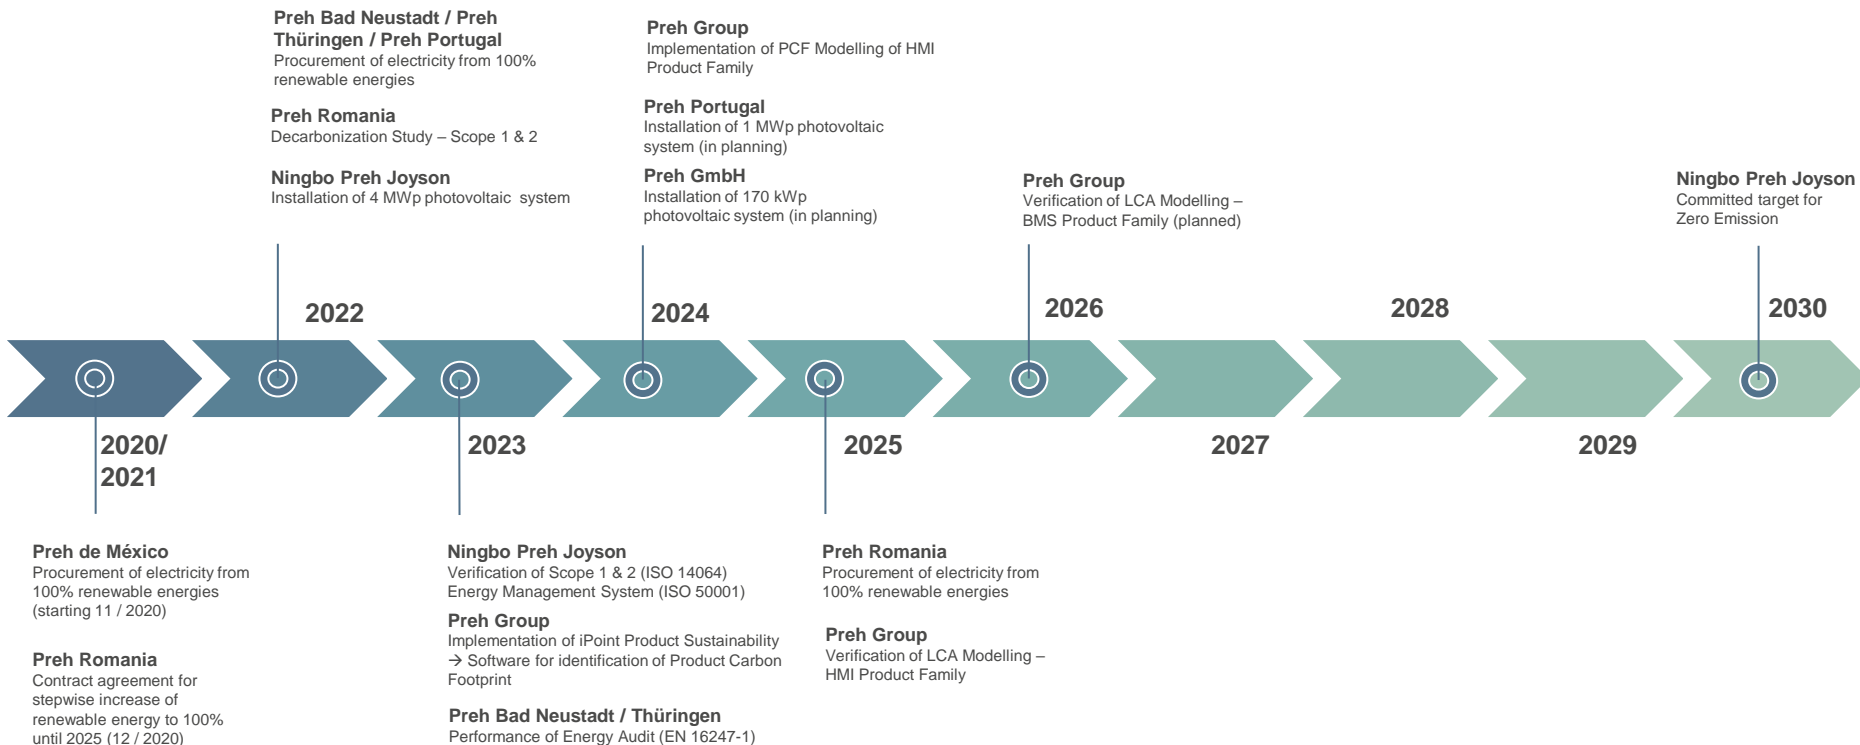

| Disclosure | 2021 | 2022 | 2023 |
|---|--------------------|------|-------|
| Consumed electricity in Preh production locations [MWh] | 84 | 87 | 91 |
| Percentage consumed electricity out of renewable energies [%] | 61 | 72 | 81 |
| Scope 1 & 2 GHG emission intensity [tCO ₂ / M€ Turnover] | 17 | 11 | 7 |
| Self-generated electricity [MWh] | no self-generation | 491 | 2,242 |

Energy performance

Electrical energy represents most of our consumption for business activities. In this course, the majority of our direct and indirect emissions are caused by electricity consumption. The majority of Scope 1 emissions are generated due to natural gas consumption, whereby heating of building is the main purpose. The calculation methodology is based on the Greenhouse Gas Protocol (market-based approach). The input of 53.71 kWh electrical energy are used to generate 1,000 € of Turnover. A slight positive trend during the last years is visible.

MILESTONES TO ELIMINATE DIRECT EMISSIONS

Injection Molding - Ningbo Preh Joyson Electronics Corporation

A centralized feed system for the injection molding shop was implemented in 2023 with an estimated savings of approximately 400 MWh. All dryers were centralized to optimize material flow and reduce heat loss in the area. This will significantly reduce the need for air conditioning in the production area.

Illumination system – Preh GmbH

In the assembly area at the Bad Neustadt site, around 740 conventional T8 tubes will be replaced by LEDs in early 2023. This will reduce the total electricity consumption for lighting alone by around 100 MWh in 2023.

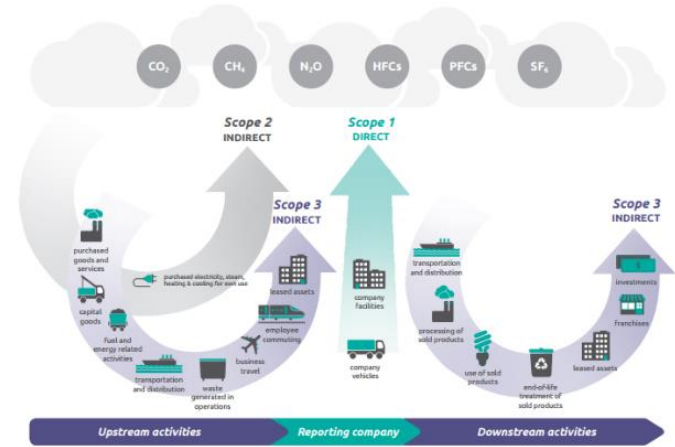

Activities at Preh:

As the disclosure of Scope 3 Emissions is an important aspect for comprehensive decarbonization strategies, it is essential to ensure transparency to receive a reliable database. Despite various external parameter that influence the availability and reliability of primary data, we focus on the following steps to improve the transparency and reliability of our value chain emissions:

- Analysis of feasible calculation methods and data acquisition for reliable reporting based on the GHG Protocol
- Determination of internal and external data sources and closure of data gaps
- Implementation of Product Carbon Footprint methodology (Verification planned in 2025)
- Preparation of GHG verification according to ISO 14064-1 (2023 Scope of Preh China)
- Digitization of information flows for activity data

The significant increase of the Emissions for Category 1 are based improved data availability in the reporting year 2023, which could not be disclosed in 2022. The focus was limited to procured plastic resin in 2022. The extension includes among others packaging, Aluminum die cast. The value represents the “status of identification”.

The increase of Category 7 is based on increased travel activities in 2023 after the limitations due to COVID-19 in 2022.

Source: www.ghgprotocol.org

| Scope 3 Emissions [tCO2e] | 2022 | 2023 |
|--|--------|--------|
| Category 1– Purchased goods and services (Average-Data-Method) | 14,860 | 27,722 |
| Category 7 – Business Trips (Distance-Based-Method) | 412 | 736 |

GHG Inventory

Based on internal analysis the following overview gives a status for the GHG emissions significance in relation to our identified Scope 1 and 2 emissions

Explanation - Category 3

All energy related activities are considered in Scope 1 and Scope 2 emissions. There are no further activities related to fuel or energy consumption relevant for scope 3 emissions.

Explanation - Category 10 - 12

Preh as Tier-1 or Tier-2 has no information about the use of our sold products by the final customer after the OEM. There is no feedback of the end customer about the behavior of our products in the field (during the utilization time). The Product Carbon Footprint requirements of our customer are focused on cradle-to-gate; therefore, the processing, use and end-of-life treatment of sold products is not relevant of the Scope 3 Emissions of Preh.

Explanation – Category 14

The Preh Group develops products directly for OEMs (respectively other TIER-1) and is not involved into franchise.

Explanation – Category 15

Preh is not classified as an investor (investing for profit) or as a provider of financial services. Therefore, this category does not apply to Preh.

| | Category | Description | Potential Importance |
|----|---|--|----------------------|
| 1 | Purchased Goods and Services | Extraction, production and transportation of goods and services purchased or acquired | very high |
| 2 | Capital Goods | Extraction, production and transportation of capital purchased or acquired | medium |
| 3 | Fuel and energy-related activities | Extraction, production and transportation of fuels and energy purchased (not under 1&2) | not applicable |
| 4 | Upstream transportation and distribution | Transportation and distribution of products purchased between Preh supplier and Preh (with vehicles not owned by Preh) | high |
| 5 | Waste treatment | Disposal and treatment of waste in operations | low |
| 6 | Business travel | Transportation of employees for business-related activities | low |
| 7 | Employee commuting | Transportation of employees between their home and Preh | low-medium |
| 8 | Upstream leased assets | Operations of assets leased and not included in scope 1 and 2, like development and sales offices | low |
| 9 | Downstream transportation and distribution | Transportation and distribution of products sold between Preh and customer | high |
| 10 | Processing of sold products | Processing of intermediate products sold by downstream companies (e.g. manufacturers) | not applicable |
| 11 | Use of sold products | End use of products and services sold | not applicable |
| 12 | End of life treatment of sold products | Waste disposal and treatment of products sold at the end of life | not applicable |
| 13 | Downstream leased assets | Operations in assets owned and leased to other entities | not applicable |
| 14 | Franchises | Operations of franchises | not applicable |
| 15 | Investments | Operations of investments (incl. Equity and dept investments) | not applicable |

Corporate Principles

The climate change related risks come along with either direct financial impact or limitation of our direct as well as indirect operations business continuity. The effects of climate change are being felt with varying intensity at both the local and global levels. Thereby a reliable risk and opportunities management is an important tool for our corporate development.

Management Approach

The risk identification and impact assessment is an essential basis to face potential negative impacts related to the climate change. If the influence or likelihood for specific events cannot be influenced by Preh itself, a proper response management is vital for the business continuity.

Within our risk management the following core risk categories are considered:

- Current and emerging regulations
- Legal, Technology & Market
- Acute and chronic physical

We participate annually in the Carbon Disclosure Project (CDP) to ensure a transparent dialog with our stakeholders on the risks and opportunities associated with climate change and our business development.

There were no significant changes in climate change related risks identified in 2023.

Identified risks (extract)

The following extract shows an overview of the identified climate change related risks with potential economical and business impact:

Current and emerging regulations

- **Pricing mechanisms** regarding market-specific carbon taxes with impact on operating costs.
- Violation of **reporting obligations** from stakeholder due to insufficient transparency or data reliability

Acute physical risks:

- **Heavy precipitation** events and increase of intensity of extratropical storms with impact on building infrastructure
- Increasing intensity of **typhoons** with impact to corporate and public infrastructure (especially in Asia Pacific)

Chronic Impacts

- **Changing temperature** with impact on operational costs for increased climatization efforts (heating and cooling).
- Limited freshwater availability due to local **water scarcity** (especially in areas with high rated water stress level according to the World Resource Institute (WRI))

Source: WRI Aqueduct (www.wri.org)

Climate change 2023:

Since 2017, the Carbon Disclosure Project has served as a tool to increase the transparency of our corporate activities to mitigate the impacts of climate change on the one hand, and to adapt to climate change as a company on the other. Our focus is on emission reduction activities within our direct operations. The Management (B-) score also demonstrates our ambition to mitigate the effects of climate change are effective.

Your CDP score

Average performance

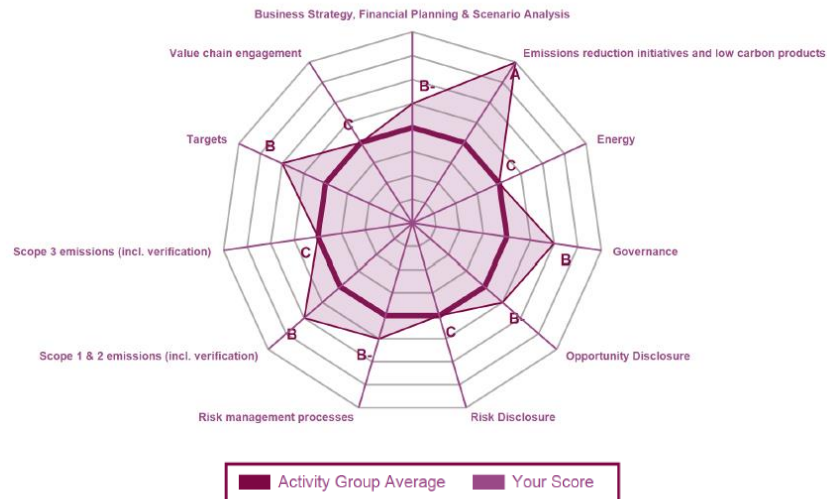

UNDERSTANDING YOUR SCORE REPORT

Preh GmbH received a B- which is in the Management band. This is lower than the Europe regional average of B, and higher than the Electrical & electronic equipment sector average of C.

- Leadership (A/A-):** Implementing current best practices
- Management (B/B-):** Taking coordinated action on climate issues
- Awareness (C/C-):** Knowledge of impacts on, and of, climate issues
- Disclosure (D/D-):** Transparent about climate issues

CATEGORY SCORES

Water security 2023:

Our business activities and product dependencies are economically and physically not water-intensive. The availability of fresh water is an essential part of our daily business at various activities. An internal risk and opportunity management system and regular monitoring serve as the basis for ensuring our business continuity. The Management (B-) scoring serves as indicator, that our approach to mitigate water related risks and to promote water related opportunities are effective.

- Disclosure (D/D-):** Transparent about water issues

CATEGORY SCORES

Corporate Principles

The Preh Group commits to comply with the International Standards for Phytosanitary Measures No. 15 (ISPM 15). Therefore, the Preh Group implemented internal mechanisms to ensure the compliance as described in the following based on the EHS Policy of the Preh Group:

Stage 1: Integration of the compliance obligations

External requirements will be regularly analyzed and evaluated by central and local quality functions to determine compliance obligations. These compliance obligations will be implemented into the integrated management system and employees will be trained afterwards.

Stage 2: Regular audits and legal checks

Internal system audits according to ISO 14001 will be regularly performed by the central quality functions at all production locations of the Preh Group in combination with legal compliance audits. Regular inspections will be additionally performed by the respective departments, e.g. logistics department.

Stage 3: Supply chain responsibility

All supplier of the Preh Group have to ensure the compliance with ISPM 15 for international transports according to the Preh Supplier Manual. Central and local quality functions perform on-site audits at locations of production material supplier as well as packaging material supplier.

Activities and efforts (extract):

As a global acting company, we are involved in the international trade with our business partner. The implementation of phytosanitary measures is an integrated mechanism in our logistics process with the focus on wood packaging to avoid the spread of pests. Therefore, all our wood packaging for the international trade are according to the ISPM 15 (International Standard of Phytosanitary measures).

Internal Regulations

- Commitment Letter Phytosanitary measures
- Assessment – ISPM 15 Compliance
- Monitoring of potential incidents
(monitoring of improper declared or contaminated packaging)
- Globally standardized training materials
- Certificate check and audits at wood packaging suppliers

| Disclosures | 2021 | 2022 | 2023 |
|---|------|------|------------|
| Percentage of approved supplier according to the respective National Plant Protection Organization (NPPO) [%] | 100 | 100 | 100 |
| Number of incidents with non-compliance to ISPM 15 | 0 | 0 | 0 |

Disclosures – Protection Areas (Saalewiesen)

| | |
|--|--|
| Geographic location | Bad Neustadt a. d. Saale, Germany |
| Surface | shell limestone (coquina) |
| Biodiversity value characterized by the attribute of the protected area | Terrestrial |
| Classification of the area | IUCN-Category IV – Habitat / Species Management Area No. NSG-00567.0 |

Preh company grounds

| | |
|---|----------------------------------|
| Position in relation to protected area | adjacent |
| Type of operation | Administration and manufacturing |
| Size of manufacturing site | 46,000 m ² |

In 2023 no negative impacts to the adjacent natural protection area (Saalewiesen) had been identified out of our business activities neither external complaints arose.

Corporate Principles:

The Preh portfolio is subject to a range of complexities in terms of functional and optical requirements from our customers. While product compliance and product safety have the highest priority, the continuous and proactive reduction of environmental impacts during the product life cycle is an essential step to meet new business awards to meet our customer expectations in the future.

Activities and efforts (extract):

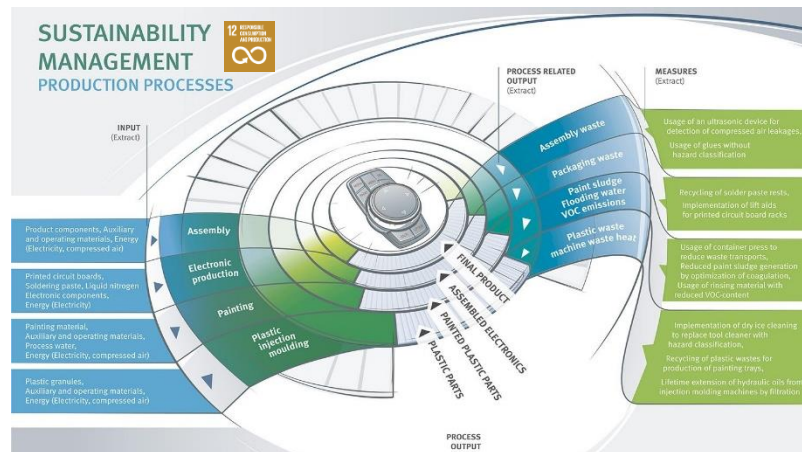

We are continuously reviewing possibilities to support the “SDG 12 – Responsible Consumption and Production” in regards of our production portfolio. For continuous improvement by efficiency increase and mitigation of environmental impacts at running production the following key aspects apply:

- Reduction of Greenhouse Gas Emissions (e.g., by usage of renewable energies)
- Implementation of scrap reduction projects for pre-production and assembly
- Promotion of internal recycling processes (e.g. solvent recycling)
- Regular exchange with supplier for technical feasibility of sustainability aspects for raw and production materials.

Where technically feasible, we prioritize for new projects:

- Performance of product life cycle assessment / product carbon footprint studies on a software-based solution planned
- Promotion of circular economy materials usage (focus on plastic and metal)

Thereby the possibilities for usage of sustainable material will be evaluated under consideration of product safety and product conformity, which are assured in any case.

| Disclosures | 2022 | 2023 |
|--|--------------|------|
| Consumption of identified post-industry material for products [t] | 1 | 1 |
| Percentage of identified recyclable packaging for products (returnable packaging excluded) [%] | Not reported | 68% |

A handshaking business deal with digital data overlays. The background is a dark, blue-toned image of two hands shaking, symbolizing a business agreement. Overlaid on this are various digital elements: a large white number '4' on the left, a glowing orange line graph with data points, a bar chart at the bottom, and a table with some text on the right. The overall aesthetic is futuristic and data-driven.

4

BUSINESS ETHICS AND PRACTICES

Description:

The reputation and success of our company will be influenced by the behavior of every Preh employee. The rules defined in our Code of Conduct oblige every employee for the compliance with applicable laws, regulations and internal standards and build the framework for every employees' principles of conduct.

Potential violations against applicable regulations and standards need to be detected, processed and remedied in a timely manner to prevent damages against our company, our employees and business partner. For that purpose, the Preh GmbH implemented a whistleblower system, that receives concrete indications of a potential misbehavior of employees of the Preh Group.

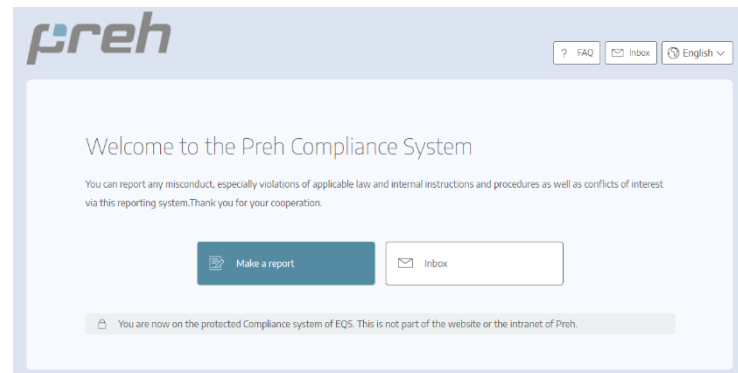

In 4th Quarter of 2021, the Preh Integrity Line had been implemented as a mechanism for advice and concerns. Thereby among others the following topics are covered by the Preh Integrity Line:

- Anti-Trust
- Information security, data protection
- Unethical behavior
- Conflict of interests
- Environment, health and safety
- Child work, forced labor

The Preh integrity activities are established to ensure equal opportunities for all employees. Internal trainings will be connected to the Preh Trainings Center to ensure that each employee is familiar with the mechanism. Each new employee receives an instruction of the Code of Conduct during onboarding. The Integrity Line serves as an anonymous reporting mechanism that ensures non-retaliation for the submitter.

The Preh Integrity Line is supported by the EQS Group and is available for internal and external concerns under:

<https://www.preh.com/compliance>

| Disclosures | 2021 | 2022 | 2023 |
|---|------|------|------|
| Number of justified submitted complaints regarding violations via Preh Integrity Line | 0 | 0 | 0 |

Corporate Principles:

As part of our corporate duty of care and with regard to complying with the principles of information security, the information security policy defines our Information Security Management System.

Preh's information security protection objectives are part of the company's overall objectives. These include:

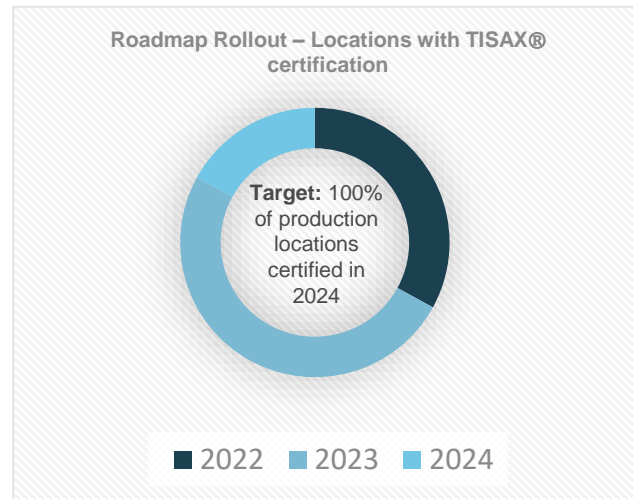

- **Confidentiality:** We ensure that information is only accessible to a certain group of people for which it is intended and that they handle it responsibly.
- **Integrity:** We ensure that information cannot be modified or that it is possible to determine reliably when alterations have been made.
- **Availability:** We ensure that information is available in the right place at the right time.

The aim of Preh is to protect adequately all information with respect to its need for protection over the entire lifetime of the information. "Adequate" means that all activities aimed at protecting the information must be based on economic considerations, measured in terms of the need for protection.

Activities and efforts of Preh (extract):

The following mechanisms have been established to ensure an adequate handling of information:

- Integration of information security organization and information security management system (ISMS)
- Establishing of an Information security policy – Preh Group
- Regular trainings for employees regarding information security and data protection
- Certification of TISAX® (Trusted Information Security Assessment Exchange) for Preh Bad Neustadt
- Successful certification of TISAX® at the production plant Trofa (Portugal) and Ningbo (China)

| Disclosures | 2021 | 2022 | 2023 |
|--|------|------|------|
| Percentage of production locations with an implemented TISAX® certification [%] | 17 | 34 | 66 |
| Percentage of employees performed the Information Security and Awareness Training (HQ: Bad Neustadt) [%] | 96 | 93 | 99 |

Note: TISAX® is a registered trademark of the ENX Association.

PRODUCT CONFORMITY AND PRODUCT SAFETY

Corporate Principles:

It is our responsibility to avoid risks regarding safety, health and environment during usage of our products. Therefore, legal and regulatory requirements are considered as the minimum standard for our products. Furthermore, the understanding of the requirements of our customers is a further essential component during product development process for fulfillment of these obligations. Our ambitious standards for quality assurance and manufacturing are implemented globally by our employees from development up to the delivery of the serial product. We ensure the compliance with the requirements regarding safety, functionality, appearance and material conformity of our products by internal processes and extensive tests. Our standard gets confirmed externally by regular awards of our customers and by successful certification of our management system regarding quality, environment and occupational health and safety as well as information security.

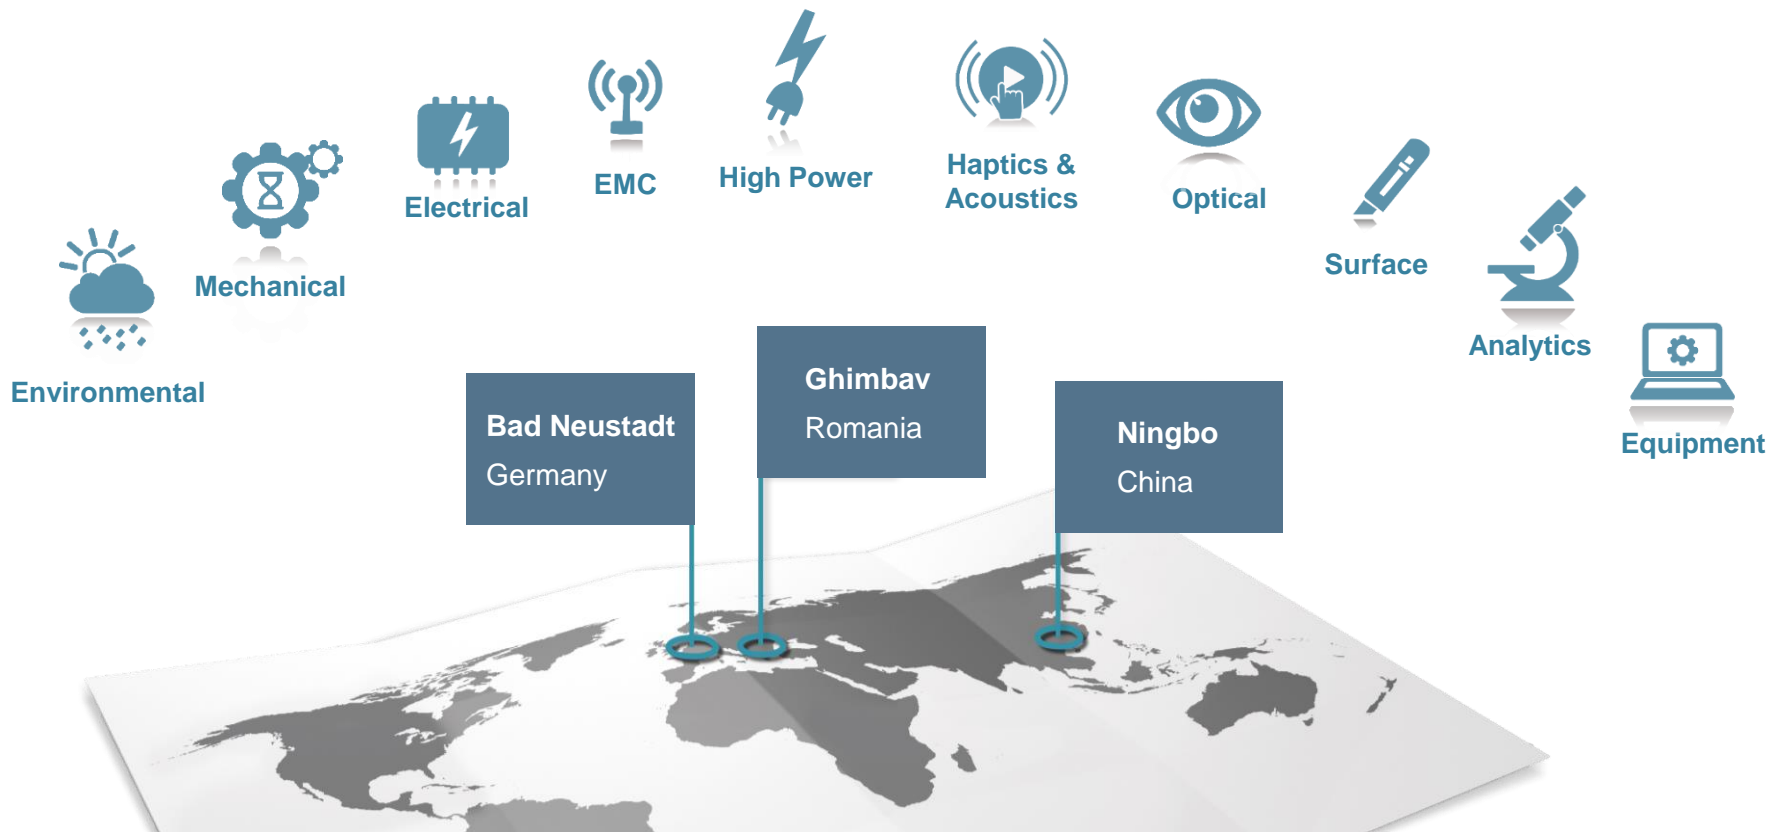

Activities and efforts of Preh (extract):

The following mechanisms have been established to ensure product conformity and safety:

- Certification of automotive-specific quality management systems according to IATF 16949
- Material Compliance Management to ensure that restricted materials are excluded in our products
- Declaration of materials on our products (e.g. plastic components) according to VDA 260 to promote the reusability and recyclability of components at the product end-of-life. We furthermore promote the dismantling and disassembling as far as the functional product requirements allow it
- Functional Safety Assessments based on the ISO 26262 series
- Wide range of internal test methods to validate our products (e.g. surface testing, environmental testing)
- Accreditation according to ISO/IEC 17025 for among others Electromagnetic Compatibility at the location Bad Neustadt

| Disclosures | 2022 | 2023 |
|---|-----------------|------------------|
| Percentage of production locations with IATF 16949 certification [%] | 100 | 100 |
| Number of products with recalls due to impact of passenger safety [-] | 0 | 0 |
| Response rate of handling customer complaints [%] | 100 | 100 |
| Average external customer satisfaction (Internal Rating System) | 4 (out of 5) | 44 (out of 5) |

Corporate Principles:

In particular, every employee is obliged to observe and adhere to the rules of fair competition. This means, that employees may not enter into discussions with competitors which have the objective or effect of restricting competition. No benefits of any kind may be granted by Preh Group staff to public officials or employees of other companies, with the objective of obtaining orders or unfair advantages for the Preh Group or any other person. This is assumed to be the case in particular when the type and extent of the benefit is such that it may affect the recipient's actions and decisions in an unauthorized manner. In accordance with applicable law and our internal guidelines, courtesy gifts may be administered in line with generally accepted business practices.

Such gifts must be of a size and type that does not force the recipient into a binding obligation. Business and project-related travel expenses will only be refunded to officials and non-officials to an extent deemed appropriate. The applicable legal provisions must be observed. Gifts from business partners are, to a certain extent, in line with generally accepted business practices. However, no employee may use his/her position or function in the company to demand, accept or otherwise obtain personal benefits. Occasional gifts of low value may be accepted. Any larger gifts or other benefits granted to an employee or related persons must be refused at all times. In such cases, employees are obliged to inform their superiors about the offer of gifts or benefits.

According to our Compliance Regulation it is strictly prohibited:

- to offer, promise or grant local and foreign officials a personal benefit for providing or refraining from an official act,
- to offer, promise or grant employees or representative of local or foreign companies unlawful personal benefits,
- to have others offer bribes, for example relatives, friends, agents, consultants, planners and middlemen,
- to support unlawful acts by other persons.

The Preh Group only works with serious business partners that act in accordance with the laws and do not use any illegal financial resources.

Activities and efforts of Preh (extract):

C-SOX (CHINESE-SARBANES-OXLEY ACT)

Internal Control is based on Sarbanes-Oxley (SOX) Act. SOX came into force in the USA in 2002 as a result of various accounting scandals. Since 2011 Preh is part of the Joyson Group with headquarter in China. All companies which are listed in the main board of the Shanghai Stock Exchange have to comply with **C-SOX**, China's version of SOX.

SOX was designed for implementing accounting and disclosure requirements that:

- Increase transparency in corporate governance and financial reporting.
- Create a formalized system of **internal checks**.

Preh Internal Control

An internal control is any action taken by management to enhance the likelihood that established objectives and goals will be achieved

- Effectiveness and efficiency of operations
- Reliability of financial reporting
- Compliance with applicable laws and regulations

| Disclosures | 2021 | 2022 | 2023 |
|--|------|------|------|
| Total number of operations assessed for risks related to corruption: | 0 | 0 | 0 |
| Percentage of operations assessed for risks related to corruption [%] | 0 | 0 | 0 |
| Percentage of relevant employees with performed data anti-fraud trainings (headquarter Bad Neustadt) [%] | 93 | 87 | 100 |

EcoVadis – ESG Rating:

Preh Group decided to join the EcoVadis platform for the benchmark in an ESG-Rating (Environmental, Social and Governance).

The EcoVadis rating is used at Preh to identify opportunities for improvement to achieve our strategic goal "Attractive Employer".

We furthermore have also the possibility to share our progress directly to all requesting customers to demonstrate the effectiveness of our efforts to promote a sustainable acting.

| EcoVadis | 2021 | 2022 | 2024 |
|----------|--------|--------|--------|
| Score | 52 | 59 | 69 |
| Rating | bronze | silver | silver |

Note: The 2023 rating process got finalized in 2024

NQC – SAQ 5.0

The NQC SAQ 4.0 (Self-Assessment Questionnaire) is a mechanism to demonstrate our automotive customers that we follow the guiding principles to improve sustainability in the automotive supply chain. The implementation and improvement of the guiding principles are an essential part for a partnership. The update to the SAQ 5.0 is an essential step for the customer communication of our development in the calendar year 2023.

| NQC SAQ 5.0 | Preh GmbH | Preh Thüringen | Preh Portugal | Preh Romania | Preh Mexico | Ningbo Preh Joyson |
|-------------|-----------|----------------|---------------|--------------|-------------|--------------------|
| Score | B88 | B87 | B87 | B88 | B88 | B92 |

Responsible Business Alliance (RBA)

In addition to ESG ratings and self-assessments, our factories are also audited on-site to ensure compliance with human rights and working conditions in our factories. In 2023, our Ningbo factory was audited by a third party for the Responsible Business Alliance and received a silver rating.

The background features a dark blue world map with glowing nodes and connecting lines, overlaid on a blurred image of a port with shipping containers and cranes. A large white number '5' is positioned on the left side of the image.

5

**SUPPLY CHAIN
ENGAGEMENT**

Types of active supplier engaged

- Electronics
- Mechanis
- others
- Service & Invests

Total turnover with active supplier

- Direct
- Indirect

Geographic location of active suppliers

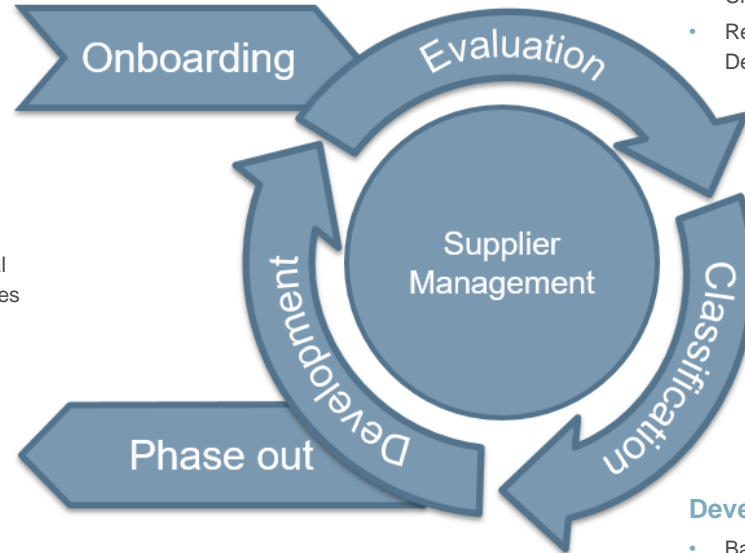

- Asia
- Europe
- America

A reliable business relationship with our supplier and service provider is essential for our success.
There were no significant changes in the supply chain identified.

Onboarding

- Potential-Analysis acc. VDA 6.3 regarding quality issues combined with specific Preh Risk Assessment for:
 - Environment
 - Occupational Health and Safety
 - Human Rights
 - Forced and Child labor
 - Anti-Corruption & Bribery
 - Supply Chain Responsibility
- Supplier contract management (several contracts) with requirements / references to various management systems (e.g. IATF 16949 / ISO 14001 / ISO 45001)

Escalation & Phase out

- Escalation acc. defined escalation procedure (escalation levels)
- Depending on result return to daily business (de-escalation) or NBOH (no new business) up to Supplier phase out

Evaluation & Classification

- Continuous evaluation of performance of active suppliers
- Classification of suppliers
- Regular reporting to suppliers (follow up by Supplier Development)

Development

- Based on Supplier Evaluation
- Based on event driven issues
- Case specific actions (e.g. trainings, audits, ...)
- If required initiate escalation/phase out procedure

Management approach:

In a global supply chain, countries show a wide range of development in environmental protection, social conditions and the respect of human rights. Various country risk indices serve as a valuable basis for supplier selection as well as the basis for the focus of the CSR rating during potential analysis of new supplier locations. Thereby we cover the essential topics environmental protection, respect for human rights and working conditions.

All countries that represent active supplier are regularly reviewed regarding the development of the following internationally comparable indices:

- Global Slavery Index (Walk Free Foundation)
- ITUC Global Rights Index (International Trade Union Foundation)
- Environmental Performance Index (Yale Center for Environmental Law & Policy)
- Human Development Index (United Nations Development Programme)

Activities and efforts of Preh (extract):

The development of our supply chain is an essential key for business success. Sustainable procurement has a significant impact for our production process. We implemented the following internal mechanisms:

- Establishing of CSR Risks assessment for Supplier (Focus: Environmental, Social and Governance)
- Implementation of CSR Guidelines for global Supplier Quality Developers
- Regular supplier evaluation (based on internal evaluation scheme)
- Conflict Minerals Reporting and Cobalt Reporting
- New onboarding system for supplier with adapted ESG Requirements

| Disclosures | 2022 | 2023 |
|--|------|------|
| Number of performed CSR Risk Assessments (Potential Analysis) | 65 | 49 |
| Supplier identified with significant risks to incidents of human rights violations (out of performed CSR Risk Assessments) | 0 | 0 |
| Percentage of suppliers with IATF 16949 Certificate (out of turnover related core supplier) [%] | 53 | 68 |
| Percentage of suppliers with ISO 14001 Certificate (out of turnover related core supplier) [%] | 30 | 59 |
| Percentage of suppliers with ISO 45001 Certificate (out of turnover related core supplier) [%] | 30 | 59 |

Corporate Principles

While Preh does not source any Conflict Minerals from the DRC and the Covered Countries directly, such Conflict Materials may exist in the products, materials and components that the Preh Group sources from its suppliers. Preh is committed to engage its suppliers for a responsible sourcing of the materials and components Preh processes in its products.

Preh is committed to the Conflict Minerals reporting requirements of our customers prior to the deadlines. Preh is working with suppliers to perform the necessary due diligence in determining the potential for Conflict Minerals in our supply chain.

Activities and efforts of Preh (extract):

Our Responsible Sourcing Policy serves as commitment between Supplier and Preh to identify the origin of Conflict Minerals. Preh is evaluating the origin of 3TG with the Conflict Minerals Reporting Template and submits the information to requesting customers to ensure the compliant sourcing throughout our value chain.

We established among others the following contractual documentation for the promotion of a sustainable procurement in our supply chain:

- Master Supply Contract
- Supplier Code of Conduct
- Responsible Sourcing Policy

Furthermore, we supplemented our reporting by the *Extended Minerals Reporting* to establish transparency for minerals Cobalt and Mica in our products.

| Disclosures | 2021 | 2022 | 2023 |
|--|------|------|------|
| Number of identified 3TG smelters along the supply chain | 234 | 249 | 235 |
| Ratio of smelters compliant to Responsible Minerals Initiative [%] | 100 | 100 | 100 |
| Disclosure rate of supply chain 3TG [%] | 67 | 79 | 63 |
