26. Overview of the entity's material responsible business conduct issues:

Please indicate material responsible business conduct and sustainability issues pertaining to environmental and social matters that present a risk or an opportunity to your business, rationale for identifying the same, approach to adapt or mitigate the risk along-with its financial implications, as per the following format:

Sr. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk / opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
1	Energy Management	Risk/ Opportunity	<p>Energy plays a vital role in the core manufacturing operations of the Company, particularly in high-consumption processes such as drawing, annealing, and enamelling. Given the scale and intensity of energy use, it presents both a critical risk and a strategic opportunity.</p> <p>On the risk front, fluctuations in energy prices, potential supply disruptions, and increasing regulatory requirements on emissions and energy efficiency can significantly impact production continuity and cost structures. At the same time, energy presents an opportunity to drive operational excellence, cost savings, and environmental stewardship through the adoption of energy-efficient technologies, process optimization, and integration of renewable energy sources.</p>	<p>The Company has undertaken a structured approach to reduce energy-related risks by integrating energy-efficient technologies and upgrading its production systems to lower energy intensity across operations. The company is also progressing towards cleaner energy alternatives through the installation of rooftop solar systems and the exploration of long-term renewable energy procurement strategies.</p>	<p>Negative: Higher initial capital expenditure.</p> <p>Positive: Long-term cost savings on energy consumption.</p>
2	Waste Management	Risk	<p>Waste management is a risk owing to the generation of metal scrap, insulation waste, and hazardous by-products in the manufacturing units. Improper handling and disposal of these wastes can lead to environmental pollution, increased operational costs and regulatory non-compliance such as the Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016, and the Solid Waste Management Rules, 2016.</p>	<p>The Company follows a structured Reuse-Recycle-Disposal Waste Management Policy, ensuring safe segregation, recycling, and disposal of all waste in compliance with environmental regulations.</p> <p>Hazardous waste, such as chemical sludge from wastewater is treated using ETP and STP plants. Contaminated cotton rags and used oil are handed over to government approved disposers.</p> <p>Employee training programs further support waste minimization and promote sustainable practices across operations.</p>	<p>Negative: Waste mismanagement can lead to significant financial risks through regulatory penalties, increased disposal costs, and potential liabilities from environmental damage.</p>
3	Occupational Health & Safety	Risk	<p>Operational health and safety is a critical risk in our manufacturing units due to the nature of manufacturing processes involving equipment operating on a high temperature, and heavy machinery. These conditions pose potential hazards to worker safety if not properly managed.</p>	<p>The Company actively promotes a culture of safety by strengthening workplace safety policies, conducting regular training programs, and adopting globally recognized best practices to safeguard employee well-being.</p> <p>Our facilities are ISO 45001 certified, underscoring our adherence to international occupational health and safety standards. We also implement proactive measures such as Hazard Identification and Risk Assessment (HIRA) to identify, evaluate, and mitigate potential risks within our operations.</p>	<p>Negative: Poor occupational health and safety (OHS) practices can result in financial risks due to workplace accidents, legal liabilities, compensation claims, and potential disruptions to operations.</p>

7.	Statement by the director responsible for the business responsibility report, highlighting ESG related challenges, targets and achievements.	<p>At Ram Ratna Wires Ltd, we recognize the growing importance of environmental, social, and governance (ESG) factors in shaping the future of our business and the industry at large. As we navigate an evolving regulatory landscape and increasing stakeholder expectations, we remain committed to embedding sustainability into our core operations. One of the key challenges we face is the transition towards a low-carbon economy, requiring us to optimize energy efficiency, enhance resource conservation, and explore sustainable sourcing. Additionally, ensuring responsible supply chain practices and maintaining high standards of employee health, safety, and well-being remain critical priorities.</p> <p>Despite these challenges, we have made significant strides in our ESG journey. Our recent initiatives include investments in renewable energy, the adoption of eco-friendly manufacturing practices, and a stronger focus on circular economy principles. Socially, we continue to support employee welfare programs, skill development initiatives, and community engagement activities. On the governance front, we have strengthened our policies on ethical business conduct, transparency, and risk management to ensure accountability at all levels. Looking ahead, we have set ambitious targets to further enhance our ESG commitments. These include measurable reductions in our carbon footprint, increased utilization of sustainable materials, enhanced workplace diversity, and stronger supplier due diligence mechanisms. Through these efforts, we aim to align our growth strategy with global sustainability goals and create long-term value for our stakeholders.</p>

10. Health and safety management system

- a. **Whether an occupational health and safety management system has been implemented by the entity? (Yes/ No). If yes, the coverage of such a system?**

Yes, the Company has established an Occupational Health and Safety (OHAS) management system aligned with the internationally recognized ISO 45001:2018 standard. It is uniformly implemented across all units.

- b. **What are the processes used to identify work-related hazards and assess risks on a routine and non-routine basis by the entity?**

The Company is committed to ensuring a safe and healthy working environment by implementing a structured Occupational Health and Safety (OH&S) Management System. This framework is designed to identify, assess, and manage work-related hazards and risks associated with both routine and non-routine operations. A key component of this system is the biannual conduct of Hazard Identification and Risk Assessment (HIRA) exercises across all operational sites, enabling proactive detection and control of potential risks. Regular workplace safety assessments, compliance monitoring with applicable legal and regulatory requirements, and targeted initiatives to reduce manual handling risks further strengthen the Company's approach. These processes are aligned with the Company's OH&S objectives and are reviewed periodically to ensure continuous improvement in workplace health and safety performance.

c. Whether you have processes for workers to report the work-related hazards and to remove themselves from such risks? (Y/N)

The Company follows a structured and proactive approach to identifying work-related hazards and assessing associated risks across both routine and non-routine operations. A risk evaluation methodology is employed through HIRA to systematically examine potential sources of harm, considering both the likelihood and impact of incidents, and to establish appropriate preventive and control measures. Visual safety tools such as informative signage, floor indicators, and awareness materials are strategically placed across operational areas to promote safety-conscious behaviour and enable instant recognition of potential hazards. In addition, internal safety audits and inspections are conducted at planned intervals to assess the effectiveness of existing safety controls and to identify any gaps or emerging risks, thereby supporting continuous improvement in workplace safety management.

d. Do the employees/ workers of the entity have access to non-occupational medical and healthcare services? (Yes/No)

5. Has the entity implemented a mechanism for Zero Liquid Discharge? If yes, provide details of its coverage and implementation.

Yes. The Company is committed to sustainable water management and operates with robust Effluent Treatment Plants (ETPs) and Sewage Treatment Plants (STPs) across its facilities. Domestic wastewater from restrooms are effectively treated through STPs, while industrial effluents are processed through ETPs in accordance with regulatory standards. Treated water from STPs is sustainably reused for non-potable purposes such as flushing and gardening, ensuring zero liquid discharge beyond the premises. The Company's manufacturing units strictly adhere to all applicable environmental guidelines reflecting our proactive approach to responsible water stewardship and environmental compliance.

6. Please provide details of air emissions (other than GHG emissions) by the entity, in the following format:

**Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency? (Y/N)
If yes, name of the external agency.**

Yes, the independent assessment has been carried out by Net Zero Pro Solutions Pvt. Ltd.

8. Does the entity have any project related to reducing Green House Gas emission? If Yes, then provide details.

The Company has undertaken a comprehensive range of initiatives to reduce its greenhouse gas (GHG) emissions by enhancing energy efficiency, optimizing energy usage, and integrating renewable energy solutions into its operations. These efforts align with the Company's commitment to sustainable manufacturing and reducing its environmental footprint.

Key initiatives undertaken include:

1. Installation of Renewable Energy Plants:

In line with its renewable energy transition goals, the Company has installed 1350 kW solar power plants and 2.1 MW of wind energy significantly reducing dependency on grid-based electricity and contributing to lower Scope 2 emissions. This initiative directly offsets a substantial portion of the facility's electricity consumption with clean, renewable energy.

2. Energy Monitoring through Automation:

The Company has implemented automated daily energy monitoring via ERP systems, which capture real-time power consumption data from machine panels. This allows for continuous tracking and immediate corrective action when deviations occur. This initiative led to a notable 14% reduction in electricity consumption per kilogram of production, reflecting improved energy efficiency and reduced emissions.

3. Heat Recovery Systems:

The Company captures waste heat from electrical furnaces using heat exchangers. This recovered heat is utilized for generating steam required in the copper annealing process, thus optimizing thermal efficiency and reducing reliance on additional energy sources

4. Wind-Powered Ventilation Systems:

By installing MS roof ventilator mechanical fans, the Company uses natural wind for ventilation, eliminating the need for electrically operated air circulation systems and lowering overall energy demand.

5. Natural Daylight Utilization:

Acrylic rooftop sheets have been installed to enhance the penetration of natural sunlight into workspaces, significantly reducing the need for artificial lighting during daytime operations.

6. Smart Lighting Solutions:

The Company has adopted energy-efficient LED lighting with motion sensors, ensuring lights are used only when necessary. Furthermore, individual LED lighting at workstations allows operators to manage lighting needs independently, avoiding wastage.

7. High-Efficiency Equipment:

The Company selects BEE-rated motors and electrical equipment with a minimum of three stars to ensure energy-efficient operations, reducing electricity consumption and associated emissions.

These integrated projects reflect the Company's proactive approach to GHG emission reduction through clean energy adoption, process optimization, and technology-driven energy management. The Company remains committed to expanding its renewable energy portfolio and improving energy performance as part of its long-term sustainability strategy.

9. Provide details related to waste management by the entity, in the following format:

10. Briefly describe the waste management practices adopted in your establishments. Describe the strategy adopted by your company to reduce usage of hazardous and toxic chemicals in your products and processes and the practices adopted to manage such wastes.

The Company is committed to sustainable operations through the prevention of waste generation, optimal resource utilization, and adherence to global environmental and safety standards. The Company promotes responsible consumption of water, electricity, food, and raw materials across its facilities, embedding sustainability in all phases of its manufacturing lifecycle.

1. Effluent and Sewage Treatment Systems

The Company is equipped with advanced Effluent Treatment Plants (ETPs) and Sewage Treatment Plants (STPs) to manage industrial and domestic wastewater, respectively. While wastewater from operations is treated in ETPs, domestic wastewater from toilets and canteens is processed through STPs. Treated water is reused within the premises for flushing and gardening activities, resulting in zero liquid discharge outside the plant and ensuring full compliance with regulatory norms set by environmental authorities.

2. Comprehensive Waste Management Policy: Reuse, Recycle, and Responsible Disposal

The Company has implemented a robust Waste Management Policy that focuses on the 3 Rs- Reuse, Recycle, and Responsible Disposal. The policy ensures safe segregation, reclamation, and disposal of hazardous and non-hazardous waste, with a strong emphasis on environmental protection and circularity.

3. Non-Hazardous Waste Handling

- Food Waste is composted at site.
- Other than above waste are sent to authorized recycling agencies.

4. Hazardous Waste Handling

Hazardous wastes such as cotton rags, used oil and ETP sludge are handled and disposed of through authorised agencies, following government approved hazardous waste guidelines.

5. Plastic Waste Management

All plastic waste, particularly from packaging, is treated as environmentally sensitive and is segregated, collected, and disposed of through authorized vendors to align with Plastic Waste Management Rules.

6. E-Waste Handling

Potential e-waste is managed under the Company's comprehensive waste management framework and is disposed of responsibly through authorized e-waste handlers in line with relevant laws.

7. Employee Engagement and Awareness

The Company actively conducts training and awareness programs to sensitize employees on sustainable practices such as efficient resource use, proper waste segregation, safe chemical handling, and compliance with environmental standards.

11. If the entity has operations/offices in/around ecologically sensitive areas (such as national parks, wildlife sanctuaries, biosphere reserves, wetlands, biodiversity hotspots, forests, coastal regulation zones etc.) where environmental approvals / clearances are required, please specify details in the following format:

Sr. No.	Location of operations/offices	Type of operations	Whether the conditions of environmental approval/clearance are being complied with? (Y/N) If no, the reasons thereof and corrective action taken, if any.
No, we do not operate in ecologically sensitive areas and yes, we fully adhere to all environmental approval requirements.			

12. Details of environmental impact assessments of projects undertaken by the entity based on applicable laws, in the current financial year:

Name and brief details of project	EIA Notification No.	Date	Whether conducted by an independent external agency? (Yes/No)	Results communicated in public domain (Yes/No)	Relevant Web link
Not Applicable					

13. Is the entity compliant with the applicable environmental law/ regulations/ guidelines in India; such as the Water (Prevention and Control of Pollution) Act, Air (Prevention and Control of Pollution) Act, Environment protection act and rules thereunder (Y/N). If not, provide details of all such non compliances, in the following format:

Sr. No.	Specify the law / regulation / guidelines which was not complied with	Provide details of the non-compliance	Any fines / penalties / action taken by regulatory agencies such as pollution control boards or by courts	Corrective action taken, if any
Yes, the Company is compliant with the applicable environmental law / regulations / guidelines in India.				

LEADERSHIP INDICATORS

1. Water withdrawal, consumption and discharge in areas of water stress (in kilolitres):

None of our units fall under the water stress area.

Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency? (Y/N)
If yes, name of the external agency.

No.

2. Please provide details of total Scope 3 emissions & its intensity, in the following format.

Parameter	Unit	FY 2024-25 Current Financial Year	FY 2023-24 Previous Financial Year
Total Scope 3 emissions (Break-up of the GHG into CO ₂ , CH ₄ , N ₂ O, HFCs, PFCs, SF ₆ , NF ₃ , if available)	Metric tonnes of CO ₂ equivalent	Not Available	Not Available

3. With respect to the ecologically sensitive areas reported at Question 11 of Essential Indicators above, provide details of significant direct and indirect impact of the entity on biodiversity in such areas along-with prevention and remediation activities.

Not Applicable.

4. If the entity has undertaken any specific initiatives or used innovative technology or solutions to improve resource efficiency, or reduce impact due to emissions / effluent discharge / waste generated, please provide details of the same as well as outcome of such initiatives, as per the following format.

Sr. No.	Initiative undertaken	Details of the initiative (Web-link, if any, may be provided along-with summary)	Outcome of the initiative
1	Reduction of Waste through Reel and Box Reuse	Under the packing department, the Company initiated a project to reduce waste by reusing plastic spools and thermocol boxes collected from customers. The returned materials are redistributed to other customers, reducing the monthly requirement for new reels.	Reels on returnable basis are reused, reducing the need for new purchases and thereby reducing environmental impact.
2	1350 kW Solar Plant Installation	The Company has installed 1350 kW solar power plants. These plants contribute to significant reductions in electricity consumption from non-renewable sources.	Monthly reduction of ~ 6,000 power units, contributing to lower Scope 2 GHG emissions.
3	Reduction of Air Pollution in Enamelling Process	The Company initiated a project to improve air quality within the enamelling section. A 10,000 CFM capacity exhaust blower system was installed and commissioned. This aimed to reduce air pollution and eye irritation among workers.	Air pollution in the enamelling plant significantly reduced; improvement in indoor air quality has been noted.

5. Does the entity have a business continuity and disaster management plan? Give details in 100 words/ web link.

No, the Company currently has no disaster management plan, however, it regularly promotes Fire Safety and other relevant Mock Drills for the workforce.

6. Disclose any significant adverse impact to the environment, arising from the value chain of the entity. What mitigation or adaptation measures have been taken by the entity in this regard.

The Company has not carried out any environmental Impact assessment of its value chain partners.

7. Percentage of value chain partners (by value of business done with such partners) that were assessed for environmental impacts.

Nil

8. How many Green Credits have been generated or procured:

- a. By the listed entity

Nil

- b. By the top ten (in terms of value of purchases and sales, respectively) value chain partners

LEADERSHIP INDICATORS

1. Channels/platforms where information on products and services of the entity can be accessed (provide web link, if available).

Information on the Company's products and services can be accessed at the website of the Company: www.rrshramik.com

2. Steps taken to inform and educate consumers about safe and responsible usage of products and/or services.

The Company is a B2B-focused organization. Our engagement with consumers/customers primarily occurs through direct interactions such as customer meetings, product demonstrations, and site visits. During these engagements, we proactively provide comprehensive information on the safe and responsible usage of our products and services. This includes guidance on operational protocols, maintenance requirements, and any applicable safety standards. These interactions ensure that our customers are well informed and equipped to use our products responsibly and effectively.

3. Mechanisms in place to inform consumers of any risk of disruption/discontinuation of essential services.

The Company is not directly involved in providing essential services (as defined in 'The Essential Services Maintenance Act, 1981). Therefore, this question is Not Applicable.

4. Does the entity display product information on the product over and above what is mandated as per local laws? (Yes/No/ Not Applicable) If yes, provide details in brief. Did your entity carry out any survey with regard to consumer satisfaction relating to the major products / services of the entity, significant locations of operation of the entity or the entity as a whole?
